Syllabi of Courses

for

Skill Development in ESDM sector

Under the
“Scheme for Financial assistance to select States/UTs for Skill Development in ESDM sector” (Scheme-1)
and
“Skill Development in ESDM for Digital India” (Scheme-2)
of

Department of Electronics and Information Technology
Ministry of Communications & Information Technology,
Government of India
1 SUMMARY OF ESDM COURSE LIST FROM ESSCI/ NIELIT / TSSC .................................................5

2 SERVICE SECTOR .....................................................................................................................12

2.1 Consumer Electronics .............................................................................................................12
  2.1.1 Field Technician – Air conditioner (ESSCI) ........................................................................12
  2.1.2 Field Engineer – RACW (Refrigerator, AC & Washing Machine) (ESSCI) ......................16
  2.1.3 Diploma in Installation & Repair of Consumer Electronics Products (NIELIT/ESSCI) ....22
  2.1.4 Installation, Repair and Maintenance of Home Appliances (NIELIT/TSSC/ESSCI) ........26
  2.1.5 Mobile Phone hardware Repair Technician (ESSCI) ........................................................32

2.2 Communications Electronics ..................................................................................................36
  2.2.1 DTH Set-top-box Installer and Service Technician (ESSCI/TSSC) ....................................36
  2.2.2 DAS (Digital Addressable System) Set-top-box Installer and Service Technician (ESSCI/TSSC) ..........................................................40
  2.2.2 Digital Cable TV Technician (ESSCI) ..................................................................................44

2.3 IT Hardware ..............................................................................................................................50
  2.3.1 Installation Technician – Computing and Peripherals (ESSCI/TSSC) ..................................50
  2.3.2 Field Technician – Computing and Peripherals (ESSCI) ...................................................54
  2.3.3 Field Technician – Networking and Storage (ESSCI/TSSC) .............................................58
  2.3.4 CCTV Installation technician (ESSCI/TSSC) ....................................................................62
  2.3.5 Access Controls Installation Technician (ESSCI) ..............................................................67
  2.3.6 Electronic Security System Technician (ESSCI) .................................................................71

2.4 Solar Electronics .......................................................................................................................80
  2.4.1 Solar Panel Installation Technician (ESSCI/TSSC) .............................................................80
  2.4.2 Tech Support (ESSCI) .......................................................................................................84
  2.4.3 Testing of Emergency Light & Solar Lantern (ESSCI) .......................................................87

2.5 PCB Assembly ..........................................................................................................................93
  2.5.1 Pick and Place Assembly Operator (ESSCI/TSSC) .............................................................93

2.6 Industrial Electronics ..............................................................................................................97
  2.6.1 Wireman – Control Panel (ESSCI/TSSC) ...........................................................................97
  2.6.2 Repair & Maintenance of Power Supply, Inverter & UPS (NIELIT/ESSCI/TSSC) ..........102

2.7 Electronic Security ...................................................................................................................110
  2.7.1 Security System Installer (ESSCI) ....................................................................................110

2.8 Office Automation, IT & Networking (IT) ..............................................................................123
  2.8.1 Installation & Maintenance of Photocopiers and Printers (NIELIT) ................................123
  2.8.2 Telecom Technician - PC Hardware and Networking (NIELIT/TSSC/ESSCI) ............130
  2.8.3 CHM-O Level (NIELIT) ....................................................................................................137
  2.8.4 CHM-A Level (NIELIT) ....................................................................................................145

2.9 Electronic Product Design ......................................................................................................153
  2.9.1 Certificate Course in Electronic Product Testing (NIELIT/ESSCI/TSSC) ......................153

2.10 Medical Electronics ..............................................................................................................161
  2.10.1 Repair & Maintenance of Dental equipment (NIELIT) ....................................................161
  2.10.2 Repair & Maintenance of Imaging Equipment (X-Ray & Ultrasound machine) (NIELIT) ...........................................................................164
  2.10.3 Repair & Maintenance of Electrocardiogram ECG and Intensive Coronary Care Unit (ICCU) Equipment (NIELIT) .........................167
    2.10.4 Post Diploma in Repair & Maintenance of Hospital Equipment (NIELIT) .................171
    2.10.5 Tele-health technician (TSSC) ....................................................................................174

2.11 Industrial Automation ..........................................................................................................178
  2.11.1 Diploma in Repair & Maintenance of Industrial Instrumentation & Automation System (NIELIT/ESSCI) ..........................................................178

2.12 Computer Hardware ..............................................................................................................219
  2.12.1 Assembly and Maintenance of PC (NIELIT) .....................................................................219

2.13 Telecom Segment ..................................................................................................................224
2.13.1 Installation/Repair & Maintenance of EPABX System (NIELIT/TSSC) ................................................................. 224
2.13.2 Optical Fiber Splicer (TSSC) ......................................................................................................................... 229
2.13.3 Tower Technician (TSSC) ......................................................................................................................... 232
2.13.4 Handset repair Engineer (Level II) (TSSC) .................................................................................................... 235
2.13.5 Broadband Technician (TSSC/ESSCI) ........................................................................................................... 239
2.13.6 Optical Fiber Technician (TSSC) .................................................................................................................. 242
2.13.7 Installation Engineer – SDH (Synchronous Digital Hierarchy) & DWDM (Dense Wavelength Division Multiplexing) (TSSC) 245
2.13.8 Installation Engineer – Networking Layer2 & Layer3 (TSSC/ESSCI) .............................................................. 248
2.13.9 Telecom Installation and Repair Worker (TSSC) ......................................................................................... 251
2.13.10 Telecom Industry Network Security Technician (TSSC) .......................................................................... 255
2.13.11 Telecom Tower Equipment Installer and Integrator (TSSC) ....................................................................... 261

2.14 Network Management ........................................................................................................................................... 266
2.14.1 Grass Root Telecom Provider (TSSC/ESSCI) .............................................................................................. 266

2.15 Network Operation & Maintenance ..................................................................................................................... 271
2.15.1 Telecom Industry Network Specialist (TSSC) ............................................................................................... 271

3 MANUFACTURING SECTOR ....................................................................................................................................... 274

3.1 Consumer Electronics ............................................................................................................................................. 274
3.1.1 Assembly Operator-RAC (Refrigerator, AC) (ESSCI) ..................................................................................... 274
3.1.2 Mobile Phone Assembly Operator (ESSCI) ................................................................................................. 280
3.1.3 Mobile Phone quality Inspector (ESSCI) ....................................................................................................... 288

3.2 Solar Electronics ....................................................................................................................................................... 296
3.2.1 Solar-LED Lighting Products (Design and Manufacturing) (NIELIT/ESSCI) .............................................. 296

3.3 PCB Assembly ......................................................................................................................................................... 301
3.3.1 Through Hole Assembly Operator (ESSCI/TSSC) ....................................................................................... 301
3.3.2 Circuit Imaging Operator (ESSCI/TSSC) ....................................................................................................... 306

3.4 Electronic Product Design .................................................................................................................................... 310
3.4.1 Computer Aided Product Design (NIELIT/TSSC/ESSCI) ........................................................................... 310

3.5 Industrial Automation .............................................................................................................................................. 317
3.5.1 Automation Technology – Basic Level (NIELIT/ESSCI) ............................................................................. 317
3.5.2 Certificate in robotic programming and maintenance (NIELIT/ESSCI) .................................................... 325
3.5.3 Automation Technology – Intermediate Level (NIELIT/ESSCI) .............................................................. 332
3.5.4 Automation Technology – Advanced level (NIELIT/ESSCI) ...................................................................... 343

3.6 Telecom Electronics ................................................................................................................................................. 354
3.6.1 Telecom Test Technician (TSSC) .................................................................................................................. 354
3.6.2 Board Bring Up Engineer (TSSC/ESSCI) .................................................................................................... 360
3.6.3 Telecom Embedded Hardware Developer (TSSC/ESSCI) .......................................................................... 365

3.7 Telecom Manufacturing ....................................................................................................................................... 370
3.7.1 Electrical Testing of Telecom Assemblies (TSSC) ....................................................................................... 370
3.7.2 IPC (Institute of Printed Circuits) Acceptability Criteria of Telecom PCB (Printed Circuit Boards)Assemblies (TSSC/ESSCI) ........................................................................................................................................... 376
3.7.3 SMT (Surface Mount Technology) Process for Telecom Boards (TSSC/ESSCI) ....................................... 382
3.7.4 Soldering of Telecom Board Assemblies (TSSC/ESSCI) ............................................................................ 389
3.7.5 Telecom Quality Technician (TSSC/ESSCI) ............................................................................................... 395
3.7.6 Line Repair Technician (TSSC) ................................................................................................................... 400
3.7.7 Line Assembler (TSSC) ............................................................................................................................. 403

3.8 LED & Photovoltaic ................................................................................................................................................. 406
3.8.1 LED Mechanical Assembly Operator (ESSCI) ........................................................................................... 406
3.8.2 Certificate Course in LED Light Mechanical Assembly (ESSCI) .......................................................... 410

3.9 Embedded System & VLSI .................................................................................................................................. 415
   3.9.1 Embedded system Design using 8-bit Microcontrollers (NIELIT/TSSC/ESSCI) .................................................. 415
   3.9.2 Post Diploma in VLSI Design, Tools and Technology (NIELIT/ESSCI) ............................................................ 419

3.10 Digital Fabrication ........................................................................................................................................... 424
   3.10.1 Additive Manufacturing/3D Printing (NIELIT/ESSCI) ................................................................................. 424
   3.10.2 3D Scanning and CNC routing (NIELIT) ........................................................................................................ 428
### 1 Summary of ESDM Course List from ESSCI/ NIELIT / TSSC

Course Code: **AB/C/DE/FGH I** where  
**AB:** EL/NL/TL (ESSCI/NIELIT/TSSC), **C:** S or M (S-Service, M-Manufacturing), **DE:** Level (e.g. L1/L2/L3...),  
**FGHI:** Course Number (C001, course no.1...)

<td>2.1.1 Field Technician – Air conditioner (ESSCI)</td>
</tr>
</tbody>
</table>

Objective of the Course:

To train the person, who installs the air conditioner and interacts with customers to diagnose the problem and assess possible causes. Once the problem and causes have been identified, the individual rectifies minor problems or replaces faulty modules for failed parts or recommends factory repairs for bigger faults.

Learning Outcomes:

NOS # ELE/N3101 - Engage with customer for service:

1. Interact with the customer prior to visit
2. Interact with customer at their premises
3. Suggest possible solutions to customer
4. Achieve productivity and quality as per company’s norms

NOS # ELE/N3108 - Install Air Conditioner

1. Undertake pre-installation site visit
2. Remove packaging and check accessories
3. Place the air conditioner at identified location
4. Check air conditioner’s functioning
5. Complete the documentation
6. Interact with supervisor or superior
7. Achieve productivity and quality as per company’s norms

NOS # ELE/N3109 - Repair dysfunctional Air conditioner

1. Understand the symptoms in the air-conditioner and identify the fault
2. Replace dysfunctional module in the air conditioner unit
3. Confirm functionality of the repaired unit
4. Achieve productivity and quality as per company’s norms

NOS # ELE/N9901 - Interact with colleagues
1. Interact with supervisor or superior
2. Coordinate with colleagues

Expected Job Roles:
Filed Technician – Air Conditioner

Duration of the Course (in hours) 350 hours

Minimum Eligibility Criteria and pre-requisites, if any 10th Passed

Professional Knowledge:

NOS # ELE/N3101 - Engage with customer for service:
KB1. company’s products and recurring problems reported in consumer appliances
KB2. how to communicate with customers in order to put them at ease
KB3. basic electrical and mechanical modules of various appliances
KB4. electronics involved in the type of appliance

Knowledge of the company / organization and its processes

NOS # ELE/N3102 - Install the Air Conditioner
KB1. Installation-site requirements (structural requirements, ventilation, etc.)
KB2. Different types of air conditioners such as window, split, cassette etc.
KB3. different features and functionalities of various models
KB4. safety precautions to be taken while installing

NOS # ELE/N3103 - Repair dysfunctional Air Conditioner
KB1. different types of air conditioners, e.g., window, split air, cassette conditioners and differences in their operation
KB2. features of different air conditioners of the company
KB3. functioning of the appliance and its various modules
KB4. method of air conditioning, its use and functioning of sealed system
KB5. Basics of types of refrigerants such as R12, R22, R134a, R290, R600a, R410, R32 use of different brazing sticks,
types of brazing torches and their application  
KB6. types of brazing torches, types of fluxes and their application  
KB7. basic electronics (knowledge of components such as diode, transformer, LED, photo transistor, capacitor, resistor, inductor, thermisters)  
KB8. functioning of various electromechanical parts of the air conditioner

Professional Skill:

1. Interpersonal skills  
2. Communication skills  
3. Behavioural skills  
4. Reading, writing and computer skills  
5. Teamwork and multitasking  
6. Documentation Skills  
7. Reflective thinking  
8. Critical Thinking  
9. Decision Making

Core Skill:

1. Air conditioner operation  
2. Using tools and machines  
3. Fault diagnosis skills

Objective of the Course:

To train the person, who interacts with customers to install the appliance and diagnose the problem to assess possible causes of malfunction. Once the problem and causes have been identified, the individual rectifies minor problems or replaces faulty modules for failed parts or recommends factory repairs for bigger faults.

Learning Outcomes:

NOS # ELE/N3101 - Engage with customer for service:

1. Interact with the customer prior to visit
2. Interact with customer at their premises
3. Suggest possible solutions to customer
4. Achieve productivity and quality as per company’s norms

NOS # ELE/N3112 - Install newly purchased refrigerator

1. Remove packaging and check accessories
2. Place the appliance to appropriate location
3. Check refrigerator’s functioning
4. Complete documentation
5. Interact with superior
6. Interact with and train service technicians
7. Achieve productivity and quality as per company’s standards

NOS # ELE/N3113 - Attend to service complaints - refrigerator

1. Understand the symptoms and identify the fault
2. Replace dysfunctional module in the refrigerator unit
3. Confirm functionality of the repaired unit
4. Achieve productivity and quality as per company’s standards
5. Interact with and train technicians

NOS # ELE /N3114 - Install newly purchased air conditioner

1. Undertake pre-installation site visit
2. Remove packaging and check accessories
3. Place the air conditioner at identified location
4. Check air conditioner’s functioning
5. Complete the documentation
6. Interact with supervisor or superior
7. Interact with and train service technicians
8. Achieve productivity and quality as per company’s norms

NOS # ELE /N3115 - Attend to service complaints – Air Conditioner

1. Understand the symptoms in the air-conditioner and identify the fault
2. Replace dysfunctional module in the air conditioner unit
3. Confirm functionality of the repaired unit
4. Interact with and train service technicians
5. Achieve productivity and quality as per company’s norms

NOS # ELE /N3116 - Install newly purchased washing machine

1. Remove packaging and check accessories
2. Place the washing machine at appropriate location
3. Check washing machine’s functioning
4. Complete documentation
5. Interact with superior
6. Interact with and train service technicians
7. Achieve productivity and quality as per company’s standards

NOS # ELE /N3117 - Attend to service complaints – washing machine

1. Understand the symptoms and identify the fault
2. Repair the washing machine
3. Confirm functionality of the repaired unit
4. Achieve target as per company’s policy
5. Interact with and train service technicians

**NOS # ELE/N9901 - Interact with colleagues**

1. Interact with supervisor or superior
2. Coordinate with colleagues

**Expected Job Roles:**

Filed Engineer - RACW

**Duration of the Course (in hours)**

350 hours

**Minimum Eligibility Criteria and pre-requisites, if any**

12th Pass/ITI

**Professional Knowledge:**

**NOS # ELE/N3101 - Engage with customer for service:**

KB1. company’s products and recurring problems reported in consumer appliances
KB2. how to communicate with customers in order to put them at ease
KB3. basic electrical and mechanical modules of various appliances
KB4. electronics involved in the type of appliance

Knowledge of the company / organization and its processes

**NOS # ELE/ NOS # ELE/N3112 - Install newly purchased refrigerator:**

KB1. Installation site requirements (structural requirements, ventilation, etc.)
KB2. different types of refrigerators such as traditional, frost-free, Peltier
KB3. different features and functionalities of various models
KB4. safety precautions to be taken while installing
KB5. manual-based procedure of installing the refrigerators
KB6. packaging waste disposal procedures
KB7. use of test equipment and tools such as multi-meter, oscilloscope
KB8. other products of the company

**NOS # ELE /N3113 - Attend to service complaints - refrigerator**

KB1. different types of refrigerators, e.g., frost free, direct cool and peltier refrigerators and differences in their operation
KB2. features of different refrigerators of the company
KB3. refrigeration cycle and functioning of the appliance and its various modules
KB4. method of refrigeration, its use and functioning of refrigerator sealed system
KB5. types of refrigerants such as R12, R22, R134a, R290, R600a, R410, R32 use of different brazing sticks, types of brazing torches and their application
KB6. types of brazing torches, types of fluxes and their application
KB7. basic electronics (knowledge of components such as diode, transformer, LED, photo transistor, capacitor, resistor, inductor, thermistor, ICs
KB8. functioning of various electromechanical parts of the refrigerator
KB9. fundamentals of electricity such as ohms law, difference between ac and dc, calculation of energy consumption of appliances, understanding of domestic wiring, understanding of series and parallel connections

NOS # ELE /N3114 - Install newly purchased air conditioner

KB1. Installation site requirements (structural requirements, ventilation, etc.)
KB2. different types of air conditioners such as window, split, cassette etc.
KB3. different features and functionalities of various models
KB4. safety precautions to be taken while installing
KB5. manual-based procedure of installing the air conditioner

NOS # ELE /N3115 - Attend to service complaints – Air Conditioner

KB20. Basics of types of refrigerants such as R12, R22, R134a, R290, R600a, R410, R32 use of different brazing sticks, types of brazing torches and their application
KB21. types of brazing torches, types of fluxes and their application
KB22. basic electronics (knowledge of components such as diode, transformer, LED, transistor, capacitor, resistor, inductor, thermistor, ICs
KB23. functioning of various electromechanical parts of the air conditioner
KB24. fundamentals of electricity such as ohms law, difference between ac and dc, calculation of energy consumption of appliances, understanding of domestic wiring, understanding of series and parallel connections
KB25. troubleshooting knowledge with respect to air conditioners
KB26. hazards, their causes and prevention/personal safety
KB27. frequently occurring faults such as poor/no cooling, noisy unit, condensation water over flowing
KB28. components/modules of the air conditioner and their prices
KB29. energy ratings such BEE rating and concepts of e waste

NOS # ELE /N3116 - Install newly purchased washing machine

KB1. installation-site requirements (structural and plumbing requirements)
KB2. different types of washing machines such as front load and top load
KB3. different features and functionalities of various models
KB4. safety precautions to be taken while installing
KB5. manual-based procedure of installing the washing machine

NOS # ELE /N3117 - Attend to service complaints – washing machine

KB7. troubleshooting knowledge with respect to washing machine
KB8. types of switches such as thermal, mechanical, electronic, magnetic, electromagnetic, electromechanical, pressure optical and bimetal
KB9. fundamentals of motors, types of motors and their working methods
KB10. functioning of components and parts such as solenoids and plungers
Professional Skill:

1. Interpersonal skills
2. Communication skills
3. Behavioural skills
4. Reading, writing and computer skills
5. Teamwork and multitasking
6. Documentation Skills
7. Reflective thinking
8. Critical Thinking
9. Decision Making

Core Skill:

1. Refrigerator operation
2. Air conditioner operation
3. Using tools and machines
4. Fault diagnosis skills

Reference Books: NA
Objective of the Course:

Objective of this course is to give knowledge and competencies regarding Installation, Servicing, Repair, Fault Diagnosis and Error Remover for Consumer Electronics Product like LCD-LED TV and Monitor, Cable TV and DTH Services, Induction Stove etc.

Learning Outcomes:

After successful competition of this course, participant will be acquainted with the necessary Hardware and Software skills for Installation, Repair, Maintenance and Trouble shooting of Consumer Electronics Product. Participants will be a “Ready to Observe” product for Consumer Electronics Product manufacturing sector or may be self-employed.

Expected Job Roles:

Participants Job Role includes
- Support Technician for Multi-National and National Desktop PCs Manufacturers
- Can Work In Call Centre for After Sale Support
- can be also absorbed in Local Markets
- Can start their own Small Scale business and can be self employed

Duration of the Course (in hours)

350 Hours

Minimum Eligibility Criteria and pre-requisites, if any

ITI or 12th pass
**Professional Knowledge:**

The individual on the job needs to know and understand:

| PK1. | Knowledge of spare management and repair & return process for faulty components |
| PK2. | Protection equipment (anti-static wrist bands, shoes, dress, packaging, and other appropriate insulations) that are required to be used |
| PK3. | First aid requirements in case of electrical shocks, cuts and other common injuries |
| PK4. | Functionality and features/working of Consumer Electronics Products |
| PK5. | Consumer Electronics Products specific Console Control and user interface |
| PK6. | Functionality of hardware components of Consumer Electronics Products |
| PK7. | Procedure to dismantle and assemble Consumer Electronics Products |
| PK8. | Range of tools and testing equipment (multi meters, frequency generators etc) available and their functionality |
| PK9. | ESD hazards and their effect on electronic components |
| PK10. | Standard fault-finding (troubleshooting) techniques |
| PK11. | Basic computer knowledge to be able to run diagnostic tools |
| PK12. | Functionality of hardware components, software applications, screen, touchpad etc. |
| PK13. | Consumer Electronics Products software related problems and their possible solutions |
| PK14. | Standard repairing process |

**Professional Skill:**

The individual on the job needs to know and understand:

| PS1. | Consumer Electronics Product operating Skills |
| PS2. | Use and access all features and applications Consumer Electronics Product |
| PS3. | Operate Consumer Electronics Product testing equipment’s |
| PS4. | Connect Consumer Electronics Product’s PCB to PC/test equipment for diagnostics |
| PS5. | Consumer Electronics Product repairing skills |
| PS6. | Undertake fault diagnostic |
| PS7. | Interpret test results to identify and localize faults |
| PS8. | Utilize appropriate mechanisms and tools to rectify the faults |
| PS9. | Utilize appropriate communication channels to escalate unresolved problems |
| PS10. | Test Consumer Electronics Product to confirm and resolve of the reported fault |
| PS11. | Undertake corrective repairs by software porting/updates |
| PS12. | Undertake checks to confirm that the problem is resolved |
| PS13. | Consumer Electronics Product Component Handling skills |
| PS14. | Safely dismantle/assemble Consumer Electronics Product using the right tools |
| PS15. | Safe remove/replace components using right tools |
| PS16. | Compliance to ESD protection measures |
| PS17. | Consumer Electronics Product Software Skills |
| PS18. | Identifying correct software version/modules |
| PS19. | Ascertain correct and complete porting/update of software in the Consumer Electronics Product |
| PS20. | Consumer Electronics Product Troubleshooting Skills |
| PS21. | How to approach a defect |
| PS22. | Make use of standard OEM specified troubleshooting steps |
| PS23. | Interpret intermediate results and progress fault rectification accordingly |

**Core Skill:**

The individual on the job needs to know and understand how to:
Reading skills
CS1. Read and understand technical manuals, work orders and reports

CS2. Read and understand Consumer Electronics Product safety instructions

Writing Skills
CS3. Fill up record sheets clearly, concisely and accurately as per company procedures

Communication Skills
CS4. Clearly communicate relevant information to supervisors

CS5. Respond appropriately to queries

CS6. Time Management Skills
CS7. Prioritize and execute tasks in a high-pressure environment

CS8. Use and maintain resources efficiently and effectively

Analytical Skills
CS9. Analyse (and understand) Manufacturing Process based on Company need

CS10. Interpret reports, readings and numerical data

CS11. Keep up to date with new technology and performance issues

Other Skills
CS12. Create and maintain effective working relationships and team environment through collaboration

CS13. Take initiatives and progressively assume increased responsibilities

CS14. Share knowledge with other team members and colleagues

ESDM Courses

Level Code: L4  Vertical Name: Consumer Electronics (Home Appliances)

Objective of the Course:
The module has been designed to provide an understanding of the basics of Electrical and Electronic with an introduction to various electronic active & passive components and test equipments. The participants would be acquainted with the Electrical Hazards along with work place safety instructions and precautions that need to be taken while handling the Electrical and Electronic equipment and appliances. It covers the basic know how required for Installation, Repair and Maintenance of Washing Machine, Microwave Oven, Juicer-Mixer-Grinder & Water purifier. In addition, the participants would get the knowledge about Soldering & De-soldering technique.

Learning Outcomes:
Students shall be able to
- Install the washing machine, Microwave Oven, Juicer-Mixer-Grinder and Water Purifier
- Diagnose faults in the Washing Machine, Microwave Oven, Juicer-Mixer-Grinder & Water purifier.
- Carry out fault rectification
- Interact with the customer, management effectively
- Be able to log call reporting

Expected Job Roles:
The pass out would be competent to:
- Understand the basic terminology and handling of tools and instruments.
- Learn to have effective interaction with customer for Servicing, Installation and Troubleshooting of Washing Machine, Microwave Oven, Juicer-Mixer-Grinder & Water purifier in addition to the product operating guidelines for customer.
- Able to take decision to go for repair work by different case analysis and discussion with colleague.
- Understand the type, model, rating and accessories of Washing Machines, Microwave Oven, Juicer-Mixer-Grinder & Water purifier.
- Installation, fault identification and servicing of Washing Machines, Microwave Oven, Juicer-Mixer-Grinder & Water purifier
Duration of the Course
(in hours)  
350 Hours

Minimum Eligibility
Criteria and pre-requisites, if any  
10th + ITI, 12th pass, non-science graduates.

Professional Knowledge:
The individual on the job needs to know and understand:
PK1. Knowledge of Electronic and Electrical Components
PK2. Resistors, Capacitors and Inductors, their identification, types and application
PK3. Protection equipment (anti-static wrist bands, shoes, dress, packaging, and other appropriate insulations ) that are required to be used
PK4. First aid requirements in case of electrical shocks, cuts and other common injuries
PK5. Soldering and De-Soldering Techniques
PK5. Basic functionality/working of washing machine/ microwave oven/juicer-mixer-grinder, water purifier.
PK6. Installation/Handling instruction of these devices.
PK7. Fault identification, repair and maintenance of washing machine/ microwave oven/juicer-mixer-grinder, water purifier.
PK8. Component testing methods
PK9. Troubleshooting through circuit diagram
PK10. Removal and Replacement of faulty Component

Professional Skill:
The individual on the job needs to know and understand:
Electrical and Electronic Component Identification and Use Skills

PS1. Understand use of Electrical Component such as cable, switches, transformers, etc.
PS2. Understand use of Electronics Component such as Diodes, Transistors, ICs etc.
PS3. **Soldering skills**
   Understand Soldering Requirements
PS4. Operation of Equipment required for Soldering
PS5. Use of Desoldering Pump
PS6. **Basic functionality and Installation**
   washing machine, Microwave oven, Juicer-Mixer-Grinder, Water Purifier
PS7. **Fault identification, Repair and Maintenance**
   washing machine, Microwave oven, Juicer-Mixer-Grinder, Water Purifier
PS8. **Troubleshooting Skills**
   How to approach a defect
PS9. Make use of standard OEM specified troubleshooting steps
PS10. Interpret intermediate results and progress fault rectification accordingly
PS11. Utilize appropriate tools to rectify faults
PS12.

Core Skill:

The individual on the job needs to know and understand how to:

**Reading skills**
CS1. Read and understand technical manuals, work orders and reports
CS2. Read and understand organizational health and safety instructions

**Writing Skills**
CS3. Fill up record sheets clearly, concisely and accurately as per company procedures

**Communication Skills**
CS4. Clearly communicate relevant information to supervisors
CS5. Respond appropriately to queries
CS6. Communicate with customer/customer facing teams to understand handset performance issues
CS7. Communicate in the local language
CS8. Convey proposed solution to the customers

**Time Management Skills**
CS9. Prioritize and execute tasks in a high-pressure environment
CS10. Use and maintain resources efficiently and effectively

**Analytical Skills**
CS11. Analyse (and understand) customer complaints
CS12. Interpret reports, readings and numerical data
CS13. Keep up to date with new technology and performance issues

**Other Skills**
CS14. Create and maintain effective working relationships and team environment through collaboration
CS15. Take initiatives and progressively assume increased responsibilities
CS16. Share knowledge with other team members and colleagues
### Detailed Syllabus of Course

<table>
<thead>
<tr>
<th>Sl. No.</th>
<th>Modules</th>
<th>Min: No. of Hours</th>
</tr>
</thead>
</table>
| **1.** | **Introduction to Electricity**  
- Electric Charge, Voltage, Electric Current  
- Ohm’s Law, Electric Potential, Cell  
- Serial and Parallel Circuit, their effect on Voltage and Current  
- Transformer, Use and Operation | 5 / 5 |
| **2.** | **Electronic and Electrical components**  
- Active and Passive Components  
- Resistors, Capacitors and Inductors, their identification, types and application  
- Semiconducting Devices: Diodes, its type, characteristics and applications  
- Transistors, Integrated Circuits  
- Study of a transistor, use of a transistor as an amplifier and as a switch.  
- Analog ICs, 555 timer, IC741, characteristics of 741  
- Digital ICs, ICs for logic gates, Truth table verification of logic gates  
- Connectors  
- Fuse, types, Use of Fuses and its rating  
- Relays and Switches  
- Panel Components  
- Digital electronics – gates and its application, multiplexers, de-multiplexers, counter | 15 / 15 |
| **3.** | **Soldering/ de-soldering techniques**  
- Soldering Iron, Soldering wire, Soldering Flux, Soldering method, Zero defect soldering  
- Desoldering pump, Temperature controlled soldering station,  
- Hands-on-practices of Soldering | 10 / 10 |
| **4.** | **Tools and equipment use for Repairing and maintenance of Electrical Equipment**  
- Screw Driver Set  
- Tweezers, Different Types of Tweezers, Nose Pliers, Wire Cutter  
- Hot air gun  
- Liquid solder pest, Magnifying Lamp and Measuring Tools  
- Brush, CRO, Nipper  
- Test and Measurement Equipment, Multimeter Operation etc. | 10 / 10 |
| **5.** | **Basic functionality and Installation of washing machine**  
- Different type of washing machines & working principle,  
- Basic hand wash process, Different types of technologies being used in Washing machines – Pulsator, Agitator, Agipellar, Tumble wash,  
- Main parts of washing machines and their functionalities etc.  
- Opening the packed Washing machine, Selection of the suitable place for | 15/20 |
<p>| | |</p>
<table>
<thead>
<tr>
<th></th>
<th></th>
</tr>
</thead>
</table>
| 6. | **Fault identification, Repair and Maintenance of Washing machine**  
   - Testing & identification of the faulty block on the basis of symptom,  
   rectifying common faults by replacing the damage components,  
   - Testing of the damage block after repair,  
   - Step by step re-assembly of the washing machine panel. | 15/20 |
| 7. | **Basic functionality and Installation of Microwave oven**  
   - Basic working principle of circuit and block description of Microwave Oven  
   - identification of parts and their working  
   - MWO heating/cooking, MWO safe utensils, Tips & Safety precautions for MW  
   - Opening the packaged Microwave Oven  
   - Selection of the electric power socket  
   - switch rating and place for microwave oven installation  
   - Install the microwave oven with the help of step by step instruction.  
   - Demonstration of various functionality of Microwave Oven. | 10/15 |
| 8. | **Fault identification, Repair and Maintenance of Microwave oven**  
   - Identify the problem based on customer's information, possible solutions and repair costs involved,  
   - Common occurring faults with the Microwave Oven their identification and repair.  
   - Maintenance of Microwave Oven. | 10/20 |
| 9. | **Basic functionality and Installation of Mixer/Juicer/Grinder**  
   - Working principle of mixer/juicer/grinder,  
   - Identification of various parts and their functionalities.  
   - functioning of motor and circuit breaker,  
   - Opening the packaged Mixer/Juicer/Grinder, assembly of component,  
   - Selection of the power socket, switch rating and place for installation,  
   - Steps to Install the Mixer/Juicer/Grinder. Demonstration of various functionalities of Mixer/Juicer/Grinder | 10/15 |
| 10. | **Fault identification, Repair and Maintenance of Mixer/Juicer/Grinder**  
   - Common occurring faults, identification and repair,  
   - maintenance of Mixer/Juicer/Grinder | 10/20 |
| 11. | **Basic functionality and Installation of Water purifier**  
   - Working principle /functionality of different types of water purifiers, part identification and their working,  
   - unpacking of Water purifier, Selection of the place for installation,  
   - Steps to Install the water purifier. | 10/15 |
| 12. | **Fault identification, Repair and Maintenance of Water purifier**  
   - Identification of problem, possible causes and solution | 10/15 |
### 13. Safety and Security Procedures
- Reporting incidents, system failures, power failures etc., protection equipment
- First aid requirement in case of electrical shocks and other injuries

### 14. Reading, Writing and Communication Skills
- Understanding Technical Manuals, Reports, Work orders etc.
- Understanding Organizational health and safety instructions
- Types of documentation in organization, their importance, Company guidelines and norms, activities after maintenance process
- Spare management, Service Level Agreements (SLAs)
- Fill-up forms, record sheets, log book etc. as per company procedures
- Customer Communication, Convey proposed solution to the customer, responding queries
- Communication with supervisor, Report for unresolved problems
- Time Management and Team Skills

| Total Theory / Lecture Hours: | 150 hrs |
| Total Practical / Tutorial Hours: | 200 hrs |
| Total Hours: | 350 hrs |

**Recommended Hardware:**
- Semi-Automatic Washing Machine
- Microwave Oven
- Juicer-Mixer-Grinder & Water Purifier
- Multimeter, Soldering Iron, screw driver set, Wire cutter & plier etc

**Recommended Software:**
NIL

**Text Books:**
- Course Material Prepared by NIELIT, Chandigarh

**Reference Books:**
- Modern Washing Machine Servicing by Lotia (Author) BPB (Publisher)
Objective of the Course:

**Mobile Phone Hardware Repair Technician:** The Smartphone Repair Technician diagnoses problems and repairs the faulty module of the smartphone.

**Brief Job Description:** The individual at work is responsible for rectifying faults in the smartphone brought in by the customer. The individual receives the faulty smartphone, diagnoses the problems, performs front end or hardware level repair as required, resolves software issues and ensures effective functioning before delivering back to customer.

**Personal Attributes:** The job requires the individual to have: attention to details, patience, ability to listen, steady hands, logical thinking and customer orientation. The individual must work on desk with different types of equipment.

Learning Outcomes:

**NOS # ELE/N8106 Interact with customer and perform front end repair**

1. Engage with the customer
2. Understand the complaint
3. Check for terms and conditions of using system
4. Perform front end repair
5. Interact with supervisor or superior and achieve targets

**NOS # ELE/N8107 Repair and rectify the faults in smartphone**

1. Follow standard repair procedures and avoid damage
2. Diagnose the problem in the smartphone
3. Decide on the type of repairs to be performed
4. Assemble or disassemble the smartphone as per repair required
5. Replace or repair the faulty module
6. Fix the software malfunction
7. Document the repair process
8. Seek assistance from superior as necessary
9. Report and document work status and achieve productivity target

**NOS # ELE/N9951 Interact with other employees**

10. 1 Interact with supervisor or superior
11. 2 Coordinate with colleagues

**NOS # ELE/N9910 Maintain safe and secure work environment**

1. Follow standard safety procedures while handling an equipment
2. Participate in company’s safety drills and workshops
Expected Job Roles:
Mobile Phone Hardware Repair Technician

Duration of the Course (in hours) 350 Hrs.

Minimum Eligibility Criteria and pre-requisites, if any ITI/12th Pass

Professional Knowledge:

**NOS # ELE/N5901 Check site conditions, collect tools and raw materials**

- KA1. company’s policies on: incentives, delivery standards, and personnel management
- KA2. company’s sales and after sales support policy
- KA3. importance of the individual’s role in the workflow
- KA4. reporting structure
- KA5. company’s policy on product’s warranty and other terms and conditions
- KA6. company’s line of business and product portfolio
- KA7. company’s service level agreement (SLA) with the brand

- KB1. basic electronics involved in the hardware
- KB2. operate various models of smartphone
- KB3. features of smartphone and their purpose
- KB4. different types of smartphone and their model specifications
- KB5. how to document the spares movement note and capture all the action performed
- KB6. different accessories available for smartphones and their purpose
- KB7. software and applications related to smartphone
- KB8. procedures of replacing accessories such as battery, SD card
- KB9. software and applications available in the smartphone market, their usage and purpose
- KB10. licensed and authorised software compatible for smartphones and the downloading procedure
- KB11. specifications of accessories such as chargers, battery
- KB12. service level agreement with the brand on parameters such as turn around time (TAT), repair procedure, warranty
- KB13. company’s ERP system and operational procedure
- KB14. safety rules, policies and procedures
- KB15. quality standards to be followed

**NOS # ELE/N8107 Repair and rectify the faults in smartphone**

- KA1. company’s policies on: incentives, delivery standards, and personnel management
- KA2. company’s after sales support policy
- KA3. importance of the individual’s role in the workflow
- KA4. reporting structure
- KA5. company’s policy on product’s warranty and other terms and conditions
- KA6. company’s line of business and product portfolio
- KA7. company’s repair and stores policy
- KA8. documentation procedure followed in the company
- KA9. company’s policy on repair time, turnaround time, production targets, working hours
KB1. basic electronics involved in the hardware
KB2. operations of different models of smartphone
KB3. features of smartphone and their purpose
KB4. different types of smartphone and their model specifications
KB5. new product specifications and their spares and repair details
KB6. how to document the spares movement note and capture activity performed
KB7. software and applications related to smartphone
KB8. assembling and disassembling smartphone
KB9. handling procedure of display systems in smartphone (LCD and LED)
KB10. frequently encountered problems in smartphone and their repair procedures
KB11. terminologies and procedures mentioned in repair manual
KB12. softwares and operating system related to smartphone
KB13. applications including games that can be installed in smartphone and the authentic source to download them
KB14. licensed versions of software and application, its terms and conditions associated with it
KB15. different types of soldering techniques such as surface mount, through hole
KB16. basic electronic repairing and reworking such as desoldering, soldering, removal and fixing components
KB17. usage of tools such as electric screwdrivers, multimeter, soldering station, hot air blower, BGA workstation
KB18. estimate cost of repair and verify Beyond Economic Repair (BER) value
KB19. service level agreement (SLA) and conditions associated with it
KB20. Electrostatic Discharge (ESD), its purpose and precautionary measures to be taken
KB21. process system such as 5S
KB22. documentation procedure to record customer, smartphone and repair details
KB23. check and test various electronic components on their functionality
KB24. quality standards to be followed
KB25. implementation process for Engineering Change Order (ECO)

ELE/N9952 Coordinate with colleagues at work

KA1. company's policies on: incentives, delivery standards, and personnel management
KA2. importance of the individual's role in the workflow
KA3. reporting structure

KB1. how to communicate effectively
KB2. how to build team coordination

ELE/N9953 Ensure safety at workplace

KA1. company's policies on: incentives, delivery standards, and personnel management
KA2. company occupational safety and health policy followed
KA3. company emergency evacuation procedure
KA4. company's medical policy

KB1. how to maintain the work area safe and secure
KB2. how to handle hazardous material
KB3. how to operate hazardous tools and equipment
KB4. emergency procedures to be followed such as fire accidents, etc.
Professional Skill:

i. Interpersonal skills
ii. Behavioural skills
iii. Reflective thinking
iv. Critical Thinking
v. Decision Making
vi. Using tools and machines

Core Skill:

1. Using tools and machines
2. Reading, writing and computer skills
3. Teamwork and multitasking
4. Communication skills

Objective of the Course:
To train the person who installs the set-top box at customer's premises; addresses the field serviceable complaints and coordinates with the technical team for activation of new connections

Learning Outcomes:

**NOS # ELE/N8105 - Install and repair DTH set-top box**
1. Collect the customer’s site details and carry necessary equipment and products
2. Install the set top box (DTH) at customer’s site
3. Provide field service and resolve faults in case of complaint
4. Collect documents and forms filled by customer as per company’s policy
5. Achieve productivity and quality targets as prescribed by company

**NOS # ELE/N8102 - Comprehend customer’s requirement**
1. Interact with the customer prior to visit
2. Interact with customer at their premises
3. Suggest possible solutions to customer
4. Achieve productivity and quality as per company’s norms

**NOS # ELE/N9951 - Interact with other employees**
1. Interact with supervisor or superior
2. Coordinate with colleagues

Expected Job Roles:
DTH Set-top Box Installer and Service Technician

Duration of the Course (in hours) | 200 hours
## Minimum Eligibility Criteria and pre-requisites, if any

| 8th Passed |

### Professional Knowledge:

#### NOS # ELE/N8101 - Install and repair DTH set-top box

- KB1. basics of Geo stationery satellite and Other Communication Satellite
- KB2. azimuth, elevation and polarisation
- KB3. spectrum utilization
- KB4. optimum signal strength/ signal quality for good reception
- KB5. basics of input/output functions and block diagram of the set top box
- KB6. functions of the set top box and remote control
- KB7. structure of cable, parameters and the implications on signal
- KB8. basic functioning of tuners
- KB9. functioning of Low Noise Block Down Convertor (LNBC)
- KB10. basics of digital signals and difference in analogue and digital
- KB11. transmission of television signals and functioning of television sets
- KB12. specifications of different kind of inputs available on TV sets such as RF, AV, RGB, VGA, USB and HDMI
- KB13. digital signal processing chain including CAS and SMS

#### NOS # ELE/N8102 - Comprehend customer’s requirement

- KA1. company’s policies on: customer care
- KA2. company’s code of conduct
- KA3. organisation culture and typical customer profile
- KA4. company’s reporting structure
- KA5. company’s documentation policy

- KB1. company’s products and recurring problems reported in consumer appliances
- KB2. how to communicate with customers in order to put them at ease
- KB3. basic electrical and mechanical modules of various products
- KB4. electronics involved in the type of product
- KB5. models of different appliances and their common and distinguishing features
- KB6. etiquette to be followed at customer’s premises
- KB7. precautions to be taken while handling field calls and dealing with customers
- KB8. relevant reference sheets, manuals and documents to carry in the field

#### NOS # ELE/N9951 - Interact with other employees

- KB1. how to communicate effectively
- KB2. how to build team coordination
Professional Skill:

i. Interpersonal skills
ii. Communication skills
iii. Behavioural skills
iv. Reading, writing and computer skills
v. Teamwork and multitasking
vi. Documentation Skills
vii. Reflective thinking
viii. Critical Thinking
ix. Decision Making

**ESDM Courses**

**Level Code:** II  
**Vertical Name:** Communication Electronics

**Course Code:** EL/S/L2/C002  
**Course Name:** 2.2.1 DAS (Digital Addressable System) Set-top-box Installer and Service Technician (ESSCI/TSSC)

**Objective of the Course:**
To train the person who installs the set-top box at customer’s premises; addresses the field serviceable complaints and coordinates with the technical team for activation of new connections

**Learning Outcomes:**

**NOS # ELE/N8101 - Install and repair DAS set-top box**
1. Collect the customer’s site details and carry necessary equipment and products
2. Install the set top box (DAS) at customer’s site
3. Provide field service and resolve faults in case of complaint
4. Collect documents and forms filled by customer as per company’s policy
5. Achieve productivity and quality targets as prescribed by company

**NOS # ELE/N8102 - Comprehend customer’s requirement**
1. Interact with the customer prior to visit

### Objective of the Course:

**Data Networking and Cable Technician:** The main job responsibility of this job role is to carry out LAN communication cabling using appropriate techniques, tools and cabling standards in a given work site.

**Brief Job Description:** A data networking and cable technician is responsible for laying cables (optical fibre or copper cables) for LAN communication in offices and commercial buildings. The candidate must be capable of carrying out the given tasks as per relevant cabling standards and safety parameters. He/She should have the knowledge of the various kinds of cables and their uses in LAN connectivity. The individual is expected to perform job responsibilities in a given work site with minimum supervision and ensure that customer’s requirements are met.

**Personal Attributes:** Must exhibit good customer service attributes—courteous, solution oriented, polite, reliable, good decision-making skills, etc. Must be focused on quality outcomes. Possess an alert mind and a physically active body. Should be responsible for own outcomes and work in a team.

### Learning Outcomes:

**NOS # ELE/N: (Laying fibre optic and/or copper cables for LAN connection)**

- Customer handling
- Working safely
- Preparing work area for LAN cabling
- Laying cable for LAN communication
- Terminating communication cables
- Testing cable
- Troubleshooting faults
- Post installation activities

**ELE/ N 1001: (Use basic health and safety practices in electrical and electronics work )**

- Health and safety
- Fire safety
- Emergencies, rescue and first-aid procedures

**CSC/ N 1336: (Work effectively in team)**

- Working in a team

Entrepreneurship Module
Expected Job Roles:
Data Networking and Cable Technician

Duration of the Course (in hours)
350 Hrs

Minimum Eligibility Criteria and pre-requisites, if any
ITI / 12th Pass

Professional Knowledge:

**NOS # ELE/N: (Laying fibre optic and/or copper cables for LAN connection)**

KA1. relevant legislation, standards, policies, and procedures followed in the company relevant to own employment and performance conditions
KA2. relevant health and safety requirements applicable in the work place
KA3. own job role and responsibilities and sources for information pertaining to employment terms, entitlements, job role and responsibilities
KA4. reporting structure, inter-dependent functions, lines and procedures in the work area
KA5. how to engage with specialists for support in order to resolve incidents and service requests
KA6. importance of working in clean and safe environment practices and procedures
KA7. relevant people and their responsibilities within the work area
KA8. escalation matrix and procedures for reporting work and employment related issues

KB1. importance of using personal protective equipment and safeguarding self and others from injury
KB2. hazards and risks associated with electronic embedded product designing work
Hazards: faulty electrical components, exposure to live conductors, misuse of tools, etc.
KB3. use and interpret information from resources and job specification documents
Resources: drawings, circuit and physical layouts, charts, customer’s specifications, graphical electronic/electrical symbols and standard soldering regulations
KB4. basic principles of communications systems
Communications systems: transmitter, receiver, communication channel
KB5. different kinds of information transmitted through communication systems
Information: sound, video, picture or data
KB6. basic principles of data communication
KB7. differences between analog and digital signals
KB8. approved techniques used to convert analog to digital and vice versa
KB9. concept of bandwidth and applications
KB10. various kinds of communication methods used over channel
Methods: simplex (one way), duplex (two way), half/semi-duplex (two way but one at a time), broadcast, serial, parallel
KB11. basic concepts of electrical theory and current
KB12. difference between AC and DC
KB13. main category of cables used in communication systems
Category: fibre optic and copper cable
KB14. range of connectors and their uses
KB15. various possible causes of common faults in termination
Common faults: chip, crack, scratch, pitting, concentricity error, etc.
KB16. range of fibre optic cables used in data communication
KB17. characteristics of copper cable and effects on signal
KB18. approved tests used to prevent fibre optic link error
Tests: calibration, launch stability, test lead connection, spatial resolution, elimination of ghosting, fibre
mismatch, minimization of dead zone, etc.

KB19. important features and specifications of fibre optic cable
Features: cladding diameters, secondary and primary coating diameters, refractive index, numerical aperture, attenuation, operational wavelengths

KB20. fundamentals of data networking

KB21. application methods of serial and parallel data networking

KB22. differences between LAN and WAN and their uses

KB23. component parts of cable used in communication systems

KB24. various kinds of optical fibres
Kinds: single-mode, multimode, graded index, stepped index

KB25. interpreting cable labeling and colour coding

KB26. common problems in copper and optical fibre cabling

KB27. troubleshooting techniques used in cabling

KB28. cabling transmission performance and tests requirements

KB29. appropriate installation points for connecting hardware
Installation points: main cross connect, intermediate cross connect, horizontal cross connect, horizontal cabling transition points, consolidation points, telecommunications outlets

KB30. basic topologies used in data networking
Topologies: star, bus, ring, grid, mesh, point to point, branching tree, etc.

KB31. manufacturer’s standard operating procedures (SOP) and their applications

KB32. importance of correct labeling of components and peripherals

KB33. range of IP address and categorization of class

KB34. use of appropriate cable length in LAN connection

KB35. safe disposal of waste materials

KB36. documenting required information of work fully and accurately in appropriate respective service logbook, report sheets, etc.

KB37. SI units and symbols used in measurement
Units: e.g. metre (m), kilogram (kg), second(s), ampere (A), tera (T), giga (G), mega (M), nano (N), etc.

KB38. use of terminology, jargons, unit, graphical representation, signs and symbols related to data communication systems

**ELE/N 1001: Use basic health and safety practices in electrical and electronics work**

KA1. names (and job titles if applicable), and where to find, all the people responsible for health and safety in a workplace.
KA2. names and location of documents that refer to health and safety in the workplace

KB1. meaning of “hazards” and “risks”

KB2. health and safety hazards commonly present in the work environment and related precautions

KB3. possible causes of risk, hazard or accident in the workplace and why risk and/or accidents are possible

KB4. possible causes of risk and accident
Possible causes of risk and accident: physical actions; not following instructions; inattention; sickness and incapacity (such as drunkenness); health hazards (such as untreated injuries and contagious illness); not taking safety precautions

KB5. methods of accident prevention
Methods of accident prevention: training in health and safety procedures; using health and safety procedures; use of equipment and working practices (such as safe carrying procedures); safety notices, advice; instruction from colleagues and supervisors

KB6. safe working practices when working with tools and equipment
KB7. safe working practices while working at various hazardous sites
KB8. where to find all the general health and safety equipment in the workplace
KB9. various dangers associated with the use of electrical equipment
KB10. positive isolation of electrical equipment and system
KB11. safe handling and disposal of hazardous wastes

2.3 IT Hardware

ESDM Courses

Level Code: III  Vertical Name: IT Hardware

Course Code: EL/S/L3/C004 TL/S/L3/C024  Course Name: 2.3.1 Installation Technician – Computing and Peripherals (ESSCI/TSSC)

Objective of the Course:
To train the person who is responsible for installing newly purchased products, troubleshooting system problems and, configuring peripherals such as printers, scanners and network devices

Learning Outcomes:

NOS # ELE/N4601 - Engage with customer
1. Interact with the customer prior to visit
2. Understand customer’s requirements on visit or prior to visit
3. Suggest possible solutions
4. Complete the documentation
5. Achieve productivity and quality as per company’s norms

NOS # ELE/N4602 - Install, configure and setup the system
1. Understand the installation requirement and install the hardware
2. Configure and install the peripherals
3. Check system functionality
4. Set up the software
5. Complete the installation task and report
6. Interact with customer
7. Interact with superior
8. Achieve productivity and quality as per company’s norms

NOS # ELE/N9909 - Coordinate with colleagues and co-workers
1. Interact with supervisor or superior
2. Coordinate with colleagues

Entrepreneurship

Expected Job Roles:
Installation Technician - Computing and Peripherals

Duration of the Course (in hours)

350 hours

Minimum Eligibility Criteria and pre-requisites, if any

10th Pass

Professional Knowledge:

NOS # ELE/N4601 - Engage with customer

KB1. company's products and recurring problems reported
KB2. how to communicate with customers in order to put them at ease
KB3. basic electronics of system hardware
KB4. hardware maintenance
KB5. functions of electrical and mechanical parts/ modules
KB6. behavioural aspects and etiquette to be followed at customer's premises
KB7. precautions to be taken while handling field calls and dealing with customers
KB8. Relevant reference sheets, manuals and documents to carry in the field

NOS # ELE/N4602 - Install, configure and setup the system

KA6. company's line of business and product portfolio

KB1. basic electronics involved in the hardware
KB2. different types of IT hardware products and functionalities
KB3. functions of electrical and mechanical parts/ modules
KB4. typical customer profile
KB5. company's portfolio of products and that of competitors
KB6. installation procedures given in the manuals
KB7. different types of equipment assembled in a pack (one system)
KB8. different types of peripherals and their standard installation procedure
KB9. specification and the procedures to be followed for setting up the system
KB10. voltage and power requirement for different hardware devices
KB11. memory, input, output and storage devices
KB12. different modules in system such as SMPS, drivers, hard disk, battery, mother board
KB13. different module in the peripheral and their functions
KB14. how to operate the system and other hardware peripherals

NOS # ELE/N9909 - Coordinate with colleagues and co-workers

KA1. company's policies on: incentives, delivery standards, and personnel management
KA2. importance of the individual's role in the workflow
KA3. reporting structure

KB1. how to communicate effectively
KB2. how to build team coordination
Professional Skill:

i. Interpersonal skills
ii. Communication skills
iii. Behavioural skills
iv. Reading, writing and computer skills
v. Teamwork and multitasking
vi. Documentation Skills
vii. Reflective thinking
viii. Critical Thinking
ix. Decision Making

| Course Code: | EL/S/L3/C014  
TL/S/L3/C031 | Course Name: | 2.3.4 CCTV Installation technician (ESSCI/TSSC) |

Objective of the Course:

**CCTV Installation Technician**: Also called ‘CCTV Installer’, the CCTV installation Technician provides after sale support services to customers, typically, at their premises.

**Brief Job Description**: The individual at work is responsible for installing the CCTV system in the customer premises. The individual understand the customer and site requirement, installs the camera and integrates the hardware for effective CCTV surveillance system functioning.

**Personal Attributes**: The job requires the individual to have: ability to build interpersonal relationships, patience, listening skills and critical thinking. The individual must be willing to travel to client premises in order to install equipment at different locations.

Learning Outcomes:

**NOS # ELE/N4609- Visit site and understand customer requirement**

1. Interact with the customer
2. Understand their requirements
3. Visit the site
4. Understand the site condition and requirement
5. Suggest possible solutions
6. Decide on the CCTV system to be installed
7. Achieve productivity and quality standards

**ELE/N4610 Install the CCTV camera**

1. Procure the hardware required for installation
2. Test the hardware before installation
3. Connect the cables
4. Install and setup the camera
5. Use appropriate tools and equipments for installation
6. Achieve productivity and quality standards

**ELE/N4611 Setup the CCTV surveillance system**

1. Connect CCTV camera and DVR with system
2. Set up CCTV system
3. Ensure system functioning, perform demo
4. Complete installation, report
5. Interact with customer
6. Interact with Supervisor
7. Achieve productivity and quality as per company's norms

**NOS # ELE/N9909 - Coordinate with colleagues and co-workers**

1. Interact with supervisor or superior
2. Report potential areas of disruptions to work process
3. Spot process disruptions and delays
4. Coordinate with colleagues

**Expected Job Roles:**

CCTV Installation technician

**Duration of the Course (in hours)**

350 hours

**Minimum Eligibility Criteria and pre-requisites, if any**

10th Passed

**Professional Knowledge:**

**NOS # ELE/N4609- Visit site and understand customer requirement**

ESDM Courses

Level Code: III  
Vertical Name: IT Hardware

Course Code: EL/S/L3/C015  
Course Name: 2.3.5 Access Controls Installation Technician (ESSCI)

Objective of the Course:

Access Controls Installation Technician: Also called ‘Access Control Device Installer’, the Access Control Installation Technician provides after sale support services for access control devices and systems such as point of sale scanners, finger print or iris scan.

Brief Job Description: The individual at work is responsible for installing the access control system at the customer’s premises. The individual undertakes site assessment, installs the hardware and integrates the system to meet customer’s requirement.

Personal Attributes: The job requires the individual to have: ability to build interpersonal relationships, patience, listening skills and critical thinking. The individual must be willing to travel to client premises in order to install equipment at different locations.

Learning Outcomes:

NOS #ELE/N4616 - Engage with customer for installation

1. Interact with customer to assess their requirement
2. Visit site to understand infrastructure required
3. Suggest possible solutions

ELE/N4617 Install and setup the access control system both Hardware and Software

1. Procure the hardware required for installation
2. Test the access control hardware before installation
3. Install the wiring
4. Install and setup the access controls
5. Setup the system
6. Use appropriate tools and equipment for installation

ELE/N9909 Coordinate with colleagues and co-workers

1. Interact with supervisor or superior
2. Coordinate with colleagues

Expected Job Roles:

Access Controls Installation Technician
Duration of the Course (in hours)  
350 hours

Minimum Eligibility Criteria and pre-requisites, if any  
10th Passed

Professional Knowledge:

**NOS # ELE/N4616 - Engage with customer for installation**

KA1. company’s policies on: customer care, warranties, products  
KA2. company’s code of conduct  
KA3. organization culture and typical customer profile  
KA4. company’s reporting structure  
KA5. company’s documentation policy  
KA6. company’s service level agreements and policies

KB1. access control device system and their applications  
KB2. basic concepts operating different types of scanners  
KB3. field and site assessment for access control equipment installation  
KB4. design for access control system installation  
KB5. different types of access control equipment in the market, their specifications and price  
KB6. different types of data information storage device and their purpose  
KB7. safety precautions to be taken while installing  
KB8. reference sheets, manuals and documents to carry in the field

**NOS# ELE/N4617Install and setup the access control system**

KB1. basic electronics involved in the hardware  
KB2. basic electrical and wiring techniques  
KB3. different types of access control products and functionalities  
KB4. functions of electrical and mechanical parts/ modules  
KB5. typical customer profile  
KB6. dismantling and assembling of hardware equipment  
KB7. access control system concepts such as for master controller, card reader, door control units, smart-hub, etc.  
KB8. company’s portfolio of products and that of competitors  
KB9. installation procedures given in the manuals  
KB10. specification and the procedures to be followed for setting up the system  
KB11. different type of cables used for data transmission and power transmission  
KB12. power requirement of hardware  
KB13. different types of access controls hardware available in the market  
KB14. software requirement associated with access controls  
KB15. computing system and operating system requirements for access control system installation  
KB16. voltage and power requirement for different hardware devices  
KB17. how to operate the system and other hardware  
KB18. all safety rules, policies and procedures  
KB19. quality standards to be followed
NOS # ELE/N9909 - Coordinate with colleagues and co-workers

KA1. company’s policies on: incentives, delivery standards, and personnel management
KA2. importance of the individual’s role in the workflow
KA3. reporting structure

KB1. how to communicate effectively
KB2. how to build team coordination

Entrepreneurship Module

Professional Skill:

i. Interpersonal skills
ii. Communication skills
iii. Behavioural skills
iv. Reading, writing and computer skills
v. Hardware and electrical skills
vi. Reflective thinking
vii. Critical Thinking
viii. Decision Making
ix. Using tools and equipment

Core Skill:

1. Reading and writing skills
2. Teamwork and multitasking

**Objective of the Course:**

**Brief Job Description:** Understanding the customer’s requirements for installing the various types of electronic security systems and configuring the system for security functions

---

### Learning Outcomes:

**NOS # ELE/N4616 Engage with customer for installation**
- Interact with the customer
- Understand their requirements
- Visit the site
- Understand the site condition and requirement
- Suggest possible solutions
- Decide on the system to be installed
- Achieve productivity and quality standards

**NOS # ELE/N4617 Install and setup the access control system**
- Procure the hardware required for installation
- Test the access control hardware before installation
- Install the wiring
- Install and setup the access controls
- Setup the system
- Use appropriate tools and equipment for installation

**NOS # ELE/N4610IDS Install Intrusion Detection System**
- Procure the hardware required for installation.
- Test the hardware before installation.
- Connect the cables.
- Install and setup the IDS.
- Use appropriate tools and equipments for installation.
- Achieve productivity and quality standards.

**NOS # ELE/N4611IDS Setup IDS**
- Procure the hardware required for installation.
- Test the hardware before installation.
- Connect the cables.
- Install and setup the IDS.
- Use appropriate tools and equipments for installation.
- Achieve productivity and quality standards.

**NOS # ELE/N4610 Install CCTV camera**
- Procure the hardware required for installation
- Test the hardware before installation
- Connect the cables
- Install and setup the camera
- Use appropriate tools and equipments for installation
- Achieve productivity and quality standards

**NOS# ELE/N4611 Setup CCTV surveillance system**
- Connect CCTV camera and DVR with the system
- Setup the CCTV system
- Ensure system functioning and perform a demo
- Complete the installation task and report
- Interact with customer
- Interact with superior
- Achieve productivity and quality as per company’s norms

**NOS# ELE/N4610FAS Install FAS detector**
- Procure the hardware required for installation.
- Test the hardware before installation.
- Connect the cables.
- Install and setup the detectors, devices & Control Panels.
- Use appropriate tools and equipments for installation.
- Achieve productivity and quality standards.

**NOS #ELE/N4611FAS Setup FAS**
- Connect FAS detectors and devices with the Fire Alarm Control Panel.
- Setup the Fire Alarm System.
- Ensure system functioning and perform a demo.
- Complete the installation task and report.
- Interact with customer.
- Interact with superior.
- Achieve productivity and quality as per company’s norms.

**NOS # ELE/N4610 Install VDP Outdoor Unit and lock**
- Procure the hardware required for installation
- Test the hardware before installation
- Connect the cables
- Install and setup the indoor and outdoor units.
- Use appropriate tools and equipments for installation
- Achieve productivity and quality standards

**NOS # ELE/N4611 Setup VDP Indoor system**
- Connect outdoor units and lock with the Indoor unit
- Setup the Video Door Phone system
- Ensure system functioning and perform a demo
- Complete the installation task and report
- Interact with customer
- Interact with superior
- Achieve productivity and quality as per company’s norms

**NOS # ELE/N0009 Coordinate with colleagues**
• Interact with supervisor or superior
• Coordinate with colleagues

Expected Job Roles:
Installation technician of Electronic Security Systems

Duration of the Course (in hours)
350 Hrs

Minimum Eligibility Criteria and pre-requisites, if any
ITI / 12th Pass.

Professional Knowledge:

NOS # ELE/N4616 Engage with customer for installation
KA1. company’s policies on: customer care, warranties, products
KA2. company’s code of conduct
KA3. organisation culture and typical customer profile
KA4. company’s reporting structure
KA5. company’s documentation policy
KA6. company’s service level agreements and policies
KB1. Installation requirement in terms of equipment, system, tools, applications appropriate for a particular site
KB2. preparation of field and site for installation
KB3. design criteria for installation
KB4. location criteria for installation
KB5. different types of equipment’s in the market, their specifications and prices
KB6. different types of and associated systems
KB7. different types of and their purposes
KB8. tools and equipment to carry for installations
KB9. precautions to be taken while handling field calls and dealing with customers
KB10. relevant reference sheets, manuals and documents to carry in the field

NOS # ELE/N4617 Install and setup the access control system
KA1. company’s policies on: incentives, delivery standards, and personnel management
KA2. company’s sales and after sales support policy
KA3. importance of the individual’s role in the workflow
KA4. reporting structure
KA5. company’s policy on product’s warranty and other terms and conditions
KA6. company’s line of business and product portfolio
KA7. company’s customer support and service policy
KB1. basic electronics involved in the hardware
KB2. basic electrical and wiring techniques
KB3. different types of access control products and functionalities
KB4. functions of electrical and mechanical parts/ modules
KB5. typical customer profile
KB6. dismantling and assembling of hardware equipment
KB7. access control system concepts such as for master controller, card reader, door control units, smart-hub, etc.
KB8. company’s portfolio of products and that of competitors
KB9. installation procedures given in the manuals
KB10. specification and the procedures to be followed for setting up the system
KB11. different type of cables used for data transmission and power transmission
KB12. power requirement of hardware
KB13. different types of access controls hardware available in the market
KB14. software requirement associated with access controls
KB15. computing system and operating system requirements for access control system installation
KB16. voltage and power requirement for different hardware devices
KB17. how to operate the system and other hardware
KB18. all safety rules, policies and procedures
KB19. quality standards to be followed

NOS # ELE/N4610IDS Install Intrusion Detection System
KA1. company’s policies on: incentives, delivery standards, and personnel management.
KA2. company’s sales and after sales support policy.
KA3. importance of the individual’s role in the workflow.
KA4. reporting structure.
KA5. company’s policy on product’s warranty and other terms and conditions.
KA6. company’s line of business and product portfolio.
KA7. company’s customer support and service policy.
KB1. basic electronics involved in the hardware.
KB2. basic electrical and wiring.
KB3. different types of electronic Intrusion Detection and Alarm products and their functionalities.
KB4. functions of electrical and mechanical parts or modules.
KB5. typical customer profile.
KB6. elements of IDS systems such as IDS sensors, IDS panel.
KB7. company’s portfolio of products and that of competitors.
KB8. installation procedures given in the manuals.
KB9. specification and the procedures to be followed for setting up the system.
KB10. different type of cables used for data transmission and power transmission for a wired system.
KB11. power requirement of different IDS related equipment.
KB12. different types of IDS sensors available in the market.
KB13. IDS sensor specifications such as sensitivity, threshold, etc.
KB14. controls of different options in IDS sensors such as NO, NC Sensors.
KB15. voltage and power requirement for different hardware devices.
KB16. how to operate the system and other hardware.
KB17. safety rules, policies and procedures
KB18. quality standards to be followed

NOS # ELE/N4611IDS Setup IDS
KA1. company’s policies on: incentives, delivery standards, and personnel management.
KA2. company’s sales and after sales support policy.
KA3. importance of the individual’s role in the workflow.
KA4. reporting structure.
KA5. company’s policy on product’s warranty and other terms and conditions.
KA6. company’s line of business and product portfolio.
KB1. different types of electronic IDS products and functionalities.
KB2. functions of electrical and mechanical parts/ modules.
KB3. specification and the procedures to be followed for setting up the system.
KB4. different type of cables used for data transmission and power transmission.
KB5. different types IDS related equipment, different types of IDS Sensor, and Panels available in the market.
KB6. IDS Sensor and Panels Specifications, such as, Sensitivity, Area of Coverage, etc.
KB7. controls of different options in IDS Panels.
KB8. voltage and power requirement for different hardware devices.
KB9. integration of hardware to setup the system.
KB10. parameters and specification for different types of system integration.
KB11. accessing IDS from remote locations.
KB12. IDS monitoring and control.
KB13. technology and networking principles.
KB14. basics of wireless Technology.
KB15. controls in IDS Panel and their usage.
KB16. how to operate the system and other hardware. KB17. safety rules, policies and procedures.
KB18. quality standards to be followed.

NOS # ELE/N4610 Install CCTV camera

KA1. company’s policies on: incentives, delivery standards, and personnel management
KA2. company’s sales and after sales support policy
KA3. importance of the individual’s role in the workflow
KA4. reporting structure
KA5. company’s policy on product’s warranty and other terms and conditions
KA6. company’s line of business and product portfolio
KA7. company’s customer support and service policy
KB1. basic electronics involved in the hardware
KB2. basic electrical and wiring
KB3. different types of electronic surveillance products and functionalities
KB4. functions of electrical and mechanical parts or modules
KB5. typical customer profile
KB6. elements of CCTV systems such as camera, DVR, monitor
KB7. company’s portfolio of products and that of competitors
KB8. installation procedures given in the manuals
KB9. specification and the procedures to be followed for setting up the system
KB10. different type of cables used for data transmission and power transmission
KB11. power requirement of different CCTV related equipment
KB12. video recording of footage – analog and digital
KB13. different types of camera available in the market
KB14. camera specifications such as focus, lens type, zoom
KB15. controls of different options in camera such as rotation, speed of movement in pan / tilt camera
KB16. voltage and power requirement for different hardware
KB17. how to operate the system and other hardware
KB18. safety rules, policies and procedures
KB19. quality standards to be followed

NOS # ELE/N4611 Setup CCTV surveillance system

KA1. company’s policies on: incentives, delivery standards, and personnel management
KA2. company’s sales and after sales support policy
KA3. importance of the individual’s role in the workflow
KA4. reporting structure
KA5. company’s policy on product’s warranty and other terms and conditions
KA6. company’s line of business and product portfolio
KB1. different types of electronic surveillance products and functionalities
KB2. functions of electrical and mechanical parts/ modules
KB3. specification and the procedures to be followed for setting up the system
KB4. different type of cables used for data transmission and power transmission
KB5. power requirement of different CCTV related equipment
KB6. video recording of footage – analog and digital
KB7. different types of camera available in the market
KB8. camera specifications such as focus, lens type, zoom
KB9. controls of different options in camera such as rotation, speed of movement in pan / tilt camera
KB10. voltage and power requirement for different hardware devices
KB11. integration of hardware to setup the system
KB12. parameters and specification for different types of system integration
KB13. accessing image from remote locations
KB14. CCTV monitoring and control over IP network / Internet
KB15. IP technology and networking principles
KB16. basics of networking
KB17. video recording technologies
KB18. controls in digital video recorder and their usage
KB19. how to operate the system and other hardware
KB20. safety rules, policies and procedures
KB21. quality standards to be followed

NOS # ELE/N4610FAS Install FAS detector

KA1. company’s policies on: incentives, delivery standards, and personnel management.
KA2. company’s sales and after sales support policy.
KA3. importance of the individual’s role in the workflow.
KA4. reporting structure.
KA5. company’s policy on product’s warranty and other terms and conditions.
KA6. company’s line of business and product portfolio.
KA7. company’s customer support and service policy.
KB1. basic electronics involved in the FAS hardware.
KB2. basic electrical and wiring.
KB3. Functioning of Fire Alarm System.
KB4. different types of electronic detection equipment and their functionalities.
KB6. Elements of FAS systems such as Detector, Fire Panel, Sounder, Control Module, Monitor Module, etc.
KB7. company’s portfolio of products and that of competitors. KB8. installation procedures given in the manuals.
KB9. specification and the procedures to be followed for setting up the system. KB10. different type of cables used for FAS.
KB11. power requirement of FAS Equipment.
KB12. different types of detectors and devices available in the market.
KB13. detector specifications such as smoke, heat, Rate of-rise or flame detector.
KB14. Installation of detectors & devices and assigning addresses to them.
KB15. how to operate hardware and the complete system.
KB16. safety rules, policies and procedures.
KB17. Various Quality Standards and Certifications, such as, UL, FM, NFPA, etc.
KB18. Integration with other Systems

NOS # ELE/N4611FAS Setup FAS

KB11. power requirement of FAS Equipment.
KB12. different types of detectors and devices available in the market.
KB13. detector specifications such as smoke, heat, Rate of-rise or flame detector.
KB14. Installation of detectors & devices and assigning addresses to them.
KB15. how to operate hardware and the complete system.
KB16. safety rules, policies and procedures.
KB17. Various Quality Standards and Certifications, such as, UL, FM, NFPA, etc.
KB18. Integration with other Systems.

**NOS # ELE/N4610 Install VDP Outdoor Unit and lock**

KA1. company’s policies on: incentives, delivery standards, and personnel management
KA2. company’s sales and after sales support policy
KA3. importance of the individual’s role in the workflow
KA4. reporting structure
KA5. company’s policy on product’s warranty and other terms and conditions
KA6. company’s line of business and product portfolio
KA7. company’s customer support and service policy
KB1. basic electronics involved in the hardware
KB2. basic electrical and wiring
KB3. different types of electronic surveillance products and functionalities
KB4. functions of electrical and mechanical parts or modules
KB5. typical customer profile
KB6. Elements of VDP systems such as indoor units, outdoor units, locks
KB7. company’s portfolio of products and that of competitors KB8. installation procedures given in the manuals
KB9. specification and the procedures to be followed for setting up the system KB10. different type of cables used for data transmission and power transmission KB11. power requirement of different VDP related equipment
KB12. VDP system— coloured and monochrome
KB13. different types of VDP systems available in the market
KB14. VDP specifications such number of indoor systems and outdoor systems
KB15. options in connection of locks, number of indoor
KB16. voltage and power requirement for different hardware devices
KB17. how to operate the system and other hardware
KB18. safety rules, policies and procedures
KB19. quality standards to be followed

**NOS # ELE/N4611 Setup VDP Indoor system**

KA1. company’s policies on: incentives, delivery standards, and personnel management
KA2. company’s sales and after sales support policy
KA3. importance of the individual’s role in the workflow
KA4. reporting structure
KA5. company’s policy on product’s warranty and other terms and conditions
KA6. company’s line of business and product portfolio
KB1. different types of electronic surveillance products and functionalities
KB2. functions of electrical and mechanical parts/ modules
KB3. specification and the procedures to be followed for setting up the system KB4. different type of cables used for data transmission and power transmission KB5. power requirement of different VDP related equipment
KB6. VDP system – colour or monochrome system.
KB7. different types of VDP systems available in the market
KB8. specifications such as light condition, vandal proof, IR
KB9. different options in outdoor units like IR, hard plastic, tamper proof
KB10. voltage and power requirement for different hardware devices
KB11. integration of hardware to setup the system
KB12. parameters and specification for different types of system integration
KB13. accessing input or output from remote locations
KB14. VDP and control from indoor unit
KB15. Technologies used in VDP
KB16. how to operate the system and other hardware
KB17. safety rules, policies and procedures
KB18. quality standards to be followed

**NOS # ELE/N0009 Coordinate with colleagues**

KA1. company’s policies on: incentives, delivery standards, and personnel management
KA2. importance of the individual’s role in the workflow
KA3. reporting structure
KB1. how to communicate effectively
KB2. how to build team coordination

**Professional Skill:**

- xxiv. Interpersonal skills
- xxv. Behavioural skills
- xxvi. Reflective thinking
- xxvii. Critical Thinking
- xxviii. Decision Making
- xxix. Using tools and machines

**Core Skill:**

- 13. Using tools and machines
- 14. Reading, writing and computer skills
- 15. Teamwork and multitasking
- 16. Communication skills

2.4 Solar Electronics

ESDM Courses

Level Code: L4  Vertical Name: Solar Electronics

Course Code: EL/S/L4/C007  TL/S/L4/C025  Course Name: 2.4.1 Solar Panel Installation Technician (ESSCI/TSSC)

Objective of the Course:
To train the person, who checks the installation site, understands the layout requirement as per design, assesses precautionary measures to be taken, installs the solar panel as per customer’s requirement and ensures effective functioning of the system post installation.

Learning Outcomes:

NOS # ELE/N5901 Check site conditions, collect tools and raw materials

1. Understand the work requirement
2. Check out and assess the site condition
3. Understand the installation requirement
4. Collect materials required for installation
5. Ensure quality material usage and appropriate handling mechanism

NOS # ELE/N5902 Install the solar panel

1. Understand the installation and material usage procedure
2. Assess mounting requirements
3. Install the solar panel
4. Connect the system and check for functioning
5. Report and document completion of work
6. Follow quality and safety procedures

NOS # ELE/N9952 Coordinate colleagues at work

1. Interact with supervisor or superior
2. Coordinate with colleagues

NOS # ELE/N9953 Ensure safety at workplace

Follow standard safety procedures while handling an equipment

Participate in company’s safety drills and workshops
Expected Job Roles:

| Solar Panel Installation Technician |

Duration of the Course (in hours)

| 350 hours |

Minimum Eligibility Criteria and pre-requisites, if any

| 12th passed |

Professional Knowledge:

Text Books: NA

Reference Books: NA
ESDM Courses

Level Code: 4  Vertical Name: Solar Electronics

Course Code: EL/S/L4/C020  Course Name: 2.4.2 Tech Support (ESSCI)

Objective of the Course:

**Tech Support:** Responsible for collecting Customer requirements by visiting the site and suggest for suitable Solar and LED products model. Also suggest new design to Design team as per Customer’s new requirement.

**Brief Job Description:** The individual at work evaluates the installation site, helps in designs the Solar system and support in Design, plans arranges for materials and ensures smooth installation process.

**Personal Attributes:** The individual must have: attention to detail, good eye sight, logical thinking, analytical ability and good interpersonal skills.

Learning Outcomes:

**NOS # ELE/N5907 Customer interaction**

1. Understand the work requirement
2. Engage with customers to understand their requirement
3. Visit and evaluate the site for installation
4. Suggest suitable model of Solar and LED system
5. Support to design new model is the Customer
6. Collect the required material for installation
7. Support in Install the Solar and LED products as per Customer requirement
8. Ensure quality, standards and regulatory requirement are adhered

**ELE/N5601 Develop product and market understanding**

a. Understand the work requirement
b. Understand about the product
c. Study and research about the market
d. Coordinate with channel partners
e. Initiate meeting with the prospective client
f. Interact and understand the client requirement
g. Record the client details and document the visit
h. Achieve productivity targets set by the company

**ELE/N5602 Sell the products and services**

a. Offer possible solutions to customers
b. Close the sales  
c. Coordinate with channel partners and offer suggestions to improve sales  
d. Offer proper documentation and understand post purchase requirements  
e. Assist client with installation service  
f. Maintain relationship with client  
g. Achieve productivity targets set by the company  

**NOS # ELE/N9953 Ensure safety at workplace**

1. Follow standard safety procedures while handling an equipment  
2. Participate in company’s safety drills and workshops  

**Entrepreneurship Module**

**Expected Job Roles:**

**Solar & LED Technician**

**Duration of the Course**  
(in hours)  
350 Hrs

**Minimum Eligibility**  
Criteria and pre-requisites, if any  
ITI / Diploma / Graduates

**Professional Knowledge:**

vii. Interpersonal skills

</tr>
</tbody>
</table>

**Objective of the Course:**

This Course has been designed to provide an introduction to the use of Solar Appliances, their assembly, repair and maintenance, and installation.

**Learning Outcomes:**

At the end of the course, the learners will be able:

- To assemble the solar lantern and emergency light
- To install solar panels and solar systems
- To know the detailed operation of solar appliances
- Repair and maintenance of solar lanterns, solar panels, and emergency lights.

**Expected Job Roles:**

This course will contribute to the job potential in the following fields:

- Repairing and service centres
- Solar equipment assembling industries
- Different Government Agencies responsible for dissemination/installation of solar equipment in UREDA, Uttarakhand
- Different Electronics Industries

**Duration of the Course (in hours):**

200 Hrs.

**Minimum Eligibility Criteria and pre-requisites, if any:**

8th Pass having Knowledge of Basic Science
Professional Knowledge:
By completing the course the students is supposed to have the following profession knowledge:
- Basics of Electronics
- Working principle and operation of emergency light, solar lantern, battery and solar panels
- Maintenance of Solar appliances

Professional Skill:
- Trouble shooting of Emergency light, Solar lantern
- Preventive and corrective maintenance of solar appliances
- Charging/Discharging and reconditioning of battery

Core Skill:
The following core Skill is to be supposed for the learners
- Basics of Electronics Principles
- Different Electronic and Electrical active and passive components
- Idea of Electronic Circuits
- Application and operation of different Electronic Equipments as multimeter, CRO etc.
- Core efficiencies in soldering practices and use of different related tools
- Knowledge of solar panels and battery
- Preventive and corrective maintenance of related appliances

2.5 PCB Assembly

ESDM Courses

Level Code: L4  Vertical Name: PCB Assembly

Course Code: EL/S/L4/C008  Course Name: 2.5.1 Pick and Place Assembly Operator (ESSCI/TSSC)

Course Code: TL/S/L4/C026

Objective of the Course:

To train the person, who programs, operates and maintains the automated pick-and-place machine for placing different types of components on the surface of PCBs for soldering.

Learning Outcomes:

**NOS # ELE/N5102 - Operate pick-and-place machine**

1. Program and load the pick and place machine
2. Load components and operate the machine for assembling on PCBs
3. Check visually and ensure after assembly cycle is complete
4. Undertake preventive maintenance on the machine
5. Achieve productivity and quality standards

**NOS # ELE/N9919 - Work with superiors and colleagues**

1. Interact with supervisor or superior
2. Coordinate with colleagues

**NOS # ELE/N9920 - Follow safety procedures**

1. Understand potential sources of accidents
2. Use safety gear to avoid accidents
3. Understand the safety procedures followed by the company
Expected Job Roles:

Pick and Place Operator

Duration of the Course (in hours) 350 hours

Minimum Eligibility Criteria and pre-requisites, if any 12th Passed

Professional Knowledge:

**NOS # ELE/N5102 - Operate pick-and-place machine**
- KB1. basic electronics and component identification
- KB2. pick-and-place machine functioning and controls
- KB3. basic programming and loading
- KB4. setting up, loading pick-and-place machine
- KB5. techniques of cleaning stencil
- KB6. colour codes and polarity of components
- KB7. regulation of operating speed and temperature
- KB8. LEDs and special mounting technique, junction temperature, types of assembly, metal core PCB, spike correction
- KB9. operation of LED mounting machine
- KB10. Electro-static discharge (ESD) precautions
- KB11. manual soldering and rework of SMT components
- KB12. PCB design basics
- KB13. commonly occurring machine defects

**NOS # ELE/N9917 - Interact with superiors and colleagues**
- KA1. company’s policies on: incentives, delivery standards, and personnel management
- KA2. work flow involved in company’s process
- KA3. importance of the individual’s role in the workflow
- KA4. reporting structure

- KB1. how to communicate effectively
- KB2. how to build team coordination

**NOS # ELE/N9918 - Follow safety standards**
KB1. how to maintain the work area safe and secure
KB2. how to handle hazardous material
KB3. how to follow safety procedures while operating hazardous tools and equipment
KB4. emergency procedures to be followed such as fire accidents and fire safety education
KB5. how to use machines and tools without causing bodily harm
KB6. first aid execution
KB7. disposal of hazardous chemicals, tools and materials by following prescribed environmental norms or as per company policy

Professional Skill:

i. Communication skills
ii. Reading, writing and computer skills
iii. Teamwork and multitasking
iv. Reflective thinking
v. Critical Thinking
vi. Decision Making

Core Skill:

1. Operating Machines and Material Handling
2. Using Tools and Machines
3. Problem Solving & trouble shooting
4. Arithmetic and Geometry Skills
5. Handling Safety Equipment

### Objective of the Course:

To train the person who is responsible for wiring all components present within the panel as per specifications provided by the design engineering team.

### Learning Outcomes:

**NOS # ELE/N7302 Wire control panel:**

1. Understand work requirement from the supervisor
2. Wire the control panel
3. Report problems to supervisor
4. Achieve productivity, quality and safety standards as per company’s norms

**NOS # ELE/N9962 - Interact with other employees**

1. Interact with supervisor or superior
2. Coordinate with colleagues

**ELE/N9963 Maintain safe work surroundings**

1. Follow standard safety procedures of the company
2. Participate in company’s safety and fire drills
3. Maintain good posture at work for long term health
Expected Job Roles:

Wireman Control panel

Duration of the Course (in hours)

200 hours

Minimum Eligibility Criteria and pre-requisites, if any

8th Pass

Professional Knowledge:

NOS # ELE/N7302 - wire control panel

KA1. company’s policies on: incentives, delivery standards and personnel management
KA2. reporting and documentation processes
KA3. importance of the individual’s role in the workflow
KA4. reporting structure
KB1. electro-mechanical assembly and wiring instructions
KB2. hazards associated with panel assembly and wiring and how to avoid them
KB3. general principles of wiring and assembly
KB4. insulation stripping, securing of cables and wires, cable routing, cable forming or bending, colour coding wires and cables
KB5. types of cables such as single and multi-core fibre optic cables, etc.
KB6. types of components and sub-assemblies used in the panel assembly process
KB7. preparations and precautions to be taken on the components and the panel before assembly process
KB8. basics of automation and electro mechanical control systems
KB9. regulations applicable during selection of wiring/cabling
KB10. methods of attaching labels, warning signs on the panel
KB11. operation of PLCs, relays, contactors, circuit breakers, solenoids, actuators, controllers, etc.
KB12. motors, generators, starters and their controls
KB13. safety norms in handling electrical/electronic components and electrostatic discharge
KB14. customer safety requirements for all projects being implemented and other applicable safety standards
KB15. ISO standards and procedures applicable for assembly activities
KB16. fundamentals of electricity such as Ohms law, difference between AC and DC, series and parallel connections  
KB17. components such as diode, transformer, LED, transistor, capacitor, resistor, inductor, thermistor, IC  
KB18. how to read values, colour coding, polarity, orientation, tolerance  
KB19. specific safety precautions while working in an electronic assembly unit  
KB20. protective gear such as goggles, gloves, rubber shoes, etc.  
KB21. selection and maintenance of various tools used during the assembly process  
KB22. frequently occurring errors, causes and preventive measures  
KB23. work place norms such as 5S and Kaizen

**ELE/N9962interact with co-workers**  
KA2. importance of the individual’s role in the workflow  
KA3. reporting structure  
KB1. how to communicate effectively  
KB2. how to build team coordination

**ELE/N9963Maintain safe work surrounding**  
KA2. company occupational safety and health policy followed  
KA3. company emergency evacuation procedure  
KA4. company’s medical policy  
KB1. how to maintain the work area safe and secure  
KB2. how to handle hazardous materials, tools and equipment  
KB3. Emergency procedures to be followed such as fire accidents, etc.  
KB4. long term value of good posture and use of appropriate handling equipment

**Professional Skill:**

1. Interpersonal skills  
2. Communication skills  
3. Behavioural skills  
4. Reading, writing and computer skills  
5. Teamwork and multitasking  
6. Documentation Skills  
7. Reflective thinking  
8. Critical Thinking  
9. Decision Making
Core Skill:

1. Electro-mechanical assembling skills
2. Using tools and machines
3. Interpersonal skills
4. Analytical and reflective skills

Objective of the Course:
This course has been designed to provide knowledge of repair and maintenance of Power Supply, Inverter and UPS. The participant will be able to troubleshoot problems of CVT, Inverter and UPS.

Learning Outcomes:
At the end of the course the participants will be having knowledge of:
- Electrical and Electronics Component
- UPS parts and repair
- Inverter, CVT and its operation, parts and installation
- Tools and Equipment used in Repair and Maintenance of Inverter, UPS etc.
- Troubleshooting Techniques

Expected Job Roles:
Inverter Repair Technician, UPS Repair Technician, Power Supplies Repair Technician

Duration of the Course (in hours) 350

Minimum Eligibility Criteria and pre-requisites, if any 10th Pass/ITI

102
### Professional Knowledge:

The individual on the job needs to know and understand:

<table>
<thead>
<tr>

<td></td>
</tr>
</tbody>
</table>
**Professional Skill:**

The individual on the job needs to know and understand:

**Electrical and Electronic Component Identification and Use Skills**

PS1. Understand use of Electrical Component such as cable, switches, transformers etc.
PS2. Understand use of Electronics Component such as Diodes, Transistors, ICs etc.
PS3. Use of Test and Measurement Equipment

**Soldering skills**

PS4. Understand Soldering Requirements
PS5. Operation of Equipment required for Soldering
PS6. Use of Desoldering Pump

**Stabilizer and CVT Repairing Skill**

PS7. Working principle, types of stabilizer
PS8. Transformer employed in stabilizer, multiwinding/multitaped transformer
PS9. Understanding General Circuit diagram of CVT, Working principle of CVT
PS10. Finding fault in Stabilizer and CVT
PS11. Replace faulty components in Stabilizer and CVT

**Inverter and UPS Repairing Skill**

PS12. Working principle of Inverter and UPS
PS13. Working Principle of Rectifier
PS14. Finding fault in Inverter and UPS
Replace faulty components in Inverter and UPS

**Troubleshooting Skills**

PS15. How to approach a defect
PS16. Make use of standard OEM specified troubleshooting steps
PS17. Interpret intermediate results and progress fault rectification accordingly
PS18. Utilize appropriate tools to rectify faults
Core Skill:
The individual on the job needs to know and understand how to:

Reading skills
- CS1. Read and understand technical manuals, work orders and reports
- CS2. Read and understand organizational health and safety instructions

Writing Skills
- CS3. Fill up record sheets clearly, concisely and accurately as per company procedures

Communication Skills
- CS4. Clearly communicate relevant information to supervisors
- CS5. Respond appropriately to queries
- CS6. Communicate with customer/customer facing teams to understand handset performance issues
- CS7. Communicate in the local language
- CS8. Convey proposed solution to the customers

Time Management Skills
- CS9. Prioritize and execute tasks in a high-pressure environment
- CS10. Use and maintain resources efficiently and effectively

Analytical Skills
- CS11. Analyse (and understand) customer complaints
- CS12. Interpret reports, readings and numerical data
- CS13. Keep up to date with new technology and performance issues

Other Skills
- CS14. Create and maintain effective working relationships and team environment through collaboration
- CS15. Take initiatives and progressively assume increased responsibilities
- CS16. Share knowledge with other team members and colleagues

Recommended Hardware:

For a batch size of 50Nos

1. Resistance of different value and Wattage ratings   20 nos. each
2. Capacitor of different types                   20 nos. each
3. Transistors – BC 546, BC 547, SL 100, 2N3055  10 nos. each
4. Rectifier Diode                              20 Nos.
5. Zener Diode of different values               10 nos. each
6. Step down Transformers of different ratings   04 nos. each
7. LED of different colours                      20 nos. each
8. 3 Pin Voltage Regulators                     05 nos. each
9. Logic GATE ICs                                10 nos. each
10. Tool Kit                                     05 sets
11. Digital Multimeter                           05 nos.
12. CRO                                          02 nos.
13. Soldering Iron                               05 nos.
14. Solder Wire                                  250 gms
15. Soldering Flux                               100 gms.
16. Microwatt Soldering Iron                     02 nos
17. Desoldering Station                          02 nos.
18. Desoldering Pump                             05 nos.
19. Inverter                                     2 set
20. UPS                                         2 set
21. Stabilizer/CVT                               5 nos
22. Battery Charger                             1 No.

<tbody>
<tr>
<td>Course Code:</td>
<td>EL/S/L4/C019</td>
<td>Course Name:</td>
<td>2.7.1 Security System Installer (ESSCI)</td>
</tr>
</tbody>
</table>

#### Objective of the Course:

**Brief Job Description:** Understanding the customer’s requirements for installing the various types of electronic security systems and configuring the system for security functions.

#### Learning Outcomes:

<table>
<thead>
<tr>
<th>NOS # ELE/N4616 Engage with customer for installation</th>
</tr>
</thead>
<tbody>
<tr>
<td>• Interact with the customer</td>
</tr>
<tr>
<td>• Understand their requirements</td>
</tr>
<tr>
<td>• Visit the site</td>
</tr>
<tr>
<td>• Understand the site condition and requirement</td>
</tr>
<tr>
<td>• Suggest possible solutions</td>
</tr>
<tr>
<td>• Decide on the system to be installed</td>
</tr>
<tr>
<td>• Achieve productivity and quality standards</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>NOS # ELE/N4617 Install and setup the access control system</th>
</tr>
</thead>
</table>

110
• Procure the hardware required for installation
• Test the access control hardware before installation
• Install the wiring
• Install and setup the access controls
• Setup the system
• Use appropriate tools and equipment for installation

NOS # ELE/N4610IDS Install Intrusion Detection System

• Procure the hardware required for installation.
• Test the hardware before installation.
• Connect the cables.
• Install and setup the IDS.
• Use appropriate tools and equipments for installation.
• Achieve productivity and quality standards.

NOS # ELE/N4611IDS Setup IDS

• Procure the hardware required for installation.
• Test the hardware before installation.
• Connect the cables.
• Install and setup the IDS.
• Use appropriate tools and equipments for installation.
• Achieve productivity and quality standards.

NOS # ELE/N4610 Install CCTV camera

• Procure the hardware required for installation
• Test the hardware before installation
• Connect the cables
• Install and setup the camera
• Use appropriate tools and equipments for installation
• Achieve productivity and quality standards

NOS# ELE/N4611 Setup CCTV surveillance system

• Connect CCTV camera and DVR with the system
• Setup the CCTV system
• Ensure system functioning and perform a demo
• Complete the installation task and report
• Interact with customer
• Interact with superior
• Achieve productivity and quality as per company’s norms

NOS# ELE/N4610FAS Install FAS detector

• Procure the hardware required for installation.
• Test the hardware before installation.
• Connect the cables.
• Install and setup the detectors, devices & Control Panels.
• Use appropriate tools and equipments for installation.
• Achieve productivity and quality standards.

NOS #ELE/N4611FAS Setup FAS

• Connect FAS detectors and devices with the Fire Alarm Control Panel.
• Setup the Fire Alarm System.
• Ensure system functioning and perform a demo.
• Complete the installation task and report.
• Interact with customer.
• Interact with superior.
• Achieve productivity and quality as per company’s norms.

NOS # ELE/N4610 Setup VDP Outdoor Unit and lock

• Procure the hardware required for installation
• Test the hardware before installation
• Connect the cables
• Install and setup the indoor and outdoor units.
• Use appropriate tools and equipments for installation
• Achieve productivity and quality standards

NOS # ELE/N4611 Setup VDP Indoor system

• Connect outdoor units and lock with the Indoor unit
• Setup the Video Door Phone system
• Ensure system functioning and perform a demo

112
- Complete the installation task and report
- Interact with customer
- Interact with superior
- Achieve productivity and quality as per company’s norms

<tbody>
<tr>
<td>Course Name:</td>
<td>2.8.1 Installation &amp; Maintenance of Photocopiers and Printers (NIELIT)</td>
</tr>
</tbody>
</table>

### Objective of the Course:

This course has been designed to provide an introduction to installation and maintenance of Photocopiers and Printers. The participant will be able to troubleshoot problems of Photocopiers and Printers.

### Learning Outcomes:

At the end of the course the participants will be having knowledge of:-
- Basic Electricity, Electrical and Electronic Components
- Soldering and De-soldering Techniques
- Tools and Equipment used
- Repair and maintain Photocopiers and Printers
- Troubleshooting Techniques

### Expected Job Roles:

Photocopy and Printer Repair Technician

### Duration of the Course (in hours)

200

### Minimum Eligibility Criteria

8th Pass/ITI
and pre-requisites, if any

Professional Knowledge:
The individual on the job needs to know and understand:
PK1. Knowledge of Electronic and Electrical Components
PK2. Resistors, Capacitors and Inductors, their identification, types and application
PK3. Protection equipment (anti-static wrist bands, shoes, dress, packaging, and other appropriate insulations)
PK4. that are required to be used
PK5. First aid requirements in case of electrical shocks, cuts and other common injuries
PK6. Soldering and De-Soldering Techniques
PK7. Principle of Operation of Photocopier
PK8. Dismantling and assembling of paper feed mechanism, paper tray, Thermal unit and Toner Unit.
PK9. Identify the various sensors used in the copier and their fixtures.
PK10. Paper trays, Paper feed mechanism and the sensors used for paper movement
PK11. Periodic cleaning and servicing of copier machines
PK12. Thermal Printers and Inkjet Printer, their Working Principle
PK13. Laser Printers and its operation
PK14. Different Parts of Printer
PK15. Cartridges, toner, drum, their use and its replacement
PK16. Overall fault finding and repair of Printer
PK17. Standard fault-finding (troubleshooting) techniques
PK18. Component testing methods
PK19. Troubleshooting through circuit diagram
PK20. Removal and Replacement of faulty Component
Professional Skill:
The individual on the job needs to know and understand:

**Electrical and Electronic Component Identification and Use Skills**

PS1. Understand use of Electrical Component such as cable, switches, transformers etc.
PS2. Understand use of Electronics Component such as Diodes, Transistors, ICs etc.
PS3. Use of Test and Measurement Equipment

**Soldering skills**

PS4. Understand Soldering Requirements
PS5. Operation of Equipment required for Soldering
PS6. Use of Desoldering Pump

**Photocopier Repairing Skill**

PS7. Understand Operation of Photocopier
PS8. Dismantling and assembling of paper feed mechanism, paper tray, Thermal unit and Toner Unit.
PS9. Identify the various sensors used in the copier and their fixtures.
PS10. Fault finding and repairing in electrostatic high voltage unit.
PS11. Dismantling and fitting of drum unit - cleaning of drum unit
PS12. Dismantling and refitting of Carriage unit, mirror unit and light unit
PS13. Periodic cleaning and servicing of copier machines
PS14. Overall fault finding and repair a photo copier machine.

**Printer Repairing Skill**

PS15. Understand Working Principle of Thermal Printers and Inkjet Printer
PS16. Understand Operation of Laser Printers
PS17. Different Parts of Printer and their use
PS18. Cartridges, toner, drum, their use and its replacement
PS19. Overall fault finding and repair of Printers

**Troubleshooting Skills**

PS20. How to approach a defect
PS21. Make use of standard OEM specified troubleshooting steps
PS22. Interpret intermediate results and progress fault rectification accordingly
PS23. Utilize appropriate tools to rectify faults
Core Skill:
The individual on the job needs to know and understand how to:

**Reading skills**
CS1. Read and understand technical manuals, work orders and reports
CS2. Read and understand organizational health and safety instructions

**Writing Skills**
CS3. Fill up record sheets clearly, concisely and accurately as per company procedures

**Communication Skills**
CS4. Clearly communicate relevant information to supervisors
CS5. Respond appropriately to queries
CS6. Communicate with customer/customer facing teams to understand handset performance issues
CS7. Communicate in the local language
CS8. Convey proposed solution to the customers

**Time Management Skills**
CS9. Prioritize and execute tasks in a high-pressure environment
CS10. Use and maintain resources efficiently and effectively

**Analytical Skills**
CS11. Analyse (and understand) customer complaints
CS12. Interpret reports, readings and numerical data
CS13. Keep up to date with new technology and performance issues

**Other Skills**
CS14. Create and maintain effective working relationships and team environment through collaboration
CS15. Take initiatives and progressively assume increased responsibilities
CS16. Share knowledge with other team members and colleagues

| 3. | **Soldering/ de- soldering techniques**  
Soldering Iron, Soldering wire, Soldering Flux, Soldering method,  
Zero defect soldering  
Desoldering pump, Temperature controlled soldering station,  
Hands-on-practices of Soldering | 10 / 10 |
|---|---|---|
| 4. | **Tools and equipment**  
Screw Driver Set  
Tweezers, Different Types of Tweezers, Nose Pliers, Wire Cutter  
Hot air gun  
Liquid solder pest, Magnifying Lamp and Measuring Tools  
Brush, CRO, Nipper  
Test and Measurement Equipment, Multimeter Operation etc. | 10 /10 |
| 5. | **Photocopiers**  
Principle of Operation of Photocopier  
Dismantling and assembling of paper feed mechanism, paper tray, Thermal unit and Toner Unit.  
Identify the various sensors used in the copier and their fixtures.  
Fault finding and repairing in electrostatic high voltage unit.  
Dismantling and fitting of drum unit- cleaning of drum unit  
Dismantling and refitting of Carriage unit, mirror unit and light unit  
Paper trays, Paper feed mechanism and the sensors used for paper movement  
Periodic cleaning and servicing of copier machines  
Overall fault finding and repair a photo copier machine. | 20 / 20 |
| 6. | **Printers**  
Printers and their types.  
Thermal Printers and Inkjet Printer, their Working Principle | 25 / 25 |
Laser Printers and its operation  
Different Parts of Printer  
Cartridges, toner, drum, their use and its replacement  
Overall fault finding and repair of Printers  

| 7. | **Safety and Security Procedures**  
|    | Reporting incidents, system failures, power failures etc., protection equipment  
|    | First aid requirement in case of electrical shocks and other injuries  
|    | **05 / 05**  

| 8. | **Reading, Writing and Communication Skills**  
|    | Understanding Technical Manuals, Reports, Work orders etc.  
|    | Understanding Organizational health and safety instructions  
|    | Types of documentation in organization, their importance, Company guidelines and norms, activities after maintenance process  
|    | Spare management, Service Level Agreements (SLAs)  
|    | Fill-up forms, record sheets, log book etc. as per company procedures  
|    | Customer Communication, Convey proposed solution to the customer, responding queries  
|    | Communication with supervisor, Report for unresolved problems  
|    | Time Management and Team Skills  
|    | **15 / 15**  

**Total Theory / Lecture Hours:** 100 hrs  
**Total Practical / Tutorial Hours:** 100 hrs  
**Total Hours:** 200 hrs  

**Recommended Hardware:**  
For a batch size of 50Nos

ESDM Courses

Level Code: L4  Vertical Name: Office Automation, IT & networking

Course Code: NL/S/L4/C014  TL/S/L4/C035  EL/S/L4/C027  
Course Name: 2.8.2 Telecom Technician - PC Hardware and Networking (NIELIT/TSSC/ESSCI)

Objective of the Course:
To obtain proficiency in the different components of PC (processors, motherboard, RAM, I/O Devices) and networking components (Simple Network Components, Networking Components like Switch, Router, Hub, NIC, PC/Laptop, Router) and the various processes of setting up different kinds of network. It also helps to gain proficiency in trouble shooting of networks, installation of software, setting up network security. The students are also equipped with good Communicative English Skills, soft Skills and Basic IT skills required for good performance in any job in the modern world.

Learning Outcomes:
Acquire hands on training in assembling a PC using the scrap components. Also get a detailed knowledge on the basic networking concepts and complete hands on training in setting up different kinds of network. Efficient in managing, configuring, installing and troubleshooting different hardware and networking resources. Have Good Communicative English Skills, Soft Skills & IT skills.

Expected Job Roles:
1. Troubleshooting PC & its Components
2. Maintenance of Computer Hardware
3. Network Administrators
4. Hardware Technicians
5. Entrepreneurs - Consultancy Services

Duration of the Course (in hours) 350 hrs
Minimum Eligibility Criteria
and pre-requisites, if any

12th Pass

Professional Knowledge:

KA1. Knowledge to assemble a PC using scrap components and standard methodologies to set up a system using various components of the system

KA2. Understanding on designing the network and set up a network

KA3. How to troubleshoot the various hardware resources like printer, scanner, hard disk, mouse, keyboard etc.

KA4. How to troubleshoot the software resources (application troubleshooting)

KA5. How to troubleshoot of networks and networking resources like routers, switches, hub, cable, modem etc.

KA6. To interpret design requirements of different types of networks

KA9. SMPS and Specifications- Form factors, Power Connectors

KA10. Knowledge to prepare HDD- Configuring, Mounting, Partitioning, Formatting and loading OS

KA12. Protocols and topologies to simulate, analyze and synthesize design options

KA13. Number Conversion systems and IP addresses

KA14. IP Addressing and sub-netting

KA15. Broadband, Network Architecture & Wireless networks
Professional Skill:

SA1. Assemble a PC using scrap components and standard methodologies to set up a system using various components of the system

SA2. Designing the network topologies and setting up various types of networks

SA3. Troubleshooting of hardware resources like printer, scanner, hard disk, mouse, keyboard etc., software resources (application troubleshooting) and the networks and networking resources like routers, switches, hub, cable, modem etc.

SA4. Connecting SMPS and use of Form factors, Power Connectors

SA5. Usage of number conversion systems, IP addresses and IPV6

SA6. Setting up Broadband Network & Wireless networks

Core Skill:

NIC, Hubs, Switches, Routers

5. Addressing used in Networking - IP address

6. Basics of Internet protocol TCP/IP

7. Different types of cabling used in networking and their standards

8. UTP cable types and its purpose, UTP cable crimping using RJ 45 connectors - Straight through and Cross over Crimping

9. Introduction to Server - features, Hardware features and Software features, RAID etc.

10. Basics of routers - Difference from switches, uses, features

11. Configuration aspects, Basic concepts of Switching and Routing

12. Internet connection mechanisms - Dial up, Broadband etc

13. Overview of a Service Provider network to connect Internet

14. Wireless Networking - Wireless networking concepts, different wireless standards like Blue tooth, Wifi, WiMaX etc

Computer Networking Practical

1. Familiarization of internetworking elements like Hubs, switches, routers

2. Network Cable Crimping - Straight through and Cross over Crimping using UTP cables and testing

3. Installation of NIC in PCs and trouble shooting

4. Configuration for networking, advanced client configuration for connecting multiple networks

5. Setting up of a simple LAN, Checking the connectivity using DOS commands

6. Sharing files, Printers, CD drives

7. Sharing desktops, Remote desktop, Using Applications like Team Viewer for
accessing a remote computer

8. Configuration of client PCs for connecting multiple networks etc

9. Installation of Windows server, Configuration of server for Web Server and FTP server, Verification from a client

10. Basic router configuration, Connecting through Hyper terminal, Configuring router connecting different networks

11. Broadband Lab- Type 1 and Type 2 Modems, Modem configuration for internet connection

12. Wireless modem configuration for Wi Fi connectivity, Internet connection sharing to multiple clients

**ESDM Courses**

136
Objective of the Course:

The Objective of CHM-O Level course is to train candidates to acquire basic knowledge in:

- Computer Hardware and Peripherals
- Installation, troubleshooting and Maintenance
- System Software
- Networking
- Data Backup and Recovery

Learning Outcomes:

On completion of the course the participants will be able to:-

- Assemble and Repair PC
- Trouble shoot H/W and S/W Components of PC
- Installation of System Software and other tools
- Install and maintain Networks
- Perform backup and recovery operation
- Interacting with customer effectively

**Expected Job Roles:**

Hardware Engineer, Network Engineer

**Duration of the Course (in hours)**

400 hrs

**Minimum Eligibility Criteria and pre-requisites, if any**

12th Pass/ITI/Diploma, graduation or more

**Professional Knowledge:**

The individual on the job needs to know and understand:

<p>| PK1. | Knowledge of components of PC |
| PK2. | Protection equipment (anti-static wrist bands, shoes, dress, packaging, and other appropriate insulations) that are required to be used |
| PK3. | First aid requirements in case of electrical shocks, cuts and other common injuries |
| PK4. | Functionality and features/working of PC Components |
| PK5. | PC operating system and user interface |
| PK6. | Functionality of hardware components like SMPS, Motherboard, processor, screen, Keyboard, Mouse etc. |
| PK7. | Have basic knowledge of electronic components on PC motherboard |
| PK8. | Procedure to assemble and dismantle PC and PC Components |
| PK9. | Range of tools and testing equipment (multimeters, soldering iron etc.) available |</p>
<table>
<thead>
<tr>
<th>PK10.</th>
<th>Knowledge of PC OS and related software installation (Windows, Linux, antivirus, MS office etc)</th>
</tr>
</thead>
<tbody>
<tr>
<td>PK11.</td>
<td>Knowledge of networking components and its installation-switch, Hub, router</td>
</tr>
<tr>

</tr>
<tr>
<td>PK17.</td>
<td>Standard software testing techniques</td>
</tr>
<tr>
<td>PK18.</td>
<td>Standard backup and recovery operations</td>
</tr>
</tbody>
</table>
Professional Skill:

The individual on the job needs to know and understand:

**PC operating Skills**
- **PS1.** Use and access the features and applications
- **PS2.** Data backup and restoration
- **PS3.** Installation of Operating system and other related software
- **PS4.** Installation of peripheral specific software like printer, scanner, web cam etc
- **PS5.** Use the software diagnostic tools

**PC Component maintenance skills**
- **PS6.** Assemble and dis-assemble PC components
- **PS7.** Interpret diagnostic test results to identify and localize faults
- **PS8.** Utilize appropriate mechanisms and tools to rectify the faults
- **PS9.** Utilize appropriate communication channels to escalate unresolved problems
- **PS10.** Undertake corrective repairs or replacing component
- **PS11.** Undertake checks to confirm that the problem is resolved

**Networking Skill**
- **PS12.** Able to use networking basic equipment- cutter, crimping tools, cable tester etc
- **PS13.** Preparing UTP straight and cross patch cable
- **PS14.** Configuring IP –address on PC for LAN
- **PS15.** Configuring switch and router for LAN & WAN
- **PS16.** Configuring Shared resources on network like printer, storage device etc

**Software Skills**
- **PS17.** Identifying software version and its installation
- **PS18.** Configuring Windows and Linux Server
- **PS19.** Diagnosing peripheral software related problem

**Troubleshooting Skills**
- **PS20.** How to approach a defect
- **PS21.** Make use of standard OEM specified troubleshooting steps
- **PS22.** Interpret intermediate results and progress fault rectification accordingly
- **PS23.** Utilize appropriate tools to rectify faults

**Total Theory / Lecture Hours:** 214 hrs  
**Total Practical / Tutorial Hours:** 186 hrs  
**Total Hours:** 400 hrs

### Recommended Hardware:

For a batch size of 50Nos

**A. Instruments:**

1. Dual Traced CRO, 20 MHz - 2 Nos.
2. Signal generator, 1 GHz - 2 Nos.
3. Digital multimeter - 10 Nos.
5. Soldering station 6V/10W - 10 Nos.
6. Printer (Laser, Ink-jet, Dot-Matrix)- 01 No. each

7. Scanner (flatbed Or handheld OR MFD) - 01 No.

8. Latest mid-range servers with DUAL Processors.

9. Anti-Static PAD

B. Hardware:

2. Various Types of motherboards - 10 Nos.

3. Various types of Processors, RAM compatible with motherboards,

4. Blu-ray disc, DVD, CDROM and floppy Drive - 2Nos. each,

5. Hard Disk Drive like IDE, SATA, SCSCI - 2 Nos. each.

6. Cabinet with SMPS- 10 Nos.

7. Add-on cards Graphics Cards, sound Card, ethernet Cards Etc.

8. Monitors like CRT, LCD, LCD backlit LED various sizes.

9. 16, 24 port switches, UTP CAT-6 cable, Rj-45 Connectors,

10. CISCO 2800 Series or compatible Router

Recommended Software:

1. Linux and other popular OS, Office productivity tools.

3. Latest Anti-virus software,
4. Software compatible for different types of Handsets/Gadgets

2. Various Types of motherboards - 10 Nos.

3. Various types of Processors, RAM compatible with motherboards,

4. Blu-ray disc, DVD, CDROM and floppy Drive - 2Nos. each,

5. Hard Disk Drive like IDE, SATA, SCSCI - 2 Nos. each.

6. Cabinet with SMPS- 10 Nos.

7. Add-on cards Graphics Cards, sound Card, ethernet Cards Etc.

8. Monitors like CRT, LCD, LCD backlit LED various sizes.

9. 16, 24 port switches, UTP CAT-6 cable, Rj-45 Connectors,

10. CISCO 2800 Series or compatible Router

**Recommended Software:**

1. Linux and other popular OS, Office productivity tools.

3. Latest Anti-virus software,
4. Software compatible for different types of Handsets/Gadgets

| Text Books: | A number of books are available in market, which can be referred. Efforts are being made to publish a standard text book. |
| Reference Books: | - user/service manuals |

| NL/S/L3/C002  
EL/S/L3/C021  
TL/S/L3/C032 | 2.9.1 Certificate Course in Electronic Product Testing (NIELIT/ESSCI/TSSC) |

### Objective of the Course:

This course has been designed to provide the knowledge and expertise of Systematic Testing of selected Electronics Products along with Communicative English and soft Skills and Basic IT skills required for good performance in any job in the modern world.

### Learning Outcomes:

- To systematically test electronic equipments using appropriate tools and equipments.
- Have good Communicative English skills, soft Skills & Basic IT Skills

### Expected Job Roles:

- Technician-In Electronic Products Testing / QA Areas

### Duration of the Course (in hours)

360 Hrs

### Minimum Eligibility Criteria and pre-requisites, if any

10" / 12" Pass with Science background
**Professional Knowledge:**

1. Fundamentals of electricity & Electronics
2. Use of Tools and Test and Measuring equipments such as CRO, Multimeter, Signal Generator, LCR meter etc
3. Handling of Different electronics Components and Electrostatic discharge
4. Awareness of Types of Product testing, Safety Standards & Certificates
5. Awareness of Quality standards, Calibration of Equipments etc
6. Specifications of Products and their testing Procedures
7. Basic knowledge of working principle of Different Electronic Products
8. Understanding of internal modules and major components used in the Product
9. Testing of Electronic Components
10. Safety rules, policies and procedures

**Professional Skill:**

1. Systematic Approach to Testing of Products
2. Use of Tools and Test and Measuring equipments such as CRO, Multimeter, Signal Generator, LCR meter etc
3. Fault Diagnosing skills - Detect basic electrical faults such as improper earthing, defective power chord, connector or wiring defects, loose connections etc.,
4. Good Soldering & de-soldering Skills
5. Use oscilloscope for diagnosing faults
6. Sound Judgement based on quality Standards and Company Policy

**Core Skill:**

1. Reading and writing skills
2. To record the details of tests & Measurements and Observations
3. To know and understand: how to read product and module serial numbers and interpret details such as make, date, availability, how to note problems on job sheet and details of work done.
4. To read and understand Product manuals
5. To read and understand warnings, instructions and other text material on product labels, and components
6. Safety Habits
### Detailed Syllabus of Course

**Communication and Soft skills**

</tr>
</tbody>
</table>
2. Switch Mode Power Supply (Applicable Standard : IS 14886)
   Safety Testing(Earth Leakage current Test, Dielectric Test, Short Circuit Protection),
   Performance Testing (Line Regulation, Load Regulation for a variation of Load Min to Max load and vice versa, Efficiency at nominal input and rated load)

3. Tubular Batteries (Applicable standard : IS 1651) Test for Capacity, Test for voltage during discharge

   Safety Testing (Earth Leakage current Test, Dielectric Test)
   Performance Testing (Microprocessor used, RAM expansion Capacity, Clock Rate and RAM Capacity, Effect of Power Supply variations)

5. Invertor (Applicable Standard : IS 13314)
   Visual Inspection, High Voltage Test, Insulation Resistance Test, No –Load Test, Output Test

6. UPS (Applicable Standard : IEC 62040-3)
   Steady State Input Voltage Tolerance, Output-Normal Mode – No Load, Output-Normal Mode – Full Load, Output-Store Energy Mode – No Load,

7. Electronic Ballast (Applicable Standard : IS 13021)
   Operating Supply Voltage, Total Circuit Power, Circuit Power factor, Supply Current

   Definitions and Terminology, Protection

#### Objective of the Course:

- Have knowledge about the various devices used in medical field.
- Have an awareness of the safety aspects of medical instruments.
- Understand the basics of how the signals are obtained from the body that is to be measured by various machines.

#### Learning Outcomes:

- Have knowledge about various devices used in medical field
- Have the basic understanding of how the signals are obtained from the body
- Be aware of the safety aspects in this field.

#### Expected Job Roles:

- Operation and Maintenance of Dental Equipment

#### Duration of the Course (in hours)

- 350 Hours
### Minimum Eligibility Criteria and pre-requisites, if any

| 10"" Pass |

---

### Professional Knowledge:

- **a)** Basics of Mechanical Foundry Equipments
- **b)** Working of Motor, Drilling.
- **c)** Basic concept of suction apparatus.
- **d)** Have understanding related to medical lights, Shadow less lights.
- **e)** Basics of X-rays.
- **f)** Understanding of basics of dental machines.
- **g)** Basic Knowledge of Dental tools.
- **h)** Basic Of active and passive components
- **i)** Types of components with its working.
- **j)** Working and usage of OP AMP 741.
- **k)** Basics of ultrasonic s waves, concepts and Units

### Professional Skill:

- **a)** Knowledge and hands on experience with designing of circuits
- **b)** Working and designing of PCB's
- **c)** Basics of dental chairs usage
- **d)** Concepts of hydraulics and Suction system,
- **e)** Working and Concept Of TTL.
- **f)** Understanding and theory related to ultrasonics, Internal circuitry.

### Core Skill:

- **a)** Basic understanding and co-ordinating skills.
- **b)** Basic Numeracy and co-ordination.
- **c)** Should have a strong determination and curiosity to learn new things
- **d)** Adaptable with the environment.
- **e)** Should have understanding and adaptability with new concepts.
- **f)** Blending with the technical aspects.

Course ID: NL/S/L3/C005  Course Name: 2.10.2 Repair & Maintenance of Imaging Equipment (X-Ray & Ultrasound machine) (NIELIT)

**Objective of the Course:**

- Have knowledge about the various devices used in medical field.
- Have an awareness of the safety aspects of medical instruments.
- Understand the basics of how the signals are obtained from the body that is to be measured by various machines.

**Learning Outcomes:**

- Have knowledge about various devices used in medical field
- Have the basic understanding of how the signals are obtained from the body
- Be aware of the safety aspects in this field.

**Expected Job Roles:**

Operation and Maintenance of Imaging Equipment (X-Ray & Ultrasound machine)

**Duration of the Course (in hours):** 350 Hours

**Minimum Eligibility Criteria and pre-requisites, if any:** 10th Pass

Professional Knowledge:
a) Basics of Mechanical Foundry Equipments  
b) Working of Motor, Drilling.  
c) Basic concept of suction apparatus.  
d) Have understanding related to medical exposure of X-Rays.  
e) Basics of X-rays.  
f) Understanding of basics of dental machines.  
g) Basic Knowledge of Medical computer usage and applications in imaging field  
h) Basic Of active and passive components  
i) Types of components with its working.  
j) Working and usage of OP AMP 741.  
k) Basics of ultrasonic s waves, concepts and Units  

Professional Skill:  
a) Knowledge and hands on experience with designing of circuits  
b) Working and designing of PCB's  
c) Basics of XRay units,  
d) Concepts of hydraulics and Suction system,  
e) Working and Concept of xray Tubes, collimator.  
f) Understanding of basics of optics.  
g) Knowledge of Spectrum.  
h) Basics of Non Invasive Xrays.  

Core Skill:  
a) Basic understanding and co-ordinating skills.  
b) Basic Numeracy and co-ordination.  
c) Should have a strong determination and curiosity to learn new things  
d) Adaptable with the environment.  
e) Should have understanding and adaptability with new concepts.  
f) Blending with the technical aspects.

### Objective of the Course:
- Have knowledge about the various devices used in medical field.
- Have an awareness of the safety aspects of medical instruments.
- Understand the basics of how the signals are obtained from the body that is to be measured by various machines.

### Learning Outcomes:
- Have knowledge about various devices used in medical field
- Have the basic understanding of how the signals are obtained from the body
- Be aware of the safety aspects in this field.

### Expected Job Roles:
- Operation and Maintenance of Clinical Equipment (ECG & ICCU)

### Duration of the Course (in hours)
- 350 Hours

### Minimum Eligibility Criteria and pre-requisites, if any
- 10th Pass
Professional Knowledge:

a) Should have the understanding of Use of CRO, Multimeter, Measurement of voltage, current, resistance
b) Testing of diodes, resistors
c) Basic Knowledge about the waveforms.
d) PCB repairing and locating the faults.
e) Know basic medical terminologies like ECG, EEG, EMG
f) Working of BP kit, measurement principle.
g) Knowledge of transistors, types and working, usage.
h) Knowledge of electromechanical components, relays, switches.

Professional Skill:

a) Testing and working of resistors, capacitors, transistors, diodes, Inductors, OPAMP,
b) Working of ECG amplifiers, ECG instrumentation
c) Knowledge about ECG, Defibrillators, pulse oximeters, ICU equipments.
d) Basics of Non invasive blood pressure, Soldering, seven segment display.
e) Identification of PCB fuses
f) Performance evaluation of components

Core Skill:

a) Analytical strong competency.
b) Practical Evaluation and understanding of the basics.
c) Strong approach towards the theoretical and practical applications.
d) Eagerness and curiosity to learn more.

ESDM Courses

Level Code: L4  Vertical Name: Medical Electronics

Course Code: TL/S/L4/C020  Course Name: 2.10.5 Tele-health technician (TSSC)

Objective of the Course:

- Undertake installation, repair and maintenance of Telecom Equipment and tele-health equipment and peripherals to enable remote consultation, diagnostics and record towards health consultation, emergency and treatment via telecom media – Audio /video / text and telesignals
- Importance of telecom in medical field and its requirement.

Learning Outcomes:

- Qualifier would be able to install, operate, repair and maintain, update tele-health equipment and peripherals
- Able to store and maintain health records and keep back up.
- able to interconnect disparate peripherals to tele health equipment
- able to understand the various formats of signals and facilitate interoperability and integration
- able to facilitate connectivity of device with various telecommunication networks

Expected Job Titles:

Telehealth technician
Telehealth Biomedical Technician
### Telehealth Instrumentation Technician

- Telehealth administrator
- Telehealth co-ordinator

### Duration of the Course (in hours)

**Recommended Software:**
Web based comprehensive telemedicine solution (such as e-sanjeevani – CDAC), Skype, Viber

**Recommended Hardware:**
**Essential:**
Computer with internet facility with minimum 512 KBPS bandwidth, HD camera, speakers, microphone, Telephone (landline/mobile)
Telehealthequipments and peripherals – Telestethoscope, teleglucometer, Tele-BP meter, SPO2 meter, Vital Signs Monitors, ECGs, Spirometers, and Holters, probes, Digital slit lamp, medical film scanner.
Compliance with interoperability standards – such as HL-7, DICOM
**Desirable:**
Medical scopes, digital microscope, LIMS, Vital signs monitor, Retinal camera

<tbody>
<tr>
<td>NL/S/L5/C009 EL/S/L5/C024</td>
<td>2.11.1 Diploma in Repair &amp; Maintenance of Industrial Instrumentation &amp; Automation System (NIELIT/ESSCI)</td>
</tr>
</tbody>
</table>

### Objective of the Course:

To develop the competency to install, operate & maintain industrial instruments and automation systems.

### Learning Outcomes:

On completion of the course the participants will be able to:-

1. Understand P & ID and other trade related codes and standards
2. Identify a particular instrument in plant from P&ID.
3. Demonstrate the working of different field instruments/sensor.
4. Install, calibrate, operate and maintain all control loop elements.
5. Develop and test PLC programs.
6. Identify the requirements of open loop and closed loop stability.
Expected Job Roles:

As Technician in Process Industries.

Duration of the Course (in hours) 400 hrs

Minimum Eligibility Criteria and pre-requisites, if any ITI / Diploma / BSc

Professional Knowledge:

The individual on the job needs to know and understand:

PK1. Protection equipment that are required to be used

PK2. First aid requirements in case of electrical shocks, cuts and other common injuries

Have basic knowledge of electrical and electronic components

PK3. Standard fault-finding techniques

PK4. Standard repairing process

PK5. Range of tools and testing equipments available and their functionality

PK5. Principle of operation and features/working of instruments

PK6. Knowledge to dismantle and assemble the faulty instrument

PK7. Basic computer knowledge to be able to run diagnostic tools in case of smart instruments

PK8. Range of instrument related problems and their possible solutions
Knowledge of spare management and repair

PK9. Vendor specific configuration and user interfaces
PK10. Functionality of hardware components and software applications.
PK11.
PK12.

Professional Skill:

The individual on the job needs to know and understand:

**Instrument operating Skills**

PS1. Use and access all instrument features and applications
PS2. Operate instrument calibration equipments and testing equipments
PS3. Connect instrument to PC for diagnostics for smart instruments
PS4. Initialize PC based diagnostic tools

**Instrument repairing skills**

PS5. Undertake fault diagnostic
PS6. Interpret test results to identify and localize faults
PS7. Utilize appropriate mechanisms and tools to rectify the faults
PS8. Utilize appropriate communication channels to rectify unresolved problems
PS9. Test instruments to confirm the rectification of the reported fault
PS10. Interpret diagnostic test results to identify and localize faults
PS11. Connect instrument to PC using connectors/cables
PS12. Undertake corrective repairs by software if any.
PS13. Undertake checks to confirm that the problem is resolved

**Instrument Handling skills**

PS14. Safely dismantle/assemble instrument using the right tools
PS15. Safe remove and replace components using right tools
<table>
<thead>
<tr>
<th>PS16.</th>
<th>Compliance to ESD protection measures</th>

</thead>
<tbody>
<tr>
<td><strong>Software Skills</strong></td>
<td></td>
</tr>
<tr>
<td>PS17.</td>
<td>Identifying correct software version for the modules for smart instruments</td>
</tr>
<tr>
<td>PS18.</td>
<td>Execute basic software commands for calibration and use diagnostic tools</td>
</tr>
<tr>
<td>PS19.</td>
<td>Use vendor specific software by navigating through it based on screen commands.</td>
</tr>
<tr>
<td><strong>Troubleshooting Skills</strong></td>
<td></td>
</tr>
<tr>
<td>PS20.</td>
<td>How to approach a defect</td>
</tr>
<tr>
<td>PS21.</td>
<td>Make use of standard OEM specified troubleshooting steps</td>
</tr>
<tr>
<td>PS22.</td>
<td>Interpret intermediate results and progress fault rectification accordingly</td>
</tr>
<tr>
<td>PS23.</td>
<td>Utilize appropriate tools to rectify faults</td>
</tr>
</tbody>
</table>

**Core Skill:**

The individual on the job needs to know and understand how to:

- **Reading skills**
  - CS1. Read and understand technical manuals, work orders and reports
  - CS2. Read and understand organizational health and safety instructions

- **Writing Skills**
  - CS3. Fill up record sheets clearly, concisely and accurately as per company procedures

- **Communication Skills**
  - CS4. Respond appropriately to queries
  - CS5. Communicate with other team members to understand instrument performance issues
  - CS6. Communicate in the local language
  - CS7. Convey proposed solution to the customers and higher officials if necessary

- **Time Management Skills**
  - CS8. Prioritize and execute tasks in a high-pressure environment
Use and maintain resources efficiently and effectively

CS9. Analytical Skills

CS10. Analyse (and understand) performance issues of the instrument
     Interpret reports, readings and numerical data

CS11. Keep up to date with new technology and performance issues

CS12. Other Skills

CS13. Create and maintain effective working relationships and team environment through collaboration
      Take initiatives and progressively assume increased responsibilities

CS14. Share knowledge with other team members and colleagues

CS15.

CS16.

</tbody>
</table>
- the metric system
  - base and supplementary units
  - derived units
  - Multiplying factors (milli, micro, nano, Mega, Giga...).
- Instrument Characteristics
- Instrument performance terminology
  - Repeatability and Accuracy
  - Zero, span and Linearity errors
- Types of errors.
- Standard Signals
- Different number bases
  - Binary
  - Octal
  - Hex

**Explain codes, standards and regulations**
- Examine work-related safety regulations and publications
  - OHS Regulation
  - General Requirements of OHS
  - Chemical and biological agents
  - Noise, vibration, radiation and temperature
  - Tools machinery and equipment safety
  - Ladders, scaffolds and temporary work platforms
  - Rigging, cranes and hoists
  - Mobile equipment
  - Electrical safety
  - Oil and gas industries

**Identify electrical hazards and apply safe work practices**

Packaging & Enclosures of Instrumentation System
<table>

| **Safety Measures**  
  - Measurement Categories  
  - Nature of Environment & Safety Measures  
    - Enclosures of electric equipment for Non-Hazardous location  
      - International standards  
    - Enclosures of electric equipment for Hazardous location  
      - International standards  
  - Intrinsically Safe Equipment  
  - Design Consideration of Enclosures for Different Market Segments  
    - Examine regulations  
      - Sizing of wire, fuses and circuit breakers  
      - Overloads and Inrush current  
      - Proper installation and grounding of electrical equipment  
  - Use trade related schematics and drawings  
    - Examine types of schematics and drawings  
      - P&ID and Loop wiring diagrams  
    - Examine symbols and conventions  
      - ISA and SAMA symbols  
    - Use basic schematics and drawings  
      - P&ID, Loop drawings |

### 2. Installation and Maintenance of Measuring and Indicating Devices

Calibrate and service indicating and recording instruments  
- Types of recording devices  
  - Chart recorders  
    - Electronic  
- Indicating devices  
  - Digital displays
- Analog displays
  - Configurable
    - LCD
- Calibrate and service indicating devices
  - Gauges
  - Bourdon tube
    - Helical
    - Spiral
  - Bellows
    - Diaphragm capsule
- Accessories
  - Pigtail siphons
  - Damping mechanisms
  - Chemical seals
- Measuring element and range
- Fill fluid specifications
- Differential measuring devices
  - Device calibration using principles of zero, span and angularity adjustments as they relate to links and levers
- Service recording devices (Electronic)
  - Identification of measuring element and input measurement scale
  - Power supply
  - Troubleshooting procedures (instrument specific - according to manuals)

**Introduction to pressure measurement**

- Types of pressure
  - Absolute, Differential, Gage, Vacuum
  - Conversion tables
- Pressure conversion formulas
- Steam tables (relationship between temperature and pressure)
- Head correction calculation

- Types of pressure measuring devices and transmitters
  - Pneumatic
  - Electronic
    - Analog
    - Digital
  - Pressure Transmitters

- Installation of pressure measuring devices
  - Manufacturers’ specifications
  - Selection of device
  - Air / power supply requirements
  - Location of device
  - Isolation of device
  - Connection of device to process
  - Connection of device to control system
  - Sealants and gaskets

- Configure / calibrate pressure measuring devices
  - Device Operation
  - Primary Calibration Standards
  - Differential Pressure Measurement
  - Pascal's Law
  - Absolute and Atmospheric Pressure
  - Relationship between Pressure and Column of Liquid
  - Hydrostatic Head Pressure
  - U-Tube and Well Manometers
  - Bourdon Pressure Gage
• Spiral and Helical Elements
  o Bellows and Diaphragm Elements
  o Calibration / configuration parameters
  o Interpretation of results
  o Identification of cause/effect of calibration errors
  o Adjustments to bring device within calibration parameters
  o Document calibration results
• Maintain device
  o Manufacturers’ recommended maintenance procedures

Introduction to temperature measurement

• Define Temperature, Heat and Energy
• Temperature scales
  o Fahrenheit
  o Celsius
  o Kelvin
  o Conversions between scales
• Temperature measuring devices, their operation and Transmitters
  o Thermometer
  o Thermocouple
  o Thermocouple tables
  o Resistance Temperature Detectors (RTD)
    ▪ RTD tables
  o Thermistor
  o Liquid in Glass and Filled bulb systems
  o Pyrometer
  o Semi-conductor mechanical thermal system
  o Infrared radiation
  o Fibre Optic
<p>| o | Thermal Expansion Thermometers |
| o | Temperature Transmitters |
| • | Temperature calibrating instruments |
| o | Thermometers |
| o | Multimeters |
| o | Millivolt source |
| o | Resistance source |
| o | Temperature baths |
| o | Dry block calibrators |
| o | Thermocouple simulators |
| o | Decade box |
| • | Installs, calibrates and services temperature measuring devices |
| o | Manufacturers’ specifications |
| o | Best Practices for selection/location of measuring device |
| o | Response time |
| o | Temperature ranges |
| o | Resolution |
| o | Thermo well selection and installation |
| o | Thermocouples |
| ▪ | Grounding |
| ▪ | Cold junction compensation |
| ▪ | Types (J, K...T) |
| ▪ | Extension wires |
| ▪ | Colour codes (North American and European colour codes) |
| o | RTDs |
| ▪ | Alpha value and Different standards (IEC, DIN etc..) |
| ▪ | 2, 3 and 4 wire |
| ▪ | 100, 200...1000 ohm |</p>

**Introduction to level measurement**

- Level measuring devices, their operation and Transmitters
  - Dip Stick Level Measurement
  - Basic Sight Glasses
  - Float and Cable Arrangements
  - Ultrasonic
  - Capacitance Probe
  - Rotating Paddle
  - Radar Level System
  - Laser Level System
  - Interface Measurement
  - Hydrostatic Pressure
  - Open Tank Level
    - Air Bubbler System
  - Level Transmitters
- Calibration instruments used on level measuring devices
  - Pressure calibrator
  - Laptop / software
- Install, calibrate and service level measuring devices
  - Manufacturers’ specifications
  - Selection /Location of measuring device
  - Process application
  - Zero Suppression/Elevation
  - Process medium
  - Best practices
  - Device check / calibration
  - Interpretation of calibration results
  - Cause / effect of calibration error
  - Device adjustments
  - Repairing/replacing device components
  - Verification of operation
  - Documenting calibration

**Introduction to density measurement**

- Density measuring devices and their operation
  - Applications and Selection
  - Hydrometer
  - Hydrostatic head
  - Displacers
  - Radiation Densitometers
  - Oscillating Coriolis Densitometer
  - Ultrasonic Sludge and Slurry Densitometers
  - Gas Densitometers
  - Effect of temperature on density

- Calibration instruments used on density measuring devices
  - Pressure calibrator
• Install, calibrate and service density measuring devices
  - Manufacturers’ specifications
  - Selection / Location of measuring device
  - Process application
  - Process medium
  - Best practices
  - Verify operation
  - Device check / calibration
  - Interpretation of calibration results
  - Cause / effect of calibration error
  - Device adjustments
  - Repair / replace device components
  - Documenting calibration

Introduction to weight measurement

• Weight measuring devices and their operation
  - Load cells
  - Scales
  - Strain gauges

• Calibration instruments used on weight measuring devices
  - Test weights
  - Wheatstone bridge
  - Laptop / software
  - Handheld programmer (configurator)

• Install, calibrate and service weight measuring devices
  - Manufacturers’ specifications
  - Selection / Location of measuring device
- Process application
- Best practices
- Verify operation
- Device check / calibration
- Interpretation of calibration results
- Cause / effect of calibration error
- Device adjustments
- Repair/replace device components
- Documenting calibration

**Introduction to flow measurement (volumetric, mass flow)**

- Flow measuring devices and their operation
  - Types of Flow
    - Reynolds Number
  - Types of flow meters
    - head type
    - variable area type
    - quantitative flow meters
    - mass flow meters
  - Differential Pressure Flowmeters
    - Concentric and Eccentric Orifices
    - Flow Nozzle
    - Venturi and Pitot Tubes
  - Target Flowmeter
  - Rotameter or Variable Area Meter
  - Magnetic, Vortex, Turbine, and Ultrasonic Flowmeters
  - Doppler Effect
  - Flow Tube Vibration and Twist
  - Coriolis
- Thermal Mass Flowmeters
- Positive Displacement Flowmeters
  - Rotary Vane, Oval Gear, and Nutating Disc Designs
- Open Channel Flow Measurement
  - Weirs
- Parshall Flume
- Solid flow meters

- Calibration instruments used on flow measuring devices
  - Pressure calibrators
  - Temperature calibrator
  - Frequency generator
  - Laptop / software
  - Handheld programmer

- Install, calibrate and service flow measuring devices
  - Manufacturers’ specifications
  - Selection /Location factors
  - Pressure taps
  - Straight pipe requirements
  - Accuracy requirements
  - Process application
  - Process medium
  - Best practices
  - Verify operation
  - Device check / calibration
  - Interpretation of calibration results
  - Cause / effect of calibration error
  - Device adjustments
  - Repair/replace device components

194
3. **Installs & Maintains Safety and Process Monitoring Systems**

**Service ESD (emergency shutdown devices)**

- Types of ESD control systems
  - Levels of Shutdown
    - Unit Shutdown
    - Process Shutdown
    - Emergency Shutdown
    - Emergency Depressurize Shutdown
  - Types of ESD
    - Electric
    - Pneumatic
    - Hydraulic
    - Mechanical
- Purposes of different types of ESD
  - Personnel protection
  - Environmental protection
  - Equipment protection
- ESD testing procedures
  - Partial Stroke Test
  - Time test
  - Valve integrity
  - Interlock checks (system shut down check)

**Service and calibrate personal safety systems**

- Personal gas monitors and standard calibration routines
  - Portable personal gas monitor (Cl, SO2, H2S, O2, CO)
### Installs and Maintains Pneumatic Systems

#### Air supply systems
- Instrument air systems and equipment
  - Need for clean, dry air
  - Air compressors
  - Air dryers
  - Air receivers
  - Air filters
- Air distribution systems
- Use of relative humidity to infer dew point
  - Hygrometers
  - Sling psychrometer
  - Digital psychrometer
  - Bulk polymer resistance sensor
- Servicing procedures for air supply systems
  - Servicing requirements
  - Traps
  - Dessicant
  - Pre and post filters

#### Tubing and fittings
- Types of tubing and installation procedures
  - Plastic
  - Stainless steel
  - Copper
Rubber
- Process and pressure requirements
- Sizes
- Pressure and Temperature Ratings

- Tube bending techniques
  - Calculating dimensions
  - Manual tube benders
  - Hydraulic tube benders

- Install tubing and fittings
  - Ferrule fitting
  - Tightening fittings
  - Follow P&ID drawings
  - Select appropriate tubing and fittings

**Install and service pneumatic instruments**

- Specifications and hazards of pneumatic equipment
  - Compressed air safety
  - Pneumatic signal ranges

- Types of pneumatic equipment
  - Transmitters
  - Converters (I/P)
  - Positioners
  - Controllers
  - Relays

- Operating principles of pneumatic equipment
  - Force balance
  - Motion balance

- Calibrate pneumatic transmitters
<p>| | |</p>

## 5. Installs and Maintains Electrical and Electronic Systems

### Identification of various Electrical and Electronic components

- Active components
- Passive Components
- Switches
- Plugs
- Sockets
- Relays/Solenoids/Contactors
- Inductive proximity switch
- Symbols of electrical components
  - Switch
  - Contacts
  - Solenoids
  - Relay
  - LED
- Electrical Ladder Diagram
- Panel controls
- Integrated Circuits
  - Pin identification and numbering convention
  - IC handling and installation
- Safety
Apply basic principles of DC electricity

- operation and applications of various batteries
  - Lead acid
  - NiCad
  - NiMh
- Measure electrical current, voltage and resistance
  - Analog multimeters
  - Digital Multimeters
- Calculate currents, voltages and resistance using Ohm’s law
  - Series circuits
  - Parallel and combination circuits
  - Formula E = I x R
- Define and reference voltage measurement to circuit common
  - Difference between ground and circuit common
  - Multimeter
  - Oscilloscope and scope meter
  - Frequency generator
  - Circuit schematic
- Calculate electrical power in watts
  - Apply Watt’s Law to define power rating of appliances
    - Watts = E x I
- Examine resistors, potentiometers and rheostats
  - Differences
  - Power ratings
  - Applications
  - Colour codes

Apply basic principles of AC electricity
• Define AC electricity
  o Generation
  o Polarity and waveform analysis
    ▪ Peak/RMS voltages

• various types of transformers
  o Step up
  o Step down
  o Autotransformer
  o Isolation
  o Three phase transformer

• Examine the use of capacitors and inductors in AC circuits
  o Applications
  o Filtering
  o Regulating voltage
  o Power factor correction

• Size electrical components for various circuits
  o Capacitors
  o Inductors
  o Resistors
  o Wire
  o Fuses

• Build and test circuits
  o Understand various components in circuits
    ▪ Electromagnetism
    ▪ Lenz's Law
    ▪ Inductive Reactance
    ▪ Inductive Kick
    ▪ Capacitive Reactance
- Capacitor Types
- Time Constants and Their Application
- Filters and Resonance
- Effect of frequency on a circuit
  - Measuring techniques and equipments
- Types of AC circuits
  - Different classes (based on different standards)
- Installation procedures for AC equipment
  - Wiring methods
  - Support
  - Grounding
  - Shielding
- Apply proper circuit connection techniques
  - Soldering
  - Crimping

**Introduction to Power Electronics (Only Block diagrams)**

- SMPS
- Convertor
- Inverter
- UPS
- DC and AC Drives

| 6. | Installs and Maintains Final Control Elements | 50 |

**Service regulators and examine relief valves**

- Examine regulators
  - Purpose
  - Pressure drops
<table>
<thead>
<tr>
<th>o Types</th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td>▪ Relieving</td>

<tr>
<td>▪ Pressure relieving</td>
<td></td>
</tr>
</tbody>
</table>

- Examine operation and applications of regulators
  o Air
  o Water
  o Steam
  o Oil
  o Gas
  o Differential

- Service and maintain regulators
  o Components
    ▪ Diaphragms
    ▪ Bolts
    ▪ Springs
    ▪ Seats
    ▪ Gaskets
  o Disassembling
    ▪ Spring compression
  o Reassemble
  o Test
- Examine relief valves
  o Applications
  o Safety Device
  o Reset Differential
  o Certification and testing

**Service, size and install control valves and actuators**

- Examine actuators
  o Types
    ▪ Pneumatic
    ▪ Hydraulic
    ▪ Electric
  o Applications
    ▪ Fail open
    ▪ Fail close
    ▪ Fail last
  o Actions
    ▪ Spring return
    ▪ Double-acting
  o Components
    ▪ Diaphragms
    ▪ Plates
    ▪ Stem connector (coupling)
    ▪ Bushings
    ▪ O-rings
    ▪ Pistons
    ▪ Motors
    ▪ Springs
  o Required Operating Environment
Examine control valves
  o Process applications
  o Seal / shut off requirements
  o Flow Characteristics
    ▪ Quick opening
    ▪ Linear
    ▪ Equal percentage
  o Body Types
  o Valve sizing
  o Sliding stem
    ▪ Globe
    ▪ Bar stock
    ▪ Pinch valve
  o Rotary
    ▪ Butterfly
    ▪ E-Disc
    ▪ Segmented ball
    ▪ Through-bore ball
    ▪ Restricted trim
  o Components
    ▪ Cages
    ▪ Plugs
    ▪ Seats
    ▪ Stems
    ▪ Packing
      ▪ Types and applications of valve packing
        o Teflon
        o Graphite
- Install and service control valves
  - Gaskets
  - Sealants
  - Positioning valve in process
  - Securing valve using appropriate process
    - Flanged
    - Screwed
    - Wafered / Flangeless
  - Isolation of valve from process
  - Testing procedures
  - Stroke to ensure proper operation
  - Leak testing
  - Possible faults
    - Leaking packing
    - Valve passing
    - Damaged parts
    - Incorrect travel
  - Cleaning / lubricating
  - Repairing / Rebuilding

- Install and service actuators
  - Matching to valve
  - Connecting to valve
  - Valve travel
  - Bench set
  - Verifying operation
  - Correct air supply pressure
- Function testing
- Possible faults
  - Leaking diaphragms
  - Broken springs
  - Damaged/worn O-rings
- Removing /replacing components
- Cleaning/lubricating components
- Assembling/disassembling
  - Spring compression
- Loading on stem connector

**Install and service valve positioners**

- Valve positioners
  - Types
    - Pneumatic
    - Electronic
    - Digital
    - Electro hydraulic
    - Electro mechanical
  - Applications
  - Single Acting
  - Double Acting
  - Components
    - Levers
    - Nozzles
    - Flappers
    - Relays
    - Auxiliaries
    - Locks
<p>| | |</p>
<table>
<thead>
<tr>
<th></th>
<th></th>
</tr>
</thead>
</table>
|   | • Boosters  
|   | • Speed controls  
|   | o Relation to actuator type / application  
|   | • Install and service valve positioners  
|   | o Mounting  
|   | o Connecting to actuator  
|   | o Connecting to process control system  
|   | o Configuring  
|   | o Set stroke  
|   | o Set pressures  
|   | o Match to actuator  
|   | o Auto tune  
|   | o Calibrating  
|   | o Connecting calibration instruments  
|   | o Calibration parameters  
|   | o Interpretation of calibration results  
|   | o Cause/effect of calibration errors  
|   | o Component maintenance  

| 7. | Installs and Maintains Communications, Networking and Signal Transmission Systems  
|    | Install wiring in accordance with different standards  
|    | • Examine wiring requirements  
|    | o Materials  
|    | o Connections  
|    |   | • Crimping  
|    |   | • Terminal blocks  
|    |   | • Marrettes  
|    |   | • Soldering  

207
• Protection (heat shrink, taping etc.)
  o Shielding
  o Grounding
  o Grounding loops

• Install wiring
  o Sizing wire
  o Routing of wiring runs
  o Stripping wire
  o Labeling / colour-coding wire
  o Connecting wire

Trends in control technologies
• Smart Components
  o Typical smart DP Transmitter
  o Smart temperature transmitter
  o Benefits

Service supervisory control and data acquisition (SCADA) systems
• types of SCADA protocols and configurations
  o Applications
  o Online history
  o Remote equipment operation
  o Network layout
  o Protocols
  o Host
  o Field
  o Addressing methods

• types of SCADA equipment and servers for data acquisition and storage
  o Radio Telemetry Units (RTU)
  o Wireless Communications systems
## Cellular Communication Systems

- **Types of Signal Transmission Systems**
  - Fibre optics
  - Armoured cable
  - Non-armoured cable
  - Multimode / single mode transmission
  - Wired
  - Coax
  - UTP
  - Wireless
  - Satellite
  - Blue tooth
  - RF
  - IR
  - IEEE standards

- **Features and Limitations of Communication Protocols**
  - Types of protocols
    - RS232
    - RS422/485
    - MODBUS
    - ASi BUS
    - Device Net
    - Profibus
    - Highway Addressable Remote Transducer (HART)
    - Foundation Fieldbus H1 & H2
    - Ethernet TCP/IP

</table>
fundamental theories of process operation and equipment

- Common industrial processes
  - Continuous Process
  - Batch process

Introduction to control theory

- Basic control theory
  - Set point / process variable / manipulated variable
  - Relation of output to input
  - Steady state value and dynamic component
  - Control loop gains / loop stability

- Control modes
  - On / Off control
  - Differential Gap
  - Proportional only
  - Integral only
  - Proportional plus Integral
  - PID - Proportional, Integral, Derivative
    - Reset rate / Reset time
    - Series / parallel
  - Interactive / non-interactive / rate on PV

- Controller action
  - Direct acting
  - Reverse acting

- Controller operating modes
Introduction to process control techniques and strategies

- Control techniques
  - Loop tuning
  - Zeigler Nicholls
  - Lambda
  - Tuning from manual output changes
- Basic control strategies
  - Feedback control
    - Process Dynamics
      - Lags
      - Dead Time
  - Feed forward control
  - Cascade control
  - Ratio Control
  - Gap action control
  - Multi variable control

Implement process control strategies

- Implement process control strategies
  - Determining required controller action based on process and valve action
  - Consulting loop diagrams
  - Override
  - Interlocks
- Limits
- Select relays
- Loop impact on overall process
- Alarming
- Control strategy design
- Implementation on live processes
- Upset recovery

**Total Theory / Lecture Hours:** 150

**Total Practical / Tutorial Hours:** 250

**Total Hours:** 400

**Recommended Hardware:**
- Personal Protective equipments for demonstration
- Electronic Chart recorder
- Indicating devices- Digital, Analog and LCD
- Bourdon tube and bellows
- Pressure transmitter (conventional 4 - 20 mA)
- Pressure calibrator
- Multimeter
- Thermometer
- Thermocouple simulator
- Resistance source
- Temperature bath
- Thermocouple (J)
- RTD (Pt 100)
- Capacitance probe for level measurement
- Ultrasonic Levelsensor
- Level transmitter
- Hydrometer
- Load cell
- Orifice plate
- Magnetic flow meter
- Portable gas monitor
- Hygrometer
- I to P converter
- Positioner
- Pneumatic relay
- Compressor
- Electro mechanical relay
- Contactor
- Solenoid
- Electric actuator
- Pneumatic control valve
- Pressure regulator
- Soldering Kit
- Crimping tool
- Marretes, wire terminator
- Standard tool box (Mechanical and Electrical)
- SCADA
- PLC
- Fieldbus cable
- Function generators
- Computers/ Laptop with associated softwares
Recommended Software:
Software compatible for different types of instruments

Text Books:

<tr>
<td>NL/S/L2/C010</td>
<td>2.12.1 Assembly and Maintenance of PC (NIELIT)</td>
</tr>
</tbody>
</table>

**Objective of the Course:**

To train students in the area of Assembling of Computer, Troubleshooting, Installation of Software and Peripherals.

**Learning Outcomes:**

- Assembled & Dissembled the computers installing the peripherals devices
- Repair of Computer up to Card label
- Install different software of computers
- Data recovery
- Maintenance & formatting the computers
- Password breaking
- Protect the computer from virus

**Expected Job Roles:**

Act as Computer Hardware Technician
Starting his own Computer Assembling and Maintenance Shop

ESDM Courses

Level Code: L2
Vertical Name: Telecom Segment

Course Code: NL/S/L2/C011
TL/S/L2/C034
Course Name: 2.13.1 Installation/Repair & Maintenance of EPABX System (NIELIT/TSSC)

Objective of the Course:

TO DEVELOP SKILLED PEOPLE IN THE FIELD OF INSTALLATION & MAINTENANCE OF EPABX SYSTEM

Learning Outcomes:

AT THE END OF PROGRAM TRAINEE WILL BE ABLE TO INSTALL AN EPABX SYSTEM. HE WILL BE ABLE TO REPAIR IT AND CAN WORK IN THE FIELD OF MAINTENANCE OF EPABX SYSTEM. HE CAN OPEN A SERVICE CENTRE.

Expected Job Roles:

The job potentials are as follows:

- Job as technician/operator in different telephone exchanges in Government/Private sector
- Job in telephone industries like BSNL, MTNL and others
- Job & Repairing Centre
- Self Employment

Duration of the Course (in hours) 200 Hrs.
Minimum Eligibility Criteria and pre-requisites, if any

**Professional Knowledge:**

The Learners must have the following professional knowledge as follows:
- Typical Telephone network
- Introduction to EPABX system
- Basic of Digital and data communication system
- Knowledge of Push button telephone system

**Professional Skill:**

The Learner will comprises the professional skills as :
- Installation and maintenance of EPABX system
- Principles of Space division switches and knowledge of digital exchange and its working

**Core Skill:**

- Basic Communication
- Analog and digital modulation technic
- Coding
- Data Transmission
- Modems

**Detailed Syllabus of Course**

</tbody>
</table>
MODULE 1 Basic Communication System (05 Periods)

Basic block diagram of digital and data communication systems. Their comparison with analog communication systems. Basic information theory.

MODULE 2 Digital Modulation Technique

- Basic block diagram and principle of working of the following:
  - Amplitude shift keying (ASK): Interrupted continuous wave (ICW), two tone modulation
  - Frequency Shift keying (FSK)
  - Phase shift keying (PSK),
  - Quadrature Amplitude modulation (QAM)

MODULE 3 Modems

Need and function of modems, Mode of modems operation (low speed, medium speed and high speed modems). Modem interconnection, Modem data transmission speed, Modem modulation method, Modem interfacing (RS 232 Interface, other interfaces).

MODULE 4 Push button Telephones

BASIC BLOCK DIAGRAM OF A TELEPHONE
FUNCTION OF EACH BLOCK
VARIOUS TONES USED IN THE PHONE CIRCUITS
USE OF MICROPHONE AND SPEAKER
PULSE DIALING AND TONE DIALING AND THEIR APPLICATIONS
FUNCTION OF DIALER CIRCUIT, SPEECH CIRCUIT, RINGER CIRCUIT, PROTECTION CIRCUIT,
FUNCTION & WORKING OF KEY PAD USED IN PUSHBUTTON TELEPHONE
TESTING METHODS OF PUSHBUTTON TELEPHONE FOR PROPER FUNCTIONS
USE OF VARIOUS ADAPTORS, CONNECTORS AND SOCKETS USED IN THE TELEPHONE CIRCUITS

FAMILARISATION TO KEY TELEPHONE SYSTEM
Trouble shooting and corrective maintenance

MODULE 5  Electronic Exchange
- Typical telephone network. Various switching offices (Regional Centre, District Centre, Toll Centre, Local Office) and their hierarchy.
- Principles of space division switches. Basic block diagram of an electronic exchange and its working.
- Basic idea of FAX system and its applications. Basic principle of operation and block diagram of modern FAX system.
Important features of modern FAX machines.
Trouble shooting and corrective maintenance

MODULE 6  EPABX systems
- BASIC BLOCK DIAGRAM OF EPABX SYSTEM
- DIFFERENT TYPES OF EPABX SYSTEM
- METHODS TO CONNECT THE TRUNK LINE AND EXTENSION LINE IN A EPABX
- DIFFERENT FACILITIES AVAILABLE IN EPABX SYSTEM  EG CALL WAITING, CALL TRANSFER, CONFERENCE FACILITY
- WIRING CIRCUITS AND UNDERSTAND THE WIRING OF EXTENSION CIRCUITS
Trouble shooting and corrective maintenance

MODULE 7  Digital Exchange
- Working Principle and operation of digital exchange, Trouble shooting and corrective maintenance

Detail of Practical Work
1. FAMILARISATION OF TOOLS & INSTRUMENTS USED FOR WIRING AND TESTING OF EPABX SYSTEM
2. IDENTIFY & TEST THE COMPONENTS USED IN THE PUSHBUTTON TELEPHONE
3. IDENTIFY THE VARIOUS TONE SIGNALS USED IN THE PHONES
4. TESTING OF MICROPHONE AND SPEAKER
5. TESTING & REPLACING COMPONENTS IN THE PROTECTION CIRCUIT AND RINGER CIRCUIT
6. TESTING OF KEY PAD FOR PROPER FUNCTION AND REPAIR THE KEY PAD PROBLEMS
7. IDENTIFY THE FAULTY COMPONENT AND REPLACE IN THE DIALER CIRCUIT AND SPEECH CIRCUIT
8. TEST AND IDENTIFY THE FAULT IN A PUSHBUTTON TELEPHONE
9. IDENTIFY AND FIX THE VARIOUS ADAPTORS, CONNECTORS AND SOCKETS
10. IDENTIFY THE TERMINALS OF TRUNK LINE AND EXTENSION LINE AND CONNECT THE EXTENSIONS
11. SETTING THE CALL TRANSFER, CALL WAIT AND OTHER FACILITIES AVAILABLE ON EPABX
12. TRACE THE WIRING AND LOCATE THE FAULT IN THE EXTENSION WIRING CIRCUIT
13. TROUBLE SHOOTING AND MAINTENANCE PRACTICES OF EPABX, ELECTRONICS AND DIGITAL EXCHANGE
Recommended Hardware:
1. SHOULD BE 30 TO 100 LINES – ONE NUMBER
2. PUSHBUTTON TELEPHONES - 10 NOS
3. TELEPHONE ANALYZER - 1 NO.
4. CRIMPING TOOL - 1 NO.
5. MULTIMETER – 1 NO

Recommended Software:
NIL

Text Books:
2. Communication system By A.K. Gautam S.K. Kataria Sons, Delhi
3. Electronics communication by K.S. Jamwal, Dhanpat Rai and Sons, Delhi

Reference Books:
ESDM Courses

Level Code: L3  Vertical Name: 4.3 Telecom

Course Code: TL/S/L3/C001  Course Name: 2.13.2 Optical Fiber Splicer (TSSC)

Objective of the Course:

The person should be able to undertake the efficient splicing of the optical fibre cables and support in optical fibre installation including fibre joint testing.

Learning Outcomes:

By the end of the training, the person should be able to carry out all activities pertaining to a role of Optical Splicer. Broadly these include the following:

- Prepare cable for splicing operations
- Ensure availability of tools and spares for splicing and testing
- Perform splicing operations
- Carry out route Inspection for laying of fiber
- Coordinate trenching, cable laying, jointing and cable blowing activities
- Test effectiveness & close activity
- Health and Safety
- Record parameters and generate compliance reports

Expected Job Roles:

Optical Fiber Splicer

Duration of the Course (in hours) 350 Hours
Minimum Eligibility Criteria and pre-requisites, if any: 10th Pass

Professional Knowledge:

- Principle of OFC Communication
- Characteristics of OFC
- Important parameters of OFC Communication
- Optical Test Equipments
- Optical Cable Laying methods, procedures and processes

Professional Skill:

- Equipment Operating Skills
- OFC splicing and splice testing skills
- Technical Interpretation Skills
- Problem Solving Skills

Core Skill:

- Basic Reading and Writing Skills
- Communication Skills
- Basic Project Management Skills
- Interpretation Skills
- Interpersonal Skills

## Objective of the Course:

The person should be able to maintain tower sites which are live 24x7, maintain and repair level-1 faults/issues at telecom tower site, undertake preventive and corrective maintenance of the site equipment (Generator, Battery Banks, ACs, SMPS) and analyse & report/escalate faults.

## Learning Outcomes:

By the end of the training, the person should be able to perform the following activities:

- Site safety and hygiene
- Preventive Maintenance of site equipment
- Site Management
- Reporting and Documentation
- Corrective Maintenance of site equipment

## Expected Job Roles:

- Tower Technician

## Duration of the Course (in hours)

350 Hours

## Minimum Eligibility Criteria and pre-requisites, if any

- 10+2 / ITI/Diploma in Electrical/Mechanical including final year candidates
- 10+2 and/or ITI Diploma in Electrical/Mechanical including final year candidates
Professional Knowledge:

Functional knowledge of all site equipment, system components, special tools & equipments used for system repairs

Professional Skill:

Planning and Execution
Relationship Building
Analytical Skills
Technical Skills

Core Skill:

Comprehension Skills
Reading Skills
Oral Communication Skills

Level Code: L4  
Vertical Name: Telecom

Course Code: TL/S/L4/C003  
Course Name: 2.13.4 Handset repair Engineer (Level II) (TSSC)

Objective of the Course:
The person should be able to perform handset / tablet repair including hardware and software components and testing the handset for adequacy post repair.

Learning Outcomes:
By end of the training, the person should be able to perform the following activities:
- Obtain handsets / tablets from customer/ relevant teams
- Arrange for tools and spares
- Undertake Handset repair activities of Level II
- Safety requirements (Equipment & Self)
- Record parameters and generate compliance reports
- Determine change requirement
- Test effectiveness & close activity

Expected Job Roles:
Handset Repair Engineer (Level II)

Duration of the Course (in hours) 350 hrs
Minimum Eligibility Criteria and pre-requisites, if any

10+2 / ITI (Including final year candidate)

Professional Knowledge:

Functionality / features of handset, specific operating system (OS), hardware components like chipsets, processor etc., basic knowledge of GSM / CDMA, Windows & Android OS.
Test equipments
Handset repairing process, procedures
Troubleshooting techniques (software, fault finding)

Professional Skill:

Equipment operating Skills
Handset Repairing Skills
Handset/Component Handling skills
Troubleshooting Skills
Software Skills
Tablet Repairing Skills
Tablet Handling Skills

Core Skill:

Reading, Writing and Communication Skills
Time Management Skills
Analytical Skills
Interpersonal Skills
Oral Communication (Listening & Speaking Skills)

ESDM Courses

Level Code: L4  Vertical Name: Telecom

Course Code: TL/S/L4/C004 EL/S/L4/C035  Course Name: 2.13.5 Broadband Technician (TSSC/ESSCI)

Objective of the Course:
The person is responsible for installation, configuration and testing of CPE (modem, routers, and switches) for broadband access. He also establishes connectivity between CPE and end-user device (CPU, Laptop, tablets, Smart/IP TV etc.) at customer premises and carries out basic trouble-shooting for identifying, localizing & rectifying cable, connectivity and equipment fault in coordination with NOC.

Learning Outcomes:
By the end of the training, the person should be able to perform the following activities:

Prepare and undertake for wiring and equipment installation
Configure CPE, establish connectivity between CPE and end user device
Establish connectivity with service provider gateway
Record configuration setting and testing steps for customer
Locate and trouble shoot cable & connector fault
Rectify the faults with cable, connectors and CPE
UPS Installation and its handling
Complete documentation and clean-up worksite

Expected Job Roles:

Broadband Technician

Duration of the Course (in hours) 350 Hours
Minimum Eligibility Criteria and pre-requisites, if any

10+2

Professional Knowledge:

- Knowledge of Customer Premise Equipment (CPE), Cable Laying, Connectorisation, structured cabling norms
- Basic concepts of Network topologies, TCP/IP, Broadband Network Elements, Gateways, IP Address, Subnet masks, Ethernet and MAC Address, IPv4, IPv6
- Identification of cables and cable pairs and their maintenance
- Basic knowledge of EMI / EMC
- Basic knowledge of UPS and its handling

Professional Skill:

- Equipment installation / Task Management Skills
- Technical interpretation
- Equipment Configuration / Operating Skills
- Problem solving skills
- Analytical Skills
- Planning and Execution

Core Skill:

- Basic Reading & Writing Skills
- Communication Skills
- Reading Skills
- Oral communication Skills

ESDM Courses

Level Code: L4  Vertical Name: Telecom

Course Code: TL/S/L4/C005  Course Name: 2.13.6 Optical Fiber Technician (TSSC)

Objective of the Course:

The person should be able to guide/oversee 'Optical Fibre Splicer' and optical cable rollout activities and in carrying out efficient optical splicing, test its effectiveness by undertaking periodic preventive maintenance activities and ensuring effective fault management in case of fault occurrence and support installation and commissioning of optical fiber cables as per route plan.

Learning Outcomes:

By end of the training, the person should be able to perform the following activities:

- Carry out Inspection of route plan and obtain necessary clearances
- Arrange for tools and spares
- Coordinate trenching, cable laying, jointing and cable blowing activities
- Test effectiveness & close activity
- Obtain maintenance schedule and patrol assigned route section
- Carry out maintenance testing of dark/ spare OFC, equipments at points of Presence (POPs)
- Carry out planned repairs to the OFC
- Carry out maintenance of equipments at Points of Presence (POPs)
- Handling fault notifications on prompt basis
- Fault localization and rectification

Expected Job Roles:

- Optical Fiber Technician

Duration of the Course (in hours) 350 Hours
Minimum Eligibility Criteria and pre-requisites, if any

10+2

Professional Knowledge:

- Principle of OFC Communication
- Characteristics of OFC
- Important parameters of OFC Communication
- Optical Test Equipments
- Optical Cable Laying methods, procedures and processes

Professional Skill:

- Equipment Operating Skills
- OFC splicing and splice testing skills
- Technical Interpretation Skills
- Problem Solving Skills
- Managerial Skills

Core Skill:

- Basic Reading and Writing Skills
- Communication Skills
- Basic Project Management Skills
- Interpretation Skills
- Interpersonal Skills

Level Code: L5  Vertical Name: Telecom

Course Code: TL/S/L5/C006  Course Name: 2.13.7 Installation Engineer – SDH (Synchronous Digital Hierarchy) & DWDM (Dense Wavelength Division Multiplexing) (TSSC)

Objective of the Course:

An Installation engineer is responsible for installing SDH DWDM equipment in the site and carrying out site acceptance testing. As an optional responsibility the engineer may need to undertake commissioning of the site based on network topology.

Learning Outcomes:

By end of the training, the person should be able to perform the following activities:

- Installation of Equipment
- Acceptance Testing of Equipment
- Commissioning of Equipment

Expected Job Roles:

- Installation Engineer
- Testing & Commissioning Engineer

Duration of the Course (in hours) 400 Hrs
Minimum Eligibility Criteria and pre-requisites, if any

Diploma (including final year candidate)

Professional Knowledge:

- Basics of Telecom equipment & categories.
- Transmission media – Optical, Electrical.
- Equipment Safety (Earthing/lightning protection etc)
- Types of cables and connectors
- Site installation checklist and critical punch points.
- Installation procedures
- Acceptance Test process and procedures
- Commissioning of equipment and handing over
- Occupational Health & Safety

Professional Skill:

- Equipment Installation/Operating Skills
- Testing & Calibration skills
- Technical Interpretation Skills
- Analytical Skills
- Problem Solving Skills
- Managerial Skills

Core Skill:

- Basic Reading and Writing Skills
- Communication Skills
- Basic Project Management Skills
- Interpretation Skills
- Interpersonal Skills

ESDM Courses

Level Code: L3
Vertical Name: Telecom Industry Engineer

Course Code: TL/S/L3/C012
Course Name: 2.13.10 Telecom Industry Network Security Technician (TSSC)

Objective of the Course:
Telecom Industry Network Technician is a program for entry-level network engineers. The Telecom Industry Network Technician validates the ability to install, configure, operate, and troubleshoot medium-size routed and switched networks.

Learning Outcomes:
The Telecom Industry Network Technician course tests a candidate's knowledge and skills required to install, operate, and troubleshoot a small to medium size enterprise branch network. It also tests his knowledge to migrate changes required by employer in their current network design.

Expected Job Roles:
- Telecom Network Administrator
- Telecom Network L1 Engineer

Duration of the Course (in hours) 350 Hours
Minimum Eligibility Criteria and pre- ITI / Diploma

ESDM Courses

Level Code: L4  Vertical Name: Telecom (Passive Infra)

Course Code: TL/S/L4/C018  Course Name: 2.13.11 Telecom Tower Equipment Installer and Integrator (TSSC)

Objective of the Course:

To prepare the participant repair, install or maintain mobile or stationary radio transmitting, broadcasting, and receiving equipment and two-way radio communications systems used in cellular telecommunications, mobile broadband and radio equipment in service and emergency vehicles.

Learning Outcomes:

- Understand the installation process
- Acquire the knowledge, skills and aptitude required to install cables and telecommunications equipment in telecommunications central offices
- Usage of proper tools and methods and follow work instructions as per industry norms.
- Read work orders, blueprints, plans, datasheets or site drawings to determine work to be done.
- Inspect completed work to ensure all hardware is tight, antennas are level, hangers are properly fastened, proper support is in place, or adequate weather proofing has been installed.
- Bolt equipment into place, using hand or power tools.
- Test operation of tower transmission components, using sweep testing tools or software.
- Run appropriate power, ground, or coaxial cables.
Expected Job Roles:

| Tower Equipment Installer and Integrator |

Duration of the Course (in hours)

| 350 Hours |

Minimum Eligibility Criteria and pre-requisites, if any

| 10+2 pass / ITI |

2.14 Network Management

ESDM Courses

Level Code: L4  Vertical Name: Network Management

Course Code: TL/S/L4/C014  EL/S/L4/C039  Course Name: 2.14.1 Grass Root Telecom Provider (TSSC/ESSCI)

Objective of the Course:

To develop skills that allow an individual to keep ONT site operational, maintenance of hardware & repair of first level basic faults, promote use of devices among local population and provide services.
The individual will have working knowledge of following;
1. Functioning of E terminals, smart phones, CCU, SPV, TJB, Battery bank & fire extinguisher.
2. Troubleshooting for problems in equipment and carrying out basic repairs.
3. Preventive Maintenance of equipment at ONT site.

Learning Outcomes:

By participating & successfully completing this course,
1. The Individual will have good communication skills for undertaking effective customer service role.
2. Develop competency to provide back up support in terms of Preventive Maintenance, basic repairs.
3. The Individual will have a clear understanding of job requirements at ONT site and will be able to better understand and analyse technical issues.
**Expected Job Roles:**
1. Executive ON the Site-operations, Maintenance & repair.
2. Customer service support executive

**Duration of the Course**
350 hours

**Minimum Eligibility**
10+2 pass / ITI 10<sup>th</sup> + ITI, 12<sup>th</sup> pass

**Detailed Syllabus of Course**

2.15 Network Operation & Maintenance

ESDM Courses

Level Code: L4
Vertical Name: Network Operation & Maintenance

Course Code: TL/S/L4/C019
Course Name: 2.15.1 Telecom Industry Network Specialist (TSSC)

Objective of the Course:

It is designed for telecom network managers, professionals, senior network engineers and architects who are responsible for implementing and troubleshooting today's complex converged networks in enterprise networking environments.

Learning Outcomes:

Acquire skills required to install, operate, and troubleshoot a small to large size enterprise branch network. It also enables the candidate to implement changes required by Service Provider in their current network design.

Expected Job Roles:

- Telecom Network Administrator
- Telecom Network L2/3 Engineer

<td>3.1.1 Assembly Operator-RAC (Refrigerator, AC) (ESSCI)</td>
</tr>
</tbody>
</table>

**Objective of the Course:**

**Assembly Operator – Refrigeration and Air-conditioning (RAC):** RAC Assembly Operator assembles and connects together the various modules and parts of the refrigerator or air conditioner.

**Brief Job Description:** The individual at work is responsible for assembling and wiring up of various components, modules or sub-assemblies and systems to make the complete product.

**Personal Attributes:** The individual must: have strength to lift heavy parts and modules, ability to work in high-decibel noise environment and in a standing position for long hours

**Learning Outcomes:**

**NOS # ELE/N3506 Assemble Refrigerator**

1. Understand requirement from the supervisor
2. Assemble the refrigerator
3. Report problems to supervisor
4. Achieve productivity, quality and safety standards as per company’s norms

**NOS # ELE/N3507 Assemble Air conditioner**

1. Understand requirement from the supervisor
2. Assemble the air conditioner
3. Report problems to supervisor
4. Achieve productivity, quality, and safety standards as per company’s policy
ELE/N9902 - Coordinate with colleagues

1. Interact with superior
2. Coordinate with colleagues

ELE/N9903 - Maintain safe work environment

1. Follow standard safety procedures of the company
2. Participate in company's safety and fire drills
3. Maintain good posture at work for long term health

Expected Job Roles:

Assembly Operator-RAC

Duration of the Course (in hours) 350 hours

Minimum Eligibility Criteria and pre-requisites, if any

10TH + ITI or 12th Pass

Professional Knowledge:

NOS # ELE/N3506 Assemble Refrigerator

KA1. company's policies on: incentives, delivery standards and personnel management
KA2. reporting and documentation processes
KA3. importance of the individual's role in the workflow
KA4. reporting structure

KB1. electro-mechanical assembly instructions
KB2. general principles of wiring and assembly, methods used and purpose of each
KB3. circuit knowledge and functioning of different modules of the refrigerator
KB4. principles of refrigeration, sealing systems
KB5. methods of refrigeration and their uses
KB6. types of compressors such as reciprocating, rotary, centrifugal, scroll and their functions
KB7. different types of refrigerants such as R12, R22, R134a, R290, R600a, R410, R32
KB8. safety norms in handling hydrocarbon gases, nitrogen
KB9. fundamentals of electricity such as Ohms law, difference between AC and DC, series and parallel connections
KB10. basic electronics of components such as diode, transformer, LED, photo transistor, capacitor, resistor, inductor, thermisters
KB11. how to read values of resistors, capacitors, diodes and integrated circuits with specific reference to colour coding, polarity, orientation, tolerance
KB12. specific safety precautions that need to be taken while working in an electronic assembly unit
KB13. personal protective equipment/gear such as goggles, gloves, rubber base shoes, etc., to be worn while carrying out wiring activities
KB14. selection and maintenance of various tools used during the assembly process
KB15. frequently occurring errors in the assembly process, causes and preventive measures
KB16. continuous improvement processes and work place organization methods such as SS and Kaizen

NOS # ELE/N3507 Assemble Air conditioner

KA1. company’s policies on: incentives, delivery standards and personnel management
KA2. reporting and documentation processes
KA3. importance of the individual’s role in the workflow
KA4. reporting structure

KB1. electro-mechanical assembly instructions
KB2. general principles of wiring and assembly, methods used and purpose of each
KB3. circuit knowledge and functioning of different modules of the air conditioner
KB4. principles of refrigeration, understanding of sealed systems, methods of refrigeration and their uses
KB5. types of compressors such as reciprocating, rotary, centrifugal, scroll and their functioning
KB6. different types of refrigerants such as R12, R22, R134a, R290, R600a, R410, R32
KB7. safety norms in handling hydrocarbon gases, nitrogen
KB8. fundamentals of electricity such as Ohms law, difference between AC and DC, series and parallel connections
KB9. basic electronics of components such as diode, transformer, LED, photo transistor, capacitor, resistor, inductor, thermister
KB10. how to read values of resistors, capacitors, diodes and integrated circuits with specific reference to colour coding, polarity, orientation, tolerance
KB11. specific safety precautions that need to be taken while working in an assembly unit
KB12. personal protective equipment/gear such as goggles, gloves, rubber base shoes, etc., to be worn while carrying out wiring activities
KB13. selection and maintenance of various tools used during the assembly process
KB14. frequently occurring errors in the assembly process, causes and preventive measure.

NOS# ELE/N9902 - Coordinate with colleagues

KA1. company’s policies on: incentives, delivery standards, and personnel management
KA2. importance of the individual’s role in the workflow
KA3. reporting structure
KB1. how to communicate effectively
KB2. how to build team coordination

NOS # ELE/N9903 - Maintain safe work environment

KA1. company’s policies on: incentives, delivery standards, and personnel management
KA2. company occupational safety and health policy followed
KA3. company emergency evacuation procedure
KA4. company’s medical policy

KB1. how to maintain the work area safe and secure
KB2. how to handle hazardous materials, tools and equipment
KB3. emergency procedures to be followed such as fire accidents, etc.
KB4. long term value of good posture and use of appropriate handling equipment
Professional Skill:

i. Electro-mechanical assembling skills
ii. Using tools and machines
iii. Interpersonal skills
iv. Analytical and reflective skills
v. Decision making skills
vi. Reflective thinking

Core Skill:

1. Reading and Writing Skills
2. Team work
3. Multitasking
4. Documentation skills

Objective of the Course:
Mobile Phone Hardware Assembly Technician: This job holder in the electronics sector is responsible for assembling components to produce smartphone in line of work following given work instructions.

Brief Job Description: An assembly line technician (Smartphone) should be capable of assembling mobile phone components in correct position and alignment using approved techniques and equipment in a production unit. The candidate must ensure that given job duties are carried out in compliant with standard operational parameters.

Personal Attributes: Needs to be receptive to repetitive nature of work. Should possess an alert mind, manual dexterity and a physically active body. Capable of working in standing or sitting position for long hours. Should be flexible towards rotational job duties in an assembly line and be focused on delivering quality output. He/she should be open to owning responsibility to outcomes and work in a team.

Learning Outcomes:
- NOS # ELE/N 3901: Perform assembly operation of mobile phone using appropriate methods & equipment
  - Working safely
  - Preparing work place for smartphone assembling operations
  - Carrying out assembling of smart phones
  - Maintaining production assembly line
  - Post assembly operation activities
- ELE/N 3902: Carry out fixing operation of connectors and routing cables in a mobile phone assembly
  - Working safely
  - Preparing work place for smartphone assembling operations
  - Carry out fixing operation in smartphone assembly
  - Maintaining production assembly line
  - Post assembly operation activities
- ELE/N 1001: Use basic health and safety practices in electrical and electronics work
- Health and safety
- Fire safety
- Emergencies, rescue and first-aid procedures

- CSC/N 1336: Work effectively in team
- Working in a team

- Entrepreneurship Module

**Expected Job Roles:**

Assemblt Line Technician (Smartphone)

**Duration of the Course (in hours)**

| 350 Hrs |

**Minimum Eligibility Criteria and pre-requisites, if any**

| ITI/ 12th Pass |

**Professional Knowledge:**

NOS # ELE/N 3901: Perform assembly operation of mobile phone using appropriate methods & equipment

KA1. relevant legislation, standards, policies, and procedures followed in the company relevant to own employment and performance conditions
KA2. relevant health and safety requirements applicable in the work place
KA3. own job role and responsibilities and sources for information pertaining to employment terms, entitlements, job role and responsibilities
KA4. reporting structure, inter-dependent functions, lines and procedures in the work area
KA5. how to engage with specialists for support in order to resolve incidents and service requests
KA6. importance of working in clean and safe environment practices and procedures
KA7. relevant people and their responsibilities within the work area
KA8. escalation matrix and procedures for reporting work and employment related issues
KB1. importance of using appropriate personal protection equipment and how to minimize injury to self and others at work
KB2. possible risks and hazards involved in smartphone assembly operations
   Hazards: chemical hazards e.g. battery corrosion; exposed electrical wiring; exposure to (electrical shock, live power, noise, manual handling, improper working posture, etc.)
KB3. precautionary measures or safe working practices to be followed while working in an industrial unit
KB4. adherence to electrical safety practices when handling electrical equipment and tools
KB5. organization’s quality standards, standard operational parameters, safety compliance and relevant regulatory requirements in smartphone assembly operations
KB6. basic of electricals and electronics e.g. circuits (load, conductor, voltage), D.C & A.C. power source, current, etc.
KB7. basic units of measurement used in smartphone or other telecommunication equipment
KB8. diagrams, drawings and schedules pertaining to smartphone assembling
KB9. basic principle of electro static discharge (ESD) and protection methods
KB10. necessity of earthing systems arrangements and requirements
KB11. range of equipment and hand tools used in assembly operation of smartphone
KB12. key components of a smartphone and their functions
KB13. different types of smartphone connectors and their uses
KB14. range of materials used in smartphone
KB15. importance of product identification and key product descriptors used
KB16. various types of product category and trending smartphone features
KB17. list the types of smartphone assembling methods and their applications
KB18. different kinds of components securing techniques, equipment and fastening devices
KB19. use of ESD tray in a smartphone assembling
KB20. importance of following safe product/components handling techniques
KB21. role of correct components, positioning and aligning in an assembly operation
KB22. importance of identifying faults and defects in components
KB23. apply safe working practices during lifting and carrying heavy equipment
KB24. adherence to relevant regulatory requirements in smartphone assembly and production compliances
KB25. escalation matrix used to report technical problems or malfunction in tools, equipment, etc. to responsible authority
KB26. importance of leaving the work place in clean and safe condition after completing work
KB27. safe disposal of hazardous and non-hazardous waste materials
KB28. documenting work completion report with required information as per organization’s standard operational procedures
KB29. technical terminology, jargons, signs, symbols, etc. related to smartphone Assembly

ELE/N 3902: Carry out fixing operation of connectors and routing cables in a mobile phone assembly

KA1. relevant legislation, standards, policies, and procedures followed in the company relevant to own employment and performance conditions
KA2. relevant health and safety requirements applicable in the work place
KA3. own job role and responsibilities and sources for information pertaining to employment terms, entitlements, job role and responsibilities
KA4. reporting structure, inter-dependent functions, lines and procedures in the work area

ELE/N 1001: Use basic health and safety practices in electrical and electronics work

KA1. names (and job titles if applicable), and where to find, all the people responsible for health and safety in a workplace.

KA2. names and location of documents that refer to health and safety in the workplace

KB1. meaning of “hazards” and “risks”

KB2. health and safety hazards commonly present in the work environment and related precautions

KB3. possible causes of risk, hazard or accident in the workplace and why risk and/or accidents are possible

KB4. possible causes of risk and accident

Possible causes of risk and accident: physical actions; not following instructions; inattention; sickness and incapacity (such as drunkenness); health hazards (such as untreated injuries and contagious illness); not taking safety precautions

KB5. methods of accident prevention

Methods of accident prevention: training in health and safety
procedures; using health and safety procedures; use of equipment and working practices (such as safe carrying procedures); safety notices, advice; instruction from colleagues and supervisors

KB6. safe working practices when working with tools and equipment
KB7. safe working practices while working at various hazardous sites
KB8. where to find all the general health and safety equipment in the workplace

KB9. various dangers associated with the use of electrical equipment
KB10. positive isolation of electrical equipment and system
KB11. safe handling and disposal of hazardous wastes
KB12. risks of electric shock while using electrical equipment
KB13. various safety procedures and equipment used to work at heights, trenches and confined places
KB14. safe methods used to repair building surfaces
KB15. preventative and remedial actions to be taken in the case of exposure to toxic materials

Exposure: ingested, contact with skin, inhaled
Preventative action: ventilation, masks, protective clothing/equipment;
Remedial action: immediate first aid, report to supervisor

Toxic materials: solvents, flux, lead

KB16. importance of using protective clothing/equipment and other insulated work gear while handling electrical system and equipment
KB17. precautionary activities taken to prevent fire accident
KB18. various causes of fire

Causes of fires: heating of metal; spontaneous ignition; sparking; electrical heating; loose fires (smoking, welding, etc.); chemical fires; etc.

KB19. techniques of using the different fire extinguishers
KB20. different methods of extinguishing fire
KB21. different materials used for extinguishing fire
Materials: sand, water, foam, CO2, dry powder
KB22. building fire safety regulations
KB23. emergency rescue techniques applied during a fire hazard
KB24. various types of safety signs and what they mean
KB25. appropriate basic first aid treatment relevant to the condition e.g. shock, electrical shock, bleeding, breaks to bones, minor burns, resuscitation, poisoning, eye injuries
KB26. content of written accident report
KB27. potential injuries and ill health associated with incorrect manual handling
KB28. safe lifting, carrying and transporting practices
KB29. personal safety, health and dignity issues relating to the movement of
a person by others
KB30. potential impact to a person who is moved incorrectly

CSC/N1336: Work effectively in team

KA1. legislation, standards, policies, and procedures followed in the company relevant to own employment and performance conditions
KA2. reporting structure, inter-dependent functions, lines and procedures in the work area
KA3. relevant people and their responsibilities within the work area
KA4. escalation matrix and procedures for reporting work and employment related issues

The user/individual on the job needs to know and understand:
KB1. various categories of people that one is required to communicate and coordinate with in the organization
KB2. importance of effective communication in the workplace
KB3. importance of teamwork in organizational and individual success
KB4. various components of effective communication
KB5. key elements of active listening
KB6. value and importance of active listening and assertive communication
KB7. barriers to effective communication
KB8. importance of tone and pitch in effective communication
KB9. importance of avoiding casual expletives and unpleasant terms while communicating professional circles
KB10. how poor communication practices can disturb people, environment and cause problems for the employee, the employer and the customer
KB11. importance of ethics for professional success
KB12. importance of discipline for professional success
KB13. what constitutes disciplined behavior for a working professional
KB14. common reasons for interpersonal conflict
KB15. importance of developing effective working relationships for professional success
KB16. expressing and addressing grievances appropriately and effectively
KB17. importance and ways of managing interpersonal conflict effectively
Professional Skill:
Interpersonal skills
Behavioural skills
Reflective thinking
Critical Thinking
Decision Making
Using tools and machines

Core Skill:
Using tools and machines
Assembling Skills
Reading, writing and computer skills
Teamwork and multitasking
Communication skills

ESDM Courses

Level Code: V  Vertical Name: Consumer Electronics
Course Code: EL/M/L5/C048  Course Name: 3.1.3 Mobile Phone quality Inspector (ESSCI)

Objective of the Course:
Mobile Phone Hardware Assembly Technician: This job role in the electronics sector is responsible for final quality checking of finished assemblies in a mobile manufacturing unit.

Brief Job Description: A mobile phone quality inspector conducts physical inspection and functions testing of finished assemblies based on given physical and functions parameters. The job holder must comply with relevant quality standards and ensure final products meet production requirements. Personal

Attributes: Needs to be receptive to repetitive nature of work. Should possess an alert mind, good manual dexterity and a physically active body. Capable of working in standing or sitting position for long hours. Should posses good decision-making skills and be committed to delivering scheduled targets. Should also exhibit negotiation skills when faced with situations demanding rejection or acceptance of final products. He/she should be open to owning responsibility to outcomes and work in a team.

Learning Outcomes:
- NOS # ELE/N 4001: Perform physical inspection and functional testing of assembled mobile phone
- Working safely
- Preparing work place for inspection and testing activities
- Performing physical inspections & functions testing of assembled products
- Maintaining quality standards in production line
- Post inspecting & testing activities
- ELE/N 1001: Use basic health and safety practices in electrical and electronics work
- Health and safety
- Fire safety
- Emergencies, rescue and first-aid procedures
- CSC/N 1336: Work effectively in team
- Working in a team
Entrepreneurship Module

**Expected Job Roles:**

| Mobile Phone Quality Inspector |

**Duration of the Course (in hours):** 400 Hrs

**Minimum Eligibility Criteria and pre-requisites, if any:** Diploma / Other Graduates

**Professional Knowledge:**

ELE/N 4001: Perform physical inspection and functional testing of assembled mobile phone

KA1. relevant legislation, standards, policies, and procedures followed in the company relevant to own employment and performance conditions
KA2. relevant health and safety requirements applicable in the work place
KA3. own job role and responsibilities and sources for information pertaining to employment terms, entitlements, job role and responsibilities
KA4. reporting structure, inter-dependent functions, lines and procedures in the work area
KA5. how to engage with specialists for support in order to resolve incidents and service requests
KA6. importance of working in clean and safe environment practices and procedures
KA7. relevant people and their responsibilities within the work area
KA8. escalation matrix and procedures for reporting work and employment related issues
KB1. importance of using appropriate personal protection equipment and how to minimize injury to self and others at work
KB2. possible risks and hazards involved in smartphone assembly operations Hazards: chemical hazards e.g. battery corrosion; exposed electrical wiring; exposure to (electrical shock, live power, noise, manual handling, improper working posture, etc.)
KB3. precautionary measures or safe working practices to be followed while working in mobile production unit
KB4. adherence to electrical safety practices when handling electrical equipment

Recommended Software: 

Text Books: 

Reference Books: 

295
Objective of the Course:

The objective of this module is to provide the knowledge of basic characteristics of light sources. Basic parameters related with measurement of lights intensity, designing and assembling of LED based luminaries, etc. It familiarizes the participants with the basic terminology and various parts of Solar Panel, would cover manual assembly of LED light products. In addition, the participants would be familiarized with solar powered LED products.

Learning Outcomes:

Participant will be able to
- Design & develop LED based Product
- Solar panel installation
- Solar powered LED products

Expected Job Roles:

Acquire the foundation level knowledge required to use LEDs as light source, Design of low cost LED products for common use like Lanterns, table lamps, etc. Assembly of LED based luminaries, Use of Solar panel for energy applications, Installation of Solar Panel, Assemble and Maintenance of Solar Panel
Duration of the Course
(in hours) 350 hrs

Minimum Eligibility
Criteria and pre-
requisites, if any 10\textsuperscript{th} + ITI, 12\textsuperscript{th} pass.

Professional Knowledge:

Pass out would be able to understand:

PK 1. The operation and significance of various electronic, electrical and mechanical components of LED luminary,
PK 2. Product design basics and significance of optics,
PK 3. To handle LED’s and PCB’s, IP rating, ESD precautions,
PK 4. Assembly of SPV chargeable Light sources as Marketable products,
PK 5. Testing of SPV – Voltage & Current measurement at various intensities.
PK 6. Testing and calculating peak power output of SPV and comparing with specified ratings,
PK 7. Calculation and practical measurement of power output from SPV for various exposed area of SPV,
PK 8. Install and maintain solar panels of different ratings

Professional Skill:

The individual on the job needs to know and understand:

PS 1. How to operate machine/meters like drilling machine, multi-meter, soldering iron, cathode ray oscilloscope, LUX meter, PCB design software etc.,
PS 2. The skill to interact with customer to understand the problem faced in case of service and to analyze and identify the fault relating to solar powered LED products.
Core Skill:
Pass out would be able to read warnings, instructions and other text material on product labels, components etc. and interact with customers and colleagues

3.3 PCB Assembly

ESDM Courses

Level Code: L3  Vertical Name: PCB Assembly

Course Code: EL/M/L3/C012 TL/M/L3/C029  Course Name: 3.3.1 Through Hole Assembly Operator (ESSCI/TSSC)

Objective of the Course:

Through Hole Assembly Operator: Through hole assembly operator inserts electronic components for assembling the printed circuit board (PCB), as per the design, either manually or through automated machine.

Brief Job Description: The individual on the job is responsible for manually fixing components using hand tools, operating and maintaining the automated insertion machine used for placing different types of components on the through-hole PCBs.

Personal Attributes: The job requires the individual to have: attention to details, good eyesight, and ability to work for long hours generally in a standing or sitting position.

Learning Outcomes:

NOS # ELE/N5101 Perform through-hole assembly

1. Mount the prepared and binned components on the PCB manually
2. Operate the through-hole machine for automated assembling
3. Check visually after assembly is complete
4. Undertake preventive maintenance of the machine
5. Achieve productivity and quality standards

NOS # ELE/N9919 Work with superiors and colleagues

1. Interact with supervisor or superior
2. Coordinate with colleagues

ELE/N9920- Follow safety procedures

301
1. Understand potential sources of accidents
2. Use safety gear to avoid accidents
3. Understand the safety procedures followed by the company

**Expected Job Roles:**

| Through Hole Assembly Operator |

**Duration of the Course (in hours)**

| 350 hours |

**Minimum Eligibility Criteria and pre-requisites, if any**

| 10th + ITI or 12th pass |
Professional Knowledge:

NOS # ELE/N5101 Perform through-hole assembly

KA1. company’s policies on: incentives, delivery standards and personnel management and Intellectual Property Rights (IPR)
KA2. work flow involved in assembly process of the company
KA3. importance of the individual’s role in the workflow
KA4. reporting structure
KA5. profile of clients
KA6. component binning and stocking policy
KA7. safety and quality standards followed in the organization

KB1. basic electronics and component identification
KB2. components and forming
KB3. hand tools for manual assembly
KB4. Through-hole insertion machine types and their functions and controls
KB5. setting up, loading, basic programming of through-hole machine
KB6. basic characteristics of through-hole and SMT components
KB7. comparison between RoHS and Non-RoHS compliant solder
KB8. basics of soldering and types of soldering such as dry and cold solder
KB9. LEDs and mounting techniques
KB10. Spike correction techniques along with ESD and high-voltage soldering for LEDs
KB11. significance of junction temperature at PCB for light engine
KB12. metal core sink assembly for LEDs
KB13. colour codes and polarity of components
KB14. regulation of operating speed and temperature of machine
KB15. electro-static discharge (ESD) precautions
KB16. manual soldering and rework of components
KB17. handling the soldering iron, iron temperature, etc.
KB18. basics of wave soldering such as flux and their types, pre-heat conditions, wave profile
KB19. typical soldering problems such as solder short, effect of quantity of solder or flux
KB20. zero defect soldering
KB21. lead cutting and component lifting
KB22. PCB design basics
KB23. commonly occurring machine problems
KB24. IPC standards for PCBs

**NOS # ELE/N9919 Work with superiors and colleagues**

KA1. company’s policies on: incentives, delivery standards, and personnel management
KA2. work flow involved in company’s process
KA3. importance of the individual’s role in the workflow
KA4. reporting structure

KB1. how to communicate effectively
KB2. how to build team coordination

**NOS # ELE/N9920 Interact with co-workers**

KA1. company’s policies on handling: harmful chemicals and sharp tools, safety and hazards of machines, fire safety/drill, first aid and, disposal of harmful chemicals and materials, quality standards
KA2. company occupational safety and health policy followed
KA3. company emergency evacuation procedure
KA4. company’s medical policy

KB1. how to maintain the work area safe and secure
KB2. how to handle hazardous material
KB3. how to follow safety procedures while operating hazardous tools and equipment
KB4. emergency procedures to be followed such as fire accidents and fire safety education
KB5. how to use machines and tools without causing bodily harm
KB6. first aid execution
KB7. disposal of hazardous chemicals, tools and materials by following prescribed environmental norms or as per company policy
Professional Skill:

i. Decision making
ii. Reflective thinking
iii. Using tools and machines
iv. Analytical and reflective skills
v. Critical thinking
vi. Handling safety equipment

Core Skill:

1. Reading and Writing Skills
2. Team work
3. Multitasking
4. Communication Skills

<tr>
<td>Course Code:</td>
<td>EL/M/L3/C013, TL/M/L3/C030</td>
</tr>
<tr>
<td>Course Name:</td>
<td>3.3.2 Circuit Imaging Operator (ESSCI/TSSC)</td>
</tr>
</tbody>
</table>

### Objective of the Course:

**Circuit Imaging Operator:** Also known as ‘Photo Imaging Operator’, the Circuit Imaging Operator imprints the circuit design layout on the laminated printed circuit board (PCB) with ultraviolet (UV) light exposure.

**Brief Job Description:** The individual at work places the circuit design layout printed on a ‘positive’ translucent film on the laminated and photo-sensitive PCB panel and exposes it to UV light, thereby curing the photo-resist under the clear portions of the film in order to get the circuit printed onto the panel.

**Personal Attributes:** The job requires the individual to have: attention to details, hand-eye coordination, appreciation for accuracy, ability to lift heavy panels and orientation towards work safely

### Learning Outcomes:

**NOS # ELE/N2201 Imprint circuit layout on PCB panel**

1. Clean the PCB panels and prepare for UV exposure
2. Set up the machine and laminate dry film rolls on the panel
3. Expose the laminated panel to UV light
4. Develop the circuit image on the panel
5. Undertake preventive maintenance of the machines
6. Achieve productivity and quality standards

**NOS # ELE/N9917 Interact with superiors and colleagues**

1. Interact with supervisor or superior
2. Coordinate with colleagues

**ELE/N9918- Follow safety standards**
1. Understand potential sources of accidents
2. Use safety gear to avoid accidents
3. Understand the safety procedures followed by the company

**Expected Job Roles:**

Circuit Imaging Operator

**Duration of the Course (in hours)**

350 hours

**Minimum Eligibility Criteria and pre-requisites, if any**

10th pass

**Professional Knowledge:**

**NOS # ELE/N2201 Imprint circuit layout on PCB panel**

- KA1. company’s policies on: incentives, delivery standards and personnel management and IPR
- KA2. PCB manufacturing process of the organization
- KA3. importance of the individual’s role in the workflow
- KA4. organizational capabilities with respect to input materials/processes
- KA5. reporting structure and be clear about the hierarchy
- KA6. documentation procedures
- KA7. safety and quality standards followed in the organization

- KB1. basic electronics and circuit design layouting
- KB2. UV, photo resist, light exposure time and intensity, vacuum, alignment and their importance in the circuit imaging process
- KB3. operation and maintenance of machines such as laminator, imaging and developing machines
- KB4. circuit imaging process including surface preparation, lamination, exposure, cooling and developing
- KB5. photo tools, i.e, negatives or positives, development of the UV cured circuit, chemicals used for developing, etc.
- KB6. different types of imaging processes other than ultraviolet exposure and their uses
- KB7. different types of films and chemicals used in imaging and their purpose
- KB8. manual and automated exposure machines and standard procedures
- KB9. dry film resist (DFR) lamination and development including process parameters, chemicals, calibration,
exposure time, etc.
KB10. probable defects in imaging process
KB11. environment and safety norms to follow
KB12. defects in machines and remedies with causes
KB13. IPC standards for printed circuit boards

NOS # ELE/N9917 Interact with superiors and colleagues
KA1. company’s policies on: incentives, delivery standards, and personnel management
KA2. work flow involved in company’s process
KA3. importance of the individual’s role in the workflow
KA4. reporting structure

KB1. how to communicate effectively
KB2. how to build team coordination

Professional Skill:

i. Reflective Thinking
ii. Operating Machines and Material Handling
iii. Problem solving
iv. Critical Thinking
v. Decision Making
vi. Handling Safety Equipment

Core Skill:

1. Reading and Writing Skills
2. Team work
3. Communication skills
4. Multitasking

### ESDM Courses

**Level Code:** L4  
**Vertical Name:** Electronics Product Design

**Course ID:**  
- NL/M/L4/C015  
- TL/M/L4/C036  
- EL/M/L4/C028

**Course Name:**  
3.4.1 Computer Aided Product Design (NIELIT/TSSC/ESSCI)

**Objective of the Course:**
To train students in the area of Electronic Product Design

**Learning Outcomes:**
After completion of the training, participants would be able to:
- Prepare working Drawings of Electronics products  
- Do the work on 2D Engineering drafting  
- To apply this knowledge to understand the engineering design work flow  
- Process in the Industry  
  - Acquire knowledge of basic 3D modeling concepts.

**Expected Job Roles:**
Act as a Product Designer of Electronics Products

**Duration of the Course (in hours):** 360 Hrs

**Minimum Eligibility Criteria and pre-requisites, if any:** Polytechnic Diploma/Graduation/ ITI/12th/10th

**Professional Knowledge:**
- Making plan of Projection.  
- Creation Multi-view Orthographic projection.  
- Drafting views in First angle & Third angle Projection.
- Creating Auxiliary views & Sections.
- Freehand Sketching.
- Representing Standard base 2D drafting.
- Modeling
  - Solid Modeling – Extrude sketch geometry,
  - Sweep geometry along a path, revolve
  - sketch geometry, Coil feature, Rib & Web feature.
  - Create hole feature on part, Create a shell feature with varying thickness.
  - Add chamfer & edge fillet feature to a part.
- Surface Modeling – Create a curved surface, Revolved surface, Ruled Surface, Edge Surface.
- Creating 3D Solid drawing with template, using Title block, Detailing & Section view

Professional Skill:
- Practise on Drawing basics
- Geometrical Drawing Practise
- Making Projection.
- Creation Multi-view Orthographic projection.
- Drafting views in First angle & Third angle Projection.
- Creating Auxiliary views & Sections.
- Freehand Sketching.
- Representing Standard base 2D drafting.
- Drawing with Elementary CADD command – Line, Polyline, Polygon, Circle, Polyline, arc, ellipse, Text- Single Text, Multitext, Dtext.
- Modifying Elementary Commands – Erase, Move, Copy, Mirror, Offset, Scale, Stretch, Chamfer, fillet & explode.
- Making layers, line type & Lineweight.
- Different menus of Auto-Cad, Function keys, Shortcut keys, Paper size.
- Making Title Block, Writing it & inserting it in any drawing file with scale, angle & explode options.
- Creating a new template file (.Dwt file) & applying it to every drawing file.
- Drafting of building plan, Elevation, Section Views.
- Applying dimensions to various views by using dimension style.
- Creating Revolved, Ruled, and Tabulated & Edge surfaces.
- Creating Isometric drawing with the Isoplane (Left, Top & Right Plane)
- Making Solid Model – Box, Polysolid,
  - Building Model.
- Modeling
  - Solid Modeling – Extrude sketch geometry,
  - Sweep geometry along a path, revolve
  - sketch geometry, Coil feature, Rib & Web feature.
  - Create hole feature on part, Create a shell feature with varying thickness.
  - Add chamfer & edge fillet feature to a part.
- Surface Modeling – Create a curved surface, Revolved surface, Ruled Surface,
  - Edge Surface.
- Creating 3D Solid drawing with template, using Title block, Detailing & Section view.
- Apply material, background, light – Point, Distance, Spot light, landscaping.
- Making slide & running run script file.
- Creating view ports & views & plotting it.
- Creating a flat & flange wall in sheet metal modeling.
- Constraining component by mating plane faces.
- Creating assembly components in place.
- Creating component pattern.
- Copying & mirroring assembly.
- Project-

Core Skill:

Introduction
- Principle of drafting, Terminology, & fundamentals.
- Size & shape descriptions.
- Geometric Construction.

Views
- Plan views, Auxiliary views, Section Views.

Projection
- Method of Projection.
- Multi-view Orthographic Projection.
- Projection Techniques.

Modeling
- Modeling Fundamental for Engineering design
- Shape Modeling and it’s application.

CADD
- Introduction of CADD (Computer Aided Drafting & Designing).
- Function keys, Shortcut keys,
- Different sizes of paper.
- Application of CADD – Automatic Drafting,

Geometric Modeling
- CADD Application & it's feature
  - Introduction to Standard based 2D drafting
- 3D Design
  - Concept of 3D Design.
  - X, Y, Z Co-ordination System.
- Documentation
  - Manufacturing Process & Material

Detailed Syllabus of Course

| ➢ Module-I | Creating a Simple Drawing
  ▫ Getting Started with AutoCAD
    o Starting AutoCAD
    o AutoCAD’s Screen Layout
    o Working with Commands
    o Opening an Existing Drawing File
    o Saving Your Work
    o AutoCAD’s Cartesian Workspace
  ▫ Drawing & Editing Commands
    o Drawing Lines
    o Erasing Objects
    o Drawing Lines with Polar Tracking
    o Drawing Rectangles
    o Drawing Circles
    o Viewing Your Drawing
    o Undoing and Redoing Actions |
|            |                                     | 40Hrs                                  |
| ➢ Module-II| ▫ Drawing Precision in AutoCAD
  o Using Object Snap
  o Object Snap Overrides
  ▫ Polar Tracking Settings
    o Object Snap Tracking
    o Drawing with SNAP and GRID
  ▫ Making Changes in Your Drawing
    o Selecting Objects for Editing |
<p>|            |                                     | 60 Hrs                                 |</p>

</tr>
</thead>
<tbody>
<tr>
<td>Course Name:</td>
<td>3.5.1 Automation Technology – Basic Level (NIELIT/ESSCI)</td>
</tr>
</tbody>
</table>

### Objective of the Course:

- Student will be exposed to cutting edge technologies in automation, knowledge new developments in automation.
- Student will be industry ready for Automation technology hydraulic pneumatic and electric automation.
- The students are also equipped with good Communicative English Skills, soft Skills and Basic IT skills required for good performance in any job in the modern world.

### Learning Outcomes:

- Students will be able to read and understand the circuit and process in any of the trained areas. They will be able to perform the specification reading and suggest sensors as per requirement. They can also do troubleshooting to a certain extend.
- Have Good Communicative English Skills, Soft Skills and Basic IT Skills

### Expected Job Roles:

- Helper and assistants in regular production areas, quality, logistics and maintenance areas

### Duration of the Course (in hours)

- For Technical Students: 330 Hrs
- Non Technical Students: 390 Hrs

### Minimum Eligibility Criteria
and pre-requisites, if any

Diploma in Electronics/Instrumentation/ Mechanical/Electrical – for Technical students.
Non Technical Students: 12th pass with science background and affinity towards technical studies.

Professional Knowledge:

To be competent, the user/ individual must be able to:
PK1. Understand the overview of automation
PK2. Different devices used in Automation,
PK3. interact with the technical lead engineer in order to understand the work schedules,
PK4. understand the roles and responsibilities of the work
PK5. understand broad level activities involved in the Industrial automation
PK6. list the various department to interact with for completing the work
PK7. interact with higher officials to understand the specifics of work
PK8. understand the different Communication Protocols/Field Buses
PK9. establish module requirement and constraints
PK10. understand Network Settings/Communication Settings
PK11. understand the PLC Software
PK12. understand the basics of electro pneumatics
PK13. define the design flow for the specific system
PK14. use agreed language and application as per standards
PK15. define the requirement specification of the electro pneumatics
PK16. get approval from superior and relevant department on the electro pneumatics
PK17. Understand different types of pumps
PK18. Understand different types of valves
PK19. understand the functionality of the electro pneumatics
PK20. assist in system testing, product verification and validation

Professional Skill:

PS 1: Overview of Automation System
PS 2: Overview of Switchgears.
PS 3: Different Communication Protocols/Field Buses
PS 4: Introduction to PLC
PS 5: Network Settings/Communication Settings
PS 6: Digital Signals/IO’s, Relay Logic
PS 7: Timer/Counters/Triggers/FlipFlops,
PS 8: Trouble Shooting the PLC programming errors
PS 9: Basic and electrohydraulics
PS 10: Force pressure and weight
PS 11: Laminar and turbulent flow
Core Skill:

The individual on the job needs to know and understand:

CS1. specifications and use of automation system used by the organisation
CS2. licensed software and application tools used for design, their performance
CS3. PLC Programming using Ladder Logic
CS4. Efficient in working with any kind of Hydraulics & Pneumatic Systems
CS5. how to interact with higher officials to understand the work requirement
CS6. how to interact with co employees in order to co-ordinate work processes

Interpersonal skills

CS7. to improve work processes
CS8. to reduce repetition of errors

Detailed Syllabus of Course

Module 1 PLC

Overview of Switchgears: What is a Relay and its applications? Introduction to Switching devices like Contactors, Solenoids, MCB’s etc., Symbolic representation of different electrical & electronic components in wiring diagram.

Switches & Reed switches, Introduction to PLC, Comparison of PLC & PC, What is a PLC?, How does a PLC work? Applications of PLC, Block Diagram of PLC, Processing cycle of PLC, Different types of PLC’s available in the market, Programmable Logic Controller, Specifications of PLC, Onboard/Inline/Remote IO’s, Memory Allocation in PLC, What is Scan time of PLC? IO handling capacity of different PLC, Remote connectivity in PLC, Internal Structure of PLC, Hardware Details of the PLC, Wiring and Connection Techniques, Safety Measures for handling the PLC, Diagnosis of PLC Status and other hardware connected to PLC.

Network Settings/Communication Settings: Introduction to PLC Software, Overview of Software/Software at a glance, Hardware Configuration Communication Settings for PLC, PLC Programming, Building simple logic in PLC (AND/OR/NOT), Online & Offline Change, Overview of different types of Data types in PLC programming, Standard format for addressing the variables, Standard Time formats, Rules for Declaration of Variable names, Working with Digital Signals/IO’s, Relay Logic, Difference between Function & Function Blocks, Introduction to Timer/Counters/Triggers/FlipFlops, Exercises based on Timers, Counters, Flip Flops & Triggers, Usage of Mathematical Operators, Comparators, Conversion Operators, Multiplexers & Logical Gates in the PLC Program, Exercises based on the above operators, Compilation & Downloading the program to PLC, Trouble Shooting the PLC programming errors, Local & Global Variables, Working with Analog Signals/IO’s, Developing a program for process control, Declaration in Tabular Format, Display of Address and Comments in Logic, Jump & Return Command, Commands like Run, Stop, Reset, Reset Original, Breakpoint etc, Developing User Defined Function Blocks & Functions in the PLC program, Conditional & Unconditional Calling in PLC Program, Task, Configuration, Visualization, Developing user defined Data Types in PLC program, Password Management, Different Methods to take the PLC Program Backup (Source Code Download/Upload, Archive/Restore & Export/Import), Library Management, Target Settings, Running the PLC program in Simulation Mode, Master/Slave Configuration, Data Exchange between the Master & Slave PLC

**Practical / Tutorial Hours**: 48

Module II

**Basic and electrohydraulics**

Force pressure and weight, Pascal’s Law, Calculations : Pascal’s Law, Application of Pascal’s Law, Force Multiplication, Pressure Multiplication, Displacement transmission, Calculations, Units of pressure., What does 1bar mean? Absolute and relative pressure, What is flow rate? Flow law, Calculation, Open, Types of flow : Laminar and turbulent flow, Reynolds’s number,
Throttling, Graphical Symbols and Circuit Diagrams ISO 1219, Purpose of graphical symbols, Function of symbols, Basic elements, Circuit diagram Commonly used symbols, Circuit symbols., Symbols for energy supply and processing unit (Power Pack), Symbols for Hydraulics energy control units (Pressure, Flow and Direction), Symbols for Energy conversion units (Actuators), Symbols for accessories, Demonstration of Hydraulics circuits, Hydraulic circuit with manual DCV and a cylinder, Hydraulic circuit with manual DCV and a Hydraulic motor, Hydraulic circuit with solenoid DCV and cylinder and a motor, Demonstration of speed and direction changes in Hydraulic circuit, Hydraulic Fluids, Main functions of Hydraulic fluids, Functions, Capacity and Constructions of Tanks, Calculation, Requirements of Hydraulic fluids, Types of Hydraulic Fluids, Viscosity of Hydraulic fluid, Relation between temperature and viscosity, Selection of Hydraulic fluid for an applications, Compressibility of Hydraulic fluids, Thermal expansion of Hydraulic fluids, Fluid Analysis, Hydraulic Pumps, Functions and Operating principle Hydraulic pumps, Differentiate b/w positive and non – positive displacement pumps, Characteristics of standard Hydraulic pumps, Construction and Operating principle following pumps, i. External and internal gear pumps, ii. Vane pumps, iii. Axial piston pumps, iv. Radial piston pumps, Selection criteria of pumps, Flow rate and pump power, Efficiency, Hydraulic Cylinder, Operating Principle, Components of a Hydraulic cylinder, Functions of Hydraulic cylinder, Design and operation, Types of cylinder, Types of design, i. Tie rod cylinders, ii. Mill type cylinders, Technical specification, End positioning cushioning, Cylinder mounting, Hydraulic Motors, Functions of Hydraulic Motors, Characteristics of standard Hydraulic Motors, Selection of Hydraulic motors, Calculations, Efficiency, Pressure Control Valves, Introduction, Function and operating principle of pressure relief valve, direct operated, Pressure relief valve in series and parallel, Pressure relief valve, pilot operated, Function and operating principle of pressure reducing valve, Pressure sequence valve, direct operated, Directional Control Valve, Operation and Function, Special characteristics, Types of directional control valves, Spool design, Poppet design, Types of actuation of spools with symbols, Directional spool valves, direct operated, Directional spool valves, pilot operated, Designation of Directional control valves, Operation of solenoid, Solenoid operated valves and its symbols, Standard spool valve : G spool, E spool, J spool and H spool, Comparison of spool Vs poppet valves, Flow Control Valves, Functions, Throttle valves, Viscosity dependent throttle valves, Types of mounting, Throttle valve independent of viscosity, Flow control valves, 2-way flow control valves, Upstream pressure compensator, Downstream pressure compensator, Applications of 2-way flow control valve, Meter-in flow control, Meter-out flow control, Check Valves, Operation and function of a simple check valve, Check valve, pilot operated, Double pilot operated check valve, Applications of check valves,

**Project:** Hydraulic pump, characteristic Curve, Single-rod cylinder, pressure intensification, Single-rod cylinder, flow, Hydraulic motor, 4/3 directional valve, Check valve, Check valve, pilot operated, Throttle valve, adjustable, Throttle check valve, Flow control valve, Pressure relief valve, direct operated, controls, Pressure reducing valve:

*Theory / Lecture Hours: 32*

*Practical / Tutorial Hours: 48*
Module III

**Basic & Electro Pneumatics**

Fluid power, Advantages, Pneumatics, Definition, Characteristics of Industrial Pneumatics, advantages and its limitations, Comparisons of Drives - Pneumatics Vs Hydraulics, Electrical/Electronics & Mechanical, Applications of Pneumatics, Compressed Air Generation and Contamination Control, Compressed Air for transmitting power, Composition of Atmospheric Air, force, weight, pressure, Pascal’s Law, Application of Pascal’s Law, Force Multiplication, Pressure Multiplication, Displacement transmission, Calculations, Gas Laws, Air compression process, Absolute and relative pressure. Flow rate, Characteristics of compressed air, Graphical Symbols and Circuit Diagrams ISO 1219, Purpose of graphical symbols, Function of symbols, Basic elements, Circuit diagram, Commonly used symbols, Circuit symbols., Symbols for Maintenance unit, Symbols for Pneumatic energy control units (Pressure, Flow and Direction ), Symbols for Energy conversion units (Actuators), Symbols for accessories, Demonstration of Pneumatic circuits, Pneumatic circuit with manual DCV and a cylinder, Pneumatic circuit with solenoid DCV and cylinder and a motor, Demonstration of speed and direction changes in Pneumatic circuit, Compressed Air Generation and Contamination Control, A typical Pneumatic system, Air compressors, Classification of Compressors, Terms and Definition : Delivery volume, Pressure, Drive , Cooling and Regulation, Piston Compressor, Screw Compressor, Vane Compressor, Compressor unit, Preparation of compressed Air, Stages of Preparation, Drying of Compressed Air, Distribution of Compressed Air, Pneumatic Actuators, Introduction, Basic Actuator Functioning, Thrust, Cylinder Air Consumption, Cylinder speed and its relation to flow rate, Stroke Length, Piston –rod buckling, Classification of Pneumatic Actuators, Linear Actuators, Single-Acting cylinder, Double-Acting cylinder, Cylinder cushioning, Classification of cylinders According to Duty, Cylinder with Magnetic Piston, Cylinder with Non-Rotational Guiding, Rodless Cylinder, Tandem Cylinder, Rotary Actuator, Semi-Rotary Actuators, Pneumatic Valves and Control Circuits, Introduction, Classification of valves, Functional Classification of Valves, i. Directional control valves, ii. Pressure control valves, iii. Flow control valves, iv. Non return valves, Graphical Representation, Port Markings, Ports and Positions, Graphical symbols for DC valves, Methods of DC Valve Actuations, 3/2-Directional Control valve, i. NC-type 3/2-DC valves, ii. NO-type 3/2-DC valves, Non-Return Valves, Flow control valves, Throttle valve and Throttle check valves, Pneumatically Actuated 3/2-DC valve, Manually actuated 5/2-DC valve, Pneumatically actuated 5/2-DC valve, Speed control of Double-Acting Cylinder, 5/2-DC Double-Pilot valve, Login Controls, Pneumatic, i. Shuttle valve, ii. Twin pressure valve, iii. Applications of Logic valves, Structure of Pneumatic Circuits, Automatic Control, Roller valve, Quick-Exhaust valve, Time-Delay valves, Pressure Control Valves, Introduction, Function and operating principle of pressure relief valve, direct operated Pressure regulator

control 2 double-acting cylinders w/o overlapping signals, Seq. control 2 double-act. cylinders, signal overlapping, idle return rollers, Pilot control of a single-acting cylinder with spring return valve, Pilot control of a double-acting cylinder with spring return valve, Holding-element control of a double-acting cylinder with impulse valve, directly controlled, Holding-element control of a double-acting cylinder with impulse valve, relay, Basic circuit with AND Function, Basic circuit with OR Function

Theory / Lecture Hours: 32
Practical / Tutorial Hours: 48

Total Course Theory / Lecture Hours: 96
Total Course Practical / Tutorial Hours: 144
Total Course Hours: 240

(Training in 100 hrs of Communicative English and 80 hrs of Basic IT Skills also provided, as required)

Recommended Hardware:
State of the art Training system for Hydraulics, Pneumatics, Sensoric and PLC

Recommended Software:
Automation studio, web trainers, Indraworks and Indralogic

Text Books:
- Hydraulics. Basic Principles and Components (Bosch Rexroth AG) Volume 1
- The Pneumatic Trainer – Basic Pneumatics Volume 1 (Bosch Rexroth AG)
- The Pneumatic Trainer – Volume 2 (Bosch Rexroth AG)
- Sensors in Theory and Practice – Textbook (Bosch Rexroth AG)
- Basics of Indraworks and Indralogic (Bosch Rexroth AG)

- Herbert R. Merritt, Hydraulic control systems, John Wiley & Sons, Newyork,
### Reference Books:

- R.Srinivasan Hydraulic and Pneumatic Control published by Vijay Nicole Imprints Private Ltd.
- Programmable Logic Controllers by W.Bolton
- Programmable Logic Controllers by Hugh Jack

### Evaluation criteria:
Level Code: L4  Vertical Name: Industrial Automation

Course Code: NL/M/L4/C013  EL/M/L4/C026  Course Name: 3.5.2 Certificate in robotic programming and maintenance (NIELIT/ESSCI)

Objective of the Course:

- Use the safety devices
- Familiar with necessary safety precautions for working with Industrial Robot.
- Familiarization to industrial robot and its application.
- Skill to programme an Industrial robot.
- Skill to operate an Industrial Robot.
- Familiarization to Robot Maintenance & Safety

Learning Outcomes:

Understanding about Robots, and to get basic training an industrial Robot (operation, maintenance, safety)

Expected Job Roles:

Industrial robot programmer, Robot operator, Maintenance technician etc, in robotic companies

Duration of the Course (in hours): 325HRS

Minimum Eligibility Criteria and pre-requisites, if any: 12th pass
Professional Knowledge:

- Understanding safety measures in Robotic field
- Robotic components recognition
- Manipulating the robot.
- Identifying the movements of a robotic arm
- Robot programming

Professional Skill:

- Programming of an Industrial Robot
- Operating of an Industrial robot.
- Safety measures and maintenance of an Industrial robot.

Core Skill:

1. To be able to understand an Industrial production cycle.
2. To be able to understand about the basics of robot.
3. To be able to work with the robot operating and maintenance with greatest safety.
4. To be able to work in robotic industry either in assembly units or in manufacturing.
5. To be able to handle the industrial robot.

**Total Course**

**Theory / Lecture Hours:** 49  

**Total Course Practical / Tutorial Hours:** 276  

**Total Course Hours:** 325  

(Training in 100 hrs of Communicative English and 80 hrs of Basic IT Skills also provided, as required)

**Recommended Hardware:**
- Industrial Robot
- End effector
- Relevant components for a specific job.

We are providing Robot,
1) Fanuc LR mate200iC  
2) Fanuc LR mate200iD  
3) Pneumatic Gripper

**Recommended Software:**
- Robot simulator (robo sim)

**Text Books:**
- Robotics and Control - RK Mittal, I J Nagrath  
- Trainees handbook by NTTF, Robotics trainers manual by NTTF.

**Reference Books:**
- Industrial Robotics By Michel P Groover, Robotic Engineering By Dr. Surender Kumar, Dr. S K Mukherjee, Robotics and Control — RK Mittal, I.J.Nagrat.
ESDM Courses

Level Code: L5  
Vertical Name: Industrial Automation

Course Code: NL/M/L5/C018
EL/M/L5/C031  
Course Name: 3.5.3 Automation Technology – Intermediate Level (NIELIT/ESSCI)

Objective of the Course:
To get an overview of automation technology. With hands on and theoretical knowledge on basics of Hydraulics, Pneumatics, Sensors and PLC.
The students are also equipped with good Communicative English Skills, soft Skills and Basic IT skills required for good performance in any job in the modern world.

Learning Outcomes:
At the end of the level one the student will be able to identify basic components of automation technology, gets an idea on the overall working of the system and shall be able to troubleshoot on an intermediate level.
Have Good Communicative English skills, Soft skills & Basic IT Skills

Expected Job Roles:
 Assistants in regular production areas, quality, logistics and maintenance areas

Duration of the Course (in hours)
Technical Students ~400 Hrs
Non-Technical Students ~450 Hrs

Minimum Eligibility Criteria and pre-requisites, if any
Diploma in /Electronics/Instrumentation/ Mechanical/Electrical – for Technical
Professional Knowledge:

To be competent, the user/individual must be able to:
PK1. Understand the overview of automation
PK2. Different devices used in Automation,
PK3. interact with the technical lead engineer in order to understand the work schedules,
PK4. understand the roles and responsibilities of the work
PK5. understand broad level activities involved in the Industrial automation
PK6. list the various department to interact with for completing the work
PK7. interact with higher officials to understand the specifics of work
PK8. understand the different Communication Protocols/Field Buses
PK9. establish module requirement and constraints
PK10. understand Network Settings/Communication Settings
PK11. understand the PLC Software
PK12. understand the basics of electro hydraulics
PK13. define the design flow for the specific system
PK14. use agreed language and application as per standards
PK15. define the requirement specification of the electro pneumatics
PK16. get approval from superior and relevant department on the electro pneumatics
PK17. Understand different types of pumps
PK18. Understand different types of valves
PK19. understand the functionality of the electro pneumatics
PK20. assist in system testing, product verification and validation
PK21. understand the functionality of the electro hydraulics
PK22. understand the functionality of the HMI

Core Skill:

The individual on the job needs to know and understand:

CS1. specifications and use of automation system used by the organisation
CS2. licensed software and application tools used for design, their performance
CS3. PLC Programming using Ladder Logic
CS4. Efficient in working with any kind of Hydraulics & Pneumatic Systems

Interpersonal skills

CS5. how to interact with higher officials to understand the work requirement
CS6. how to interact with co employees in order to co-ordinate work processes

Reflective thinking

CS7. to improve work processes
CS8. to reduce repetition of errors

Detailed Syllabus of Course

Module 1 PLC

Overview of Switchgears: What is a Relay and its applications? Introduction to Switching devices like Contactors, Solenoids, MCB’s etc., Symbolic representation of different electrical & electronic components in wiring diagram.

Introduction to Different Communication Protocols/Field Buses: Ethernet, RS232, Profibus DP, Canopen, Devicenet, Sercos II & III, Modbus, Profinet, Ethercat, Different types of Signals, Digital Signal, Analog Signal, Overview of Limit Switches, Proximity Switches & Reed switches, Introduction to PLC, Comparison of PLC & PC, What is a PLC?, How does a PLC work? Applications of PLC, Block Diagram of PLC, Processing cycle of PLC, Different types of PLC’s available in the market, Programmable Logic Controller, Specifications of PLC, Onboard/Inline/Remote IO’s, Memory Allocation in PLC, What is Scan time of PLC? IO handling capacity of different PLC, Remote connectivity in PLC, Internal Structure of PLC, Hardware Details of the PLC, Wiring and Connection Techniques, Safety Measures for handling the PLC, Diagnosis of PLC Status and other hardware connected to PLC.

Network Settings/Communication Settings: Introduction to PLC Software, Overview of Software/Software at a glance, Hardware Configuration Communication Settings for PLC, PLC Programming, Building simple logic in PLC (AND/OR/NOT), Online & Offline Change, Overview of different types of Data types in PLC programming, Standard format for addressing the variables, Standard Time formats, Rules for Declaration of Variable names, Working with Digital Signals/IO’s, Relay Logic, Difference between
Function & Function Blocks, Introduction to Timer/Counters/Triggers/FlipFlops, Exercises based on Timers, Counters, Flip Flops & Triggers, Usage of Mathematical Operators, Comparators, Conversion Operators, Multiplexers & Logical Gates in the PLC Program, Exercises based on the above operators, Compilation & Downloading the program to PLC, Trouble Shooting the PLC programming errors, Local & Global Variables, Working with Analog Signals/IO’s, Developing a program for process control, Declaration in Tabular Format, Display of Address and Comments in Logic, Jump & Return Command, Commands like Run, Stop, Reset, Reset Original, Breakpoint etc, Developing User Defined Function Blocks & Functions in the PLC program, Conditional & Unconditional Calling in PLC Program, Task, Configuration, Visualization, Developing user defined Data Types in PLC program, Password Management, Different Methods to take the PLC Program Backup (Source Code Download/Upload, Archive/Restore & Export/Import), Library Management, Target Settings, Running the PLC program in Simulation Mode, Master/Slave Configuration, Data Exchange between the Master & Slave PLC.

HMI : Introduction, Applications, Role of HMI in Automation, Interfacing HMI with different devices, Hardware Details of HMI, Technical Specifications of HMI, Wiring and Connection Techniques, Various models of HMI available in market, Editing various display options using the keys, Programming of HMI, Overview of HMI software, Hardware Configuration, Network Settings or Communication Settings, Developing Different Screens on HMI, Writing Plain Text on the screen, Developing Headers & Footers for the Screen, Configuring the function keys of HMI for screen change or for giving inputs, Linking the variables directly on the screen, Password Management (for screen change & for editing the values), Developing user defined text list, Screen Change using PLC variables, Displaying Alarm Messages on the Screen during fault, Configuring Help Screen for Troubleshooting the errors or faults, Downloading and Uploading the program to or from the HMI respectively using bus interface or USB drive.

There are 3 mixing devices on a processing line A,B,C. After the process begin mixer-A is to start after 7 seconds elapse, next mixer-B is to start 3.6 second after A. Mixer-C is to start 5 seconds after B. All then remain ON until a master enable switch is turned off. Write PLC ladder diagram, timing diagram and realize the same

An indicating light is to go ON when a count reaches 23. The light is then go off when a count of 31 is reached. Design, construct, and test PLC circuits for this process

In certain process control application when the count reaches 25, a paint spray is to run for 40 seconds. Design, construct and test PLC circuits for this process
Three conveyors feed a main conveyor. The count from each feeder conveyor is fed into an input register in the PLC. Construct a PLC program to obtain the total count of parts on the main conveyor. Use a time to update the total every 15 seconds. Design, construct, and test PLC circuits for this process.

In certain process control application o/p is ON if the count is less than 34 or more than 41. Implement the same using PLC ladder diagram.

A conveyor is supposed to have exactly 45 parts on it. You have three indicating lights to indicate the conveyor count status: less than 45, yellow: exactly 45, green: and more than 45, red. The count of parts on the conveyor is set at 45 each morning by an actual count of parts. There are two sensors on the conveyor, one is actuated by parts entering the conveyor, and the other is actuated by parts leaving. Design a PLC program to carry out this process.

Theory / Lecture Hours: 60

Practical / Tutorial Hours: 90

Module II

Basic and electrohydraulics

337
External and internal gear pumps, ii. Vane pumps, iii. Axial piston pumps, iv. Radial piston pumps, Selection criteria of pumps, Flow rate and pump power, Efficiency, Hydraulic Cylinder, Operating Principle, Components of a Hydraulic cylinder, Functions of Hydraulic cylinder, Design and operation, Types of cylinder, Types of design, i. Tie rod cylinders, ii. Mill type cylinders, Technical specification, End positioning cushioning, Cylinder mounting, Hydraulic Motors, Functions of Hydraulic Motors, Characteristics of standard Hydraulic Motors, Selection of Hydraulic motors, Calculations, Efficiency, Pressure Control Valves, Introduction, Function and operating principle of pressure relief valve, direct operated, Pressure relief valve in series and parallel, Pressure relief valve, pilot operated, Function and operating principle of pressure reducing valve, Pressure sequence valve, direct operated, Directional Control Valve, Operation and Function, Special characteristics, Types of directional control valves, Spool design, Poppet design, Types of actuation of spools with symbols, Directional spool valves, direct operated, Directional spool valves, pilot operated, Designation of Directional control valves, Operation of solenoid, Solenoid operated valves and its symbols, Standard spool valve : G spool, E spool, J spool and H spool, Comparison of spool Vs poppet valves, Flow Control Valves, Functions, Throttle valves, Viscosity dependent throttle valves, Types of mounting, Throttle valve independent of viscosity, Flow control valves, 2-way flow control valves, Upstream pressure compensator, Downstream pressure compensator, Applications of 2-way flow control valve, Meter-in flow control, Meter-out flow control, Check Valves, Operation and function of a simple check valve, Check valve, pilot operated, Double pilot operated check valve, Applications of check valves,

Project: Hydraulic pump, characteristic Curve, Single-rod cylinder, pressure intensification, Single-rod cylinder, flow, Hydraulic motor, 4/3 directional valve, Check valve, Check valve, pilot operated, Throttle valve, adjustable, Throttle check valve, Flow control valve, Pressure relief valve, direct operated, controls, Pressure reducing valve, Pressure switch, hydraulic accumulator, Regenerative circuit, Rapid speed/creep speed control, Extending a cylinder by operating a push button, Signal storage by electrical self-locking, setting and resetting using a momentary-contact switch, Mechanical locking by means of momentary-contact switch contacts, Electrical locking by means of contactor contacts, Signal storage by means of contactor contacts, Rapid advance circuit, Pressure-dependent reversing, Pressure switches and proximity switches, Advance control with time-dependent intermediate stop, Pressure-dependent sequence control, Sequencing Hydraulic actuators

Theory / Lecture Hours: 60

Practical / Tutorial Hours: 90
Module III

Basic & Electro Pneumatics

Introduction, Selection and Optimization Criteria, i. Type of motion, ii. Stroke and stroke control, iii. Force, iv. Speed and speed control.

**Project:** Direct control of a single-acting cylinder, extending, Direct control of a single-acting cylinder, retracting, Indirect control of a single-acting cylinder, Regulating the speed of a single-acting cylinder, Slow-speed extension, rapid retraction of a single-acting cylinder, Direct control of a double-acting cylinder with push-button, Indirect control of a double-acting cylinder, Speed regulation of a double-acting cylinder, Controlling a double-acting cylinder, impulse valve, 2 push-buttons, Displacement-dependent control of a double-acting cylinder, impulse, Controlling a double-acting cylinder, impulse valve, 2 reflex nozzles, Stop control, double-acting cylinder, 5/3 directional control valve, tensile load, Pressure-dependent control of 1 double-acting cylinder, Time-dependent control of 1 double-acting cylinder, Logical control with shuttle and twin-pressure valves, Sequential control 2 double-acting cylinders w/o overlapping signals, Seq. control 2 double-act. cylinders, signal overlapping, idle return rollers, Pilot control of a single-acting cylinder with spring return valve, Pilot control of a double-acting cylinder with spring return valve, Holding-element control of a double-acting cylinder with impulse valve, directly controlled, Holding-element control of a double-acting cylinder with impulse valve, relay, Basic circuit with AND Function, Basic circuit with OR Function, Basic circuit with electric latching circuits, Displacement-dependent control of a double-acting cylinder with 1 electric limit switch, Displacement-dependent control of a double acting cylinder, impulse valve, cylinder switch, Displacement-dependent control of a double-acting cylinder with spring return valve, cylinder switch, Stop control of a double-acting cylinder with a 5/3 directional control valve in closed mid-position, Time-dependent control of a double-acting cylinder with switch-on time delay, Time-dependent control of a double-acting cylinder with switch-off time delay, Pressure-dependent control of a double-acting cylinder, Two-hand safety control, electric, Sequential control of 2 double-acting cylinders with impulse valve, Sequential control of 2 double-acting cylinders with impulse valves and signal overlapping, Sequential control of 2 double-acting cylinders with spring return valves and step sequence, Sequential control of 3 double-acting cylinders with impulse valves and step sequence, Sequential control of 3 double-acting cylinders with spring return valves and step sequence, Multiple actuator sequence, Two cylinder sequence, Three cylinder sequence.

**Theory / Lecture Hours:** 60

**Practical / Tutorial Hours:** 90
Total Course Theory / Lecture Hours: 180
Total course Practical / Tutorial Hours: 270
Total course Hours: 450

Recommended Hardware:
State of the art Training system for Hydraulics, Pneumatics, Sensoric and PLC

Recommended Software:
Automation studio, web trainers, Indraworks and indralogic

Text Books:
- Hydraulics. Basic Principles and Components (Bosch Rexroth AG) Volume 1
- The Pneumatic Trainer – Basic Pneumatics Volume 1 (Bosch Rexroth AG)
- The Pneumatic Trainer – Volume 2 (Bosch Rexroth AG)
- Sensors in Theory and Practice – Textbook (Bosch Rexroth AG)
- Basics of Indraworks and Indralogic (Bosch Rexroth AG)

Reference Books:
- R.Srinivasan Hydraulic and Pneumatic Control published by Vijay Nicole Imprints Private Ltd.
- Programmable Logic Controllers by W.Bolton
- Programmable Logic Controllers by Hugh Jack

The training is conducted with the industrial support of Bosch Rexroth, Germany. MOU
Evaluation criteria:

Signed with them.

Bosch has supplied all equipments and set up the state of the art lab facilities in two engineering colleges in the state. They have trained our faculty. Evaluation & Certification by Bosch Rexroth. ESSCI has also agreed to do Assessment and Certification.

#### Objective of the Course:

To get an overview of automation technology. With hands on and theoretical knowledge on advanced of Hydraulics, Pneumatics, Sensors, PLC, Electric drives and Mechatronics (Optional Robotics). The students are also equipped with good Communicative English Skills, soft Skills and Basic IT skills required for good performance in any job in the modern world.

#### Learning Outcomes:

At the end of the level one the student will be able to identify components of automation technology, gets complete knowledge on understanding the automated systems and design circuits and develop programs for given automation tasks.

Have Good Communicative English Skills, Soft Skills and Basic IT Skills

#### Expected Job Roles:

Assistant in regular production areas, quality, logistics, maintenance areas, design, Application, Service and R&D

#### Duration of the Course (in hours)

520 Hrs

#### Minimum Eligibility Criteria and pre-requisites, if any

Diploma in Electronics/Instrumentation/ Mechanical/Electrical / Graduates, with
Professional Knowledge:

| PK1. | Understand the overview of automation |
| PK2. | Different devices used in Automation, |
| PK3. | interact with the technical lead engineer in order to understand the work schedules, |
| PK4. | understand the roles and responsibilities of the work |
| PK5. | understand broad level activities involved in the Industrial automation |
| PK6. | list the various department to interact with for completing the work |
| PK7. | interact with higher officials to understand the specifics of work |
| PK8. | understand the different Communication Protocols/Field Buses |
| PK9. | establish module requirement and constraints |
| PK10. | understand Network Settings/Communication Settings |
| PK11. | understand the PLC Software |
| PK12. | understand the basics of electro hydraulics |
| PK13. | define the design flow for the specific system |
| PK14. | use agreed language and application as per standards |
| PK15. | define the requirement specification of the electro pneumatics |
| PK16. | get approval from superior and relevant department on the electro pneumatics |
| PK17. | Understand different types of pumps |
| PK18. | Understand different types of valves |
| PK19. | understand the functionality of the electro pneumatics |
| PK20. | assist in system testing, product verification and validation |
| PK21. | understand the functionality of the electro hydraulics |
| PK22. | understand the functionality of the HMI |
| PK23. | understand Proportional Hydraulics |
| PK24. | definition of Proportional valve |
| PK25. | understand LVDT |
| PK26. | understand different types of amplifiers |
| PK27. | understand proportional direction control valves |
| PK28. | Introduction to control system |
| PK29. | understand Proportional & Closed loop |
Professional Skill:

PS 1: Overview of Automation System
PS 2: Overview of Switchgears.
PS 3: Different Communication Protocols/Field Buses
PS 4: Introduction to PLC
PS 5: Network Settings/Communication Settings
PS 6: Digital Signals/I/O's, Relay Logic
PS 7: Timer/Counters/Triggers/FlipFlops,
PS 8: Trouble Shooting the PLC programming errors
PS 9: Basic and electrohydraulics
PS 10: Force pressure and weight
PS 11: Laminar and turbulent flow
PS 12: Selection of Hydraulic fluid
PS 13: Hydraulic Pumps
PS 14: External and internal gear pumps
PS 15: Pressure Control Valves
PS 16: Types of directional control valves, Spool design, Poppet design
PS 17: Directional control valves
PS 18: Basic & Electro Pneumatics
PS 19: Pneumatics Vs Hydraulics
PS 20: Air compressors
PS 21: Pneumatic Valves and Control Circuits
PS 22: Pressure Control Valves
PS 23: HMI
PS 24: Programming of HMI
PS 25: Downloading and Uploading the program to or from the HMI
PS 26: Hydraulic Accumulator and its Applications
PS 27: Classifications of filters
PS 28: Principles of Electro-Hydraulics, Basics
PS 29: Electro-hydraulic valves
PS 30: Design of Pneumatics systems
PS 31: Maintenance Activities
PS 32: System Malfunctions
PS 33: Proportional Hydraulics
PS 34: Definition of Proportional valve
PS 35: LVDT
PS 36: Types of amplifiers
PS 37: Proportional direction control valves
PS 38: Introduction to control system
PS 39: Proportional & Closed loop
Core Skill:

The individual on the job needs to know and understand:

CS1. specifications and use of automation system used by the organisation
CS2. licensed software and application tools used for design, their performance
CS3. PLC Programming using Ladder Logic
CS4. Efficient in working with any kind of Hydraulics & Pneumatic Systems

Interpersonal skills

CS5. how to interact with higher officials to understand the work requirement
CS6. how to interact with co employees in order to co-ordinate work processes

Reflective thinking

CS7. to improve work processes
CS8. to reduce repetition of errors

Detailed Syllabus of Course

Module 1 PLC

Overview of Switchgears: What is a Relay and its applications? Introduction to Switching devices like Contactors, Solenoids, MCB’s etc., Symbolic representation of different electrical & electronic components in wiring diagram.

Introduction to Different Communication Protocols/Field Buses: Ethernet, RS232, Profinet, Canopen, Devicenet, Sercos II & III, Modbus, Profinet, Ethercat, Different types of Signals, Digital Signal, Analog Signal, Overview of Limit Switches, Proximity Switches & Reed switches, Introduction to PLC, Comparison of PLC & PC, What is a PLC?, How does a PLC work? Applications of PLC, Block Diagram of PLC, Processing cycle of PLC, Different types of PLC’s available in the market, Programmable Logic Controller, Specifications of PLC, Onboard/Inline/Remote IO’s, Memory Allocation in PLC, What is Scan time of PLC? IO handling capacity of different PLC, Remote connectivity in PLC, Internal Structure of PLC, Hardware Details of the PLC, Wiring and Connection Techniques, Safety Measures for handling the PLC, Diagnosis of PLC Status and other hardware connected to PLC.

Network Settings/Communication Settings: Introduction to PLC Software, Overview of Software/Software at a glance, Hardware Configuration Communication Settings for PLC, PLC Programming, Building simple logic in PLC (AND/OR/NOT), Online & Offline Change, Overview of different types of Data types in PLC programming, Standard format for addressing the variables, Standard Time formats, Rules for Declaration of Variable names, Working with Digital Signals/IO’s, Relay Logic, Difference between Function & Function Blocks, Introduction to Timer/Counters/Triggers/FlipFlops, Exercises based on Timers, Counters, Flip Flops
& Triggers, Usage of Mathematical Operators, Comparators, Conversion Operators, Multiplexers & Logical Gates in the PLC Program, Exercises based on the above operators, Compilation & Downloading the program to PLC, Trouble Shooting the PLC programming errors, Local & Global Variables, Working with Analog Signals/IO’s, Developing a program for process control, Declaration in Tabular Format, Display of Address and Comments in Logic, Jump & Return Command, Commands like Run, Stop, Reset, Reset Original, Breakpoint etc, Developing User Defined Function Blocks & Functions in the PLC program, Conditional & Unconditional Calling in PLC Program, Task, Configuration, Visualization, Developing user defined Data Types in PLC program, Password Management, Different Methods to take the PLC Program Backup (Source Code Download/Upload, Archive/Restore & Export/Import), Library Management, Target Settings, Running the PLC program in Simulation Mode, Master/Slave Configuration, Data Exchange between the Master & Slave PLC.

HMI : Introduction, Applications, Role of HMI in Automation, Interfacing HMI with different devices, Hardware Details of HMI, Technical Specifications of HMI, Wiring and Connection Techniques, Various models of HMI available in market, Editing various display options using the keys, Programming of HMI, Overview of HMI software, Hardware Configuration, Network Settings or Communication Settings, Developing Different Screens on HMI, Writing Plain Text on the screen, Developing Headers & Footers for the Screen, Configuring the function keys of HMI for screen change or for giving inputs, Linking the variables directly on the screen, Password Management (for screen change & for editing the values), Developing user defined text list, Screen Change using PLC variables, Displaying Alarm Messages on the Screen during fault, Configuring Help Screen for Troubleshooting the errors or faults, Downloading and Uploading the program to or from the HMI respectively using bus interface or USB drive.

There are 3 mixing devices on a processing line A,B,C. After the process begin mixer-A is to start after 7 seconds elapse, next mixer-B is to start 3.6 second after A. Mixer-C is to start 5 seconds after B. All then remain ON until a master enable switch is turned off. Write PLC ladder diagram, timing diagram and realize the same

An indicating light is to go ON when a count reaches 23. The light is then go off when a count of 31 is reached. Design, construct, and test PLC circuits for this process

In certain process control application when the count reaches 25, a paint spray is to run for 40 seconds. Design, construct and test PLC circuits for this process
Three conveyors feed a main conveyor. The count from each feeder conveyor is fed into an input register in the PLC. Construct a PLC program to obtain the total count of parts on the main conveyor. Use a time to update the total every 15 seconds. Design, construct, and test PLC circuits for this process.

In certain process control application o/p is ON if the count is less than 34 or more than 41. Implement the same using PLC ladder diagram.

A conveyor is supposed to have exactly 45 parts on it. You have three indicating lights to indicate the conveyor count status: less than 45, yellow: exactly 45, green: and more than 45, red. The count of parts on the conveyor is set at 45 each morning by an actual count of parts. There are two sensors on the conveyor, one is actuated by parts entering the conveyor, and the other is actuated by parts leaving. Design a PLC program to carry out this process.

Theory / Lecture Hours: 65
Practical / Tutorial Hours: 105

Module II

Basic and electrohydraulics

External and internal gear pumps, ii. Vane pumps, iii. Axial piston pumps, iv. Radial piston pumps, Selection criteria of pumps, Flow rate and pump power, Efficiency, Hydraulic Cylinder, Operating Principle, Components of a hydraulic cylinder, Functions of hydraulic cylinder, Design and operation, Types of cylinder, Types of design, i. Tie rod cylinders, ii. Mill type cylinders, Technical specification, End positioning cushioning, Cylinder mounting, Hydraulic Motors, Functions of hydraulic motors, Characteristics of standard hydraulic motors, Selection of hydraulic motors, Calculations, Efficiency, Pressure control valves, Introduction, Function and operating principle of pressure relief valve, direct operated, Pressure relief valve in series and parallel, Pressure relief valve, pilot operated, Function and operating principle of pressure reducing valve, Pressure sequence valve, direct operated, Directional control valve, Operation and function, Special characteristics, Types of directional control valves, Spool design, Poppet design, Types of actuation of spools with symbols, Directional spool valves, direct operated, Directional spool valves, pilot operated, Designation of directional control valves, Operation of solenoid, Solenoid operated valves and its symbols, Standard spool valve : G spool, E spool, J spool and H spool, Comparison of spool vs poppet valves, Flow control valves, Functions, Throttle valves, Viscosity dependent throttle valves, Types of mounting, Throttle valve independent of viscosity, Flow control valves, 2-way flow control valves, Upstream pressure compensator, Downstream pressure compensator, Applications of 2-way flow control valve, Meter-in flow control, Meter-out flow control, Check valves, Operation and function of a simple check valve, Check valve, pilot operated, Double pilot operated check valve, Applications of check valves,

Hydraulic accumulator and its applications, Functions, Energy storage, Types of accumulator, Safety regulations, Application of accumulators, Filtration and filtration technology, Causes of contamination, Classification of filters, Suction filter, Pressure line filter, Return line filter, Bypass filter, Filter with clogging indicator, Basic principles of electro-hydraulics, Basics: Electric current, voltage, resistance, and power, Basic electric circuits: series and parallel, Measurement of current and voltage, Electro-hydraulic valves, Solenoids, Classification of solenoids, Function and operating principle of a relay, Relay as a logical switch, Relay logic diagram: control and main circuit, Symbols of most important switching elements (NO an NC), Signal storage concept, Electrical interlocking concept, Momentary-contact limit switches, Categories of limit switches, Pressure switches, Graphical symbols to DIN electrical engineering and electronics.

Proportional hydraulics: Control engineering, Open loop control, Closed loop control, Ohms law, Introduction to proportional technology, Why proportional valves, Definition of proportional valve, Components of proportional technology, Possible functions of proportional valve, Solenoids, Construction, Characteristics, Difference between conventional and proportional solenoid, Types of proportional solenoid, Force controlled solenoid, Stroke controlled solenoid.

**Project:** Hydraulic pump, characteristic Curve, Single-rod cylinder, pressure intensification, Single-rod cylinder, flow, Hydraulic motor, 4/3 directional valve, Check valve, Check valve, pilot operated, Throttle valve, adjustable, Throttle check valve, Flow control valve, Pressure relief valve, direct operated, controls, Pressure reducing valve, Pressure switch, hydraulic accumulator, Regenerative circuit, Rapid speed/creep speed control, Extending a cylinder by operating a push button, Signal storage by electrical self-locking, setting and resetting using a momentary-contact switch, Mechanical locking by means of momentary-contact switch contacts, Electrical locking by means of contactor contacts, Signal storage by means of contactor contacts, Rapid advance circuit, Pressure-dependent reversing, Pressure switches and proximity switches, Advance control with time-dependent intermediate stop, Pressure-dependent sequence control, Sequencing Hydraulic actuators. Moving a cylinder with the help of an external potentiometer for the provision of a command value. Traversing a cylinder with command value module SWMA1 as command value source. Adjusting command value module SWMA1 with 4 command values. Adjusting command value module SWMA1 with 4 command values and ramps, Adjusting a braking distance following a proximity switch signal. Pressures of the proportional valve and their influence on velocity and braking distance. Adjusting a motion sequence with 4-quadrant ramps, Adjusting a sequence with 2 proximity switches, Three different speeds in single stroke using proximity switches. Adjustment of an automatic sequence with 3 proximity switches. Setting position with 4/3 directional valve. Setting position with proportional servo valve. Position control

Theory / Lecture Hours: 65

Practical / Tutorial Hours: 105

Module III

**Basic & Electro Pneumatics**

Fluid power, Advantages, Pneumatics, Definition, Characteristics of Industrial Pneumatics, advantages and its limitations, Comparisons of Drives - Pneumatics Vs Hydraulics, Electrical/Electronics & Mechanical, Applications of Pneumatics, Compressed Air Generation and Contamination Control, Compressed Air for transmitting power, Composition of Atmospheric Air, force, weight, pressure, Pascal’s Law, Application of Pascal’s Law, Force Multiplication, Pressure Multiplication, Displacement transmission, Calculations, Gas Laws, Air compression process, Absolute and relative pressure. Flow rate, Characteristics of
compressed air, Graphical Symbols and Circuit Diagrams ISO 1219, Purpose of graphical symbols, Function of symbols, Basic elements, Circuit diagram, Commonly used symbols, Circuit symbols, Symbols for Maintenance unit, Symbols for Pneumatic energy control units (Pressure, Flow and Direction ), Symbols for Energy conversion units (Actuators), Symbols for accessories, Demonstration of Pneumatic circuits, Pneumatic circuit with manual DCV and a cylinder, Pneumatic circuit with solenoid DCV and cylinder and a motor, Demonstration of speed and direction changes in Pneumatic circuit, Compressed Air Generation and Contamination Control, A typical Pneumatic system, Air compressors, Classification of Compressors, Terms and Definition: Delivery volume, Pressure, Drive, Cooling and Regulation, Piston Compressor, Screw Compressor, Vane Compressor, Compressor unit, Preparation of compressed Air, Stages of Preparation, Drying of Compressed Air, Distribution of Compressed Air, Pneumatic Actuators, Introduction, Basic Actuator Functioning, Thrust, Cylinder Air Consumption, Cylinder speed and its relation to flow rate, Stroke Length, Piston rod buckling, Classification of Pneumatic Actuators, Linear Actuators, Single-Acting cylinder, Double-Acting cylinder, Cylinder cushioning, Classification of cylinders According to Duty, Cylinder with Magnetic Piston, Cylinder with Non-Rotational Guiding, Rodless Cylinder, Tandem Cylinder, Rotary Actuator, Semi-Rotary Actuators, Pneumatic Valves and Control Circuits, Introduction, Classification of valves, Functional Classification of Valves, i. Directional control valves, ii. Pressure control valves, iii. Flow control valves, iv. Non return valves, Graphical Representation, Port Markings, Ports and Positions, Graphical symbols for DC valves, Methods of DC Valve Actuations, 3/2-Directional Control valve, i. NC-type 3/2-DC valves, ii. NO-type 3/2-DC valves, Non-Return Valves, Flow control valves, Throttle valve and Throttle check valves, Pneumatically Actuated 3/2-DC valve, Manually actuated 5/2-DC valve, Pneumatically actuated 5/2-DC valve, Speed control of Double-Acting Cylinder, 5/2-DC Double-Pilot valve, Login Controls, Pneumatic, i. Shuttle valve, ii. Twin pressure valve, iii. Applications of Logic valves, Structure of Pneumatic Circuits, Automatic Control, Roller valve, Quick-Exhaust valve, Time-Delay valves, Pressure Control Valves, Introduction, Function and operating principle of pressure relief valve, direct operated Pressure regulator.

**Project:** Direct control of a single-acting cylinder, extending, Direct control of a single-acting cylinder, retracting, Indirect control of a single-acting cylinder, Regulating the speed of a single-acting cylinder, Slow-speed extension, rapid retraction of a single-acting cylinder, Direct control of a double-acting cylinder with push-button, Indirect control of a double-acting cylinder, Speed regulation of a double-acting cylinder, Controlling a double-acting cylinder, impulse valve, 2 push-buttons, Displacement-dependent control of a double-acting cylinder, impulse, Controlling a double-acting cylinder, impulse valve, 2 reflex nozzles, Stop control, double-acting cylinder, 5/3 directional control valve, tensile load, Pressure-dependent control of 1 double-acting cylinder, Time-dependent control of 1 double-acting cylinder, Logical control with shuttle and twin-pressure valves, Sequential control 2 double-acting cylinders w/o overlapping signals, Seq. control 2 double-act. cylinders, signal overlapping, idle return rollers, Pilot control of a single-acting cylinder with spring return valve, Pilot control of a double-acting cylinder with spring return valve, Holding-element control of a double-acting cylinder with impulse valve, directly controlled, Holding-element control of a double-acting cylinder with impulse valve, relay, Basic circuit with AND Function, Basic circuit with OR Function, Basic circuit with electric latching circuits, Displacement-dependent control of a double-acting cylinder with 1 electric limit switch, Displacement-dependent control of a double acting cylinder, impulse valve, cylinder switch, Displacement-dependent control of a double-acting cylinder with spring return valve, cylinder switch, Stop control of a double-acting cylinder with a 5/3 directional control valve in closed mid-position, Time-dependent control of a double-acting cylinder with switch-on time delay, Time-dependent control of a double-acting cylinder with switch-off time delay, Pressure-dependent control of a double-acting cylinder, Two-hand safety control, electric, Sequential control of 2 double-acting cylinders with impulse valve, Sequential control of 2 double-acting cylinders with impulse valves and signal overlapping, Sequential control of 2 double-acting cylinders with spring return valves and step sequence, Sequential control of 3 double-acting cylinders with impulse valves and step sequence, Sequential control of 3 double-acting cylinders with spring return valves and step sequence, Multiple actuator sequence, Two cylinder sequence, Three cylinder sequence.

**Proportional & Closed loop:** Introduction to closed loop technology in Pneumatics, Applications, Electropneumatic

Theory / Lecture Hours: 70

Practical / Tutorial Hours: 105

Total Course Theory / Lecture Hours: 205

Total Course Practical / Tutorial Hours: 315

Total Hours: 520
Recommended Hardware:
State of the art Training Lab for Hydraulics, Pneumatics, Sensoric, PLC and Robotics

Recommended Software:
Automation studio, web trainers, Indraworks and indralogic

Text Books:

3.6 Telecom Electronics

ESDM Courses

Level Code: L2
Vertical Name: Telecom Electronic

Course Code: TL/M/L2/C008
Course Name: 3.6.1 Telecom Test Technician (TSSC)

Objective of the Course:
Train Test Technician

Learning Outcomes:
The student will be gaining strong knowledge on “Hands-on experience in Electronics and Telecommunication field”
The student will be gaining good knowledge on wireless communication
The student will be able to get Exposure on automation and automatic test handling equipment
The student will be able to understand electronic circuit
The student will be able to get hands-on basic knowledge on MS office
The Student will be able to get good knowledge on RF instruments and measuring equipment’s system
The student will be capable of analysis and action against any equipment failure
The student will be able to learn good communication skills
Expected Job Roles:

Test Technician
Candidates will experience the “Hands-on experience in Electronics and Telecommunication field”, good knowledge, on automation and automatic test handling equipment, knowledge on RF instruments and measuring equipment’s system.

Duration of the Course (in hours)  
200 Hours

Minimum Eligibility Criteria and pre-requisites, if any

- ITI - Electronics, Electrical, Instrumentation
- Diploma – Electronics, Electrical, Instrumentation
- Vocational Education Training
  (Including Final year candidates pursuing ITI/Diploma)

ESDM Courses

Level Code: L3  Vertical Name: Telecom Electronics

Course Code: TL/M/L3/C009  EL/M/L3/C037  Course Name: 3.6.2 Board Bring Up Engineer (TSSC/ESSCI)

Objective of the Course:

To train students on industry standard practices, flows and tools involved in assembly, test, debug, and enablement of Hardware boards and make them ready for system integration and commissioning.

Learning Outcomes:

Participants successfully completing this course will:

- Have the ability to do PCB Bare Board Testing
- Have the ability to do Board Assembly
- Shall be able to operate various test and measurement tools used in Board Bring-Up
- Shall be able to test and debug Power, Analog, Digital, High Frequency Sections and connector interfaces on a PCB board
- Ability to Flash Firmware codes
### Expected Job Roles:

- Hardware maintenance Engineer
- Board Bring Up Engineer
- PCB Assembly & Debug Engineer
- Entrepreneur: PCB Assembly, BBT, Test & Measurement Services

### Duration of the Course (in hours)

<table>
<thead>
<tr>
<th></th>
<th>350 Hours</th>

<td>Should be able to read and understand Technical Specifications</td>
</tr>
<tr>
<td>Should be familiar with various Hardware Testing techniques</td>
</tr>
<tr>
<td>Should be familiar with Black box and White box testing</td>
</tr>
</tbody>
</table>

### Professional Skill:

An individual should have following Professional Skills

<p>| |</p>
<table>
<thead>
<tr>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td>Ability to work with Test &amp; Measurement tools like Multimeter, CRO, RLC Meter, Function Generator</td>
</tr>
<tr>
<td>Ability to assemble complex PCBs</td>
</tr>
<tr>
<td>Ability to do Functional, Stress, Parametric &amp; Use Case Testing of Hardware Boards</td>
</tr>
</tbody>
</table>
• Should be able to troubleshoot, debug and fix defects
• Able to prepare high quality Test Case Documents
• Should be able to prepare and submit reports on progress and status of all testing procedures.
• Should be able to Flash Firmware
• Should be able to use Emulators & Debuggers

Core Skill:

An individual on the job should have following Core Skill

• Basic knowledge of electronics.
• Familiarity with Electronic Product Life Cycle

parameters of electronic components:
- Passive Components
- Active Components
- Sensors
- Cables & Connectors
- Batteries
- Antenna Topologies
- Basic introduction to MCU Testing

5. **Circuits & Design Sections**

Understanding operation, failure modes, specifications and measurement parameters of commonly used circuits and design sections:
- Power blocks: Voltage Converters, Regulators
- Analog Sections: Amplifiers, Driver circuits, Signal Converters
- Digital Sections: Encoders, Decoders, Arithmetic Circuits, Displays
- High Frequency Interfaces
- Connectors & Interfaces

6. **PCB Assembly & Testing**

Introduction to PCB Assembly tools, techniques and industry practices
- PCB Workbench
- Soldering/De-soldering Tools & Techniques
- Section wise Assembly
- Section wise Testing
- Common Assembly Defects & Their Fixes
- Troubleshooting & Debug

7. **MCU Related Testing**

- Introduction to IDE Basics
- Introduction to Debuggers & Their Usage
- Single Stepping, Breakpoints
- Introduction to Emulators
- Firmware Flashing
- Basics Test & Measurement Techniques for MCU designs
- Introduction to Commonly Used Communication Protocols & Their Testing in Simplex, Duplex & Loopback Modes

8. **Detailed Testing**

- Functional Testing
### Stress Testing
- Parametric Testing
- Use Case Testing

### 9. Design Enablement
- Readying Board for Commissioning
- System Integration
- Maintenance
- HOT state Debug, Troubleshooting

### 10. Communication Skills, soft skills, Life skills

### 11. Health and Safety (including electrical safety) & Reporting and Documentation

| Practical | 200 |
| Theory    | 150 |
| **Total Hours** | **350** |

**Recommended Hardware:**
- Test & Measurement Tools & Equipment
- PCB Workbench Tools
- BBT Practice Kit
- Component Learning Kit
- Mixed Signal Design Learning Kit
- Digital Design Learning Kit
- MCU Development Kit

**Recommended Software:**
- Express PCB
- R8C 1A/1B / PIC IDE, Debugger, Emulator

**Text Books:**
1. Electronic Principles (Special Indian Edition) (English) 7th Edition
2. Electronic Devices and Circuits (English) 3rd Edition
3. Modern Electronic Instrumentation And Measurement Techniques (English) 2nd Edition

</tr>
</tbody>
</table>

## Objective of the Course:

To train students on industry standard design techniques, flows and tools involved in design, debug and commissioning of Telecom Embedded Hardware designs, systems and products.

## Learning Outcomes:

Participant shall learn

1. Telecom Industry Standard practices used in development of Embedded Hardware Products.
3. Embedded C and Communication Protocol Programming
5. Interfacing various real-time data acquisition and control sensors using Analog to digital and Digital to Analog converters
6. Industry Standard Tool Chains for Embedded Design
7. Working across communication interfaces like I2C, SPI, UART, Infrared, RF, GSM and GPS
8. Realization of Adhoc Communication Networks utilizing Embedded Hardware.
9. Realization of Gyro-sensing based mobile application
10. Trouble shooting and Debugging
**Expected Job Roles:**

1. Telecom communication equipment design, support and maintenance
2. Troubleshooting and debugging of Protocol based communication system networks
3. Telecom Product Master Technician - Trouble shooting of Intelligent Telecom electronic systems/products
4. Entrepreneur - Development of small, intelligent communication and networking gadgets and applications

**Duration of the Course (in hours)**

| 350 hrs |

**Minimum Eligibility Criteria and pre-requisites, if any**

| Diploma (Electronic/Electrical/Mechanical (Including final year candidate) |

**Professional Knowledge (Acquired):**

| The participant shall know and understand |

| 11. Basics of Embedded Hardware design for Telecom Devices and Equipment |
| 12. Basics of Core Programming of Telecom Devices and Equipment |
| 13. Acquire knowledge of basic Communication Protocols |
| 14. Basics of Circuits and Architectures used in Telecom Systems and Devices |

**Professional Skill (Acquired):**

**Reading and writing skills**

- To read and comprehend System Requirement Specs of Telecom Device and Equipment
- To read and comprehend Test & Measurement Specs of Telecom Device and Equipment
- To read the standard operating procedures for Telecom Device and Equipment

**Tool Usage**

- To work with Industry Standard Embedded Systems Tools such as compiler, assembler, linker, debugger and emulators.
Core Skill:

- Telecom communication equipment design, support and maintenance
- Troubleshooting and debugging of Protocol based communication system networks
- Trouble shooting of Intelligent Telecom electronic systems/products
- Various real time data acquisition and control systems
- Development of small, intelligent communication and networking gadgets and applications

3.7 Telecom Manufacturing

ESDM Courses

Level Code: L4  Vertical Name: Telecom Manufacturing

Course Code: TL/M/L4/C013  Course Name: 3.7.1 Electrical Testing of Telecom Assemblies (TSSC)

Objective of the Course:
To teach the trainee, Electrical testing of bare boards (DS & Multilayer Board) using Dedicated Bare Board Tester, Universal Bare Boards Tester and Flying Probe Tester and Electrical testing assembled boards using In-circuit Tester. Basic knowledge of preparation of test fixtures for bare board testing and assembled board testing.

Learning Outcomes:
Upon successful completion of training, trainee will be able to do the bare board testing of bare Telecom PCB’s using BBT machine and testing of assembled boards using In-circuit tester.

Expected Job Roles:
1. Telecom BBT Operator / Supervisor
2. Telecom In-circuit Tester Operator / Supervisor

Duration of the Course (in hours) 350 Hours
Minimum Eligibility Criteria and pre-requisites, if any

ITI / Diploma in Electronics, Telecom or B.Sc. in Electronics

Professional Knowledge:

1. Knowledge of electrical testing of bare boards for telecom sector.
2. Knowledge of electrical testing of assembled boards using In-circuit tester.
3. Basic knowledge of CAM software for creation of BBT program
4. Basic Knowledge of test fixture making.
5. Main machine & materials used for electrical testing & fixture making.
6. Ability to trace fault such as open, shorts, missing components, wrong components in bare boards and assembled boards.
7. Operating knowledge of Dedicated Bare Board testing machine, Universal Bare Board Testing machine, Flying Probe testing machine and In-circuit tester.
8. Applicable IPC standards for bare board testing and in-circuit testing.

Professional Skill:

1. Operation of Bare Boards testing machine and fault repairs.
2. Operation of In-circuit testing machine and fault tracing on assembled board.
3. Program generation for bare board testing & in-circuit testing.
4. Basic test fixture preparation skill for BBT & In-circuit testing.
5. Acceptable quality requirement regarding bare boards and assembled boards.
6. Ability to troubleshoot and reduce machine down time.
7. Ability read schematic and trace faults in assembled boards

Core Skill:

1. To be able to understand various machine and equipments operating manual in order to identify and fix minor faults that occur during telecom boards electrical testing.
2. To be able to understand operating procedures and work instruction of the different machine used for electrical testing of bare boards and assembled boards.
3. To maintain pace of the throughput as per production requirements.
4. To effectively communicate with superiors on repetitive machine failure & commonly observed fault in boards.
5. To be able to write reports in log books and online job tracking software.
6. To co-ordinate with other team members in order to collect inputs and deliver output to the next process.
7. To share knowledge with team members for smooth workflow.

Level Code: L4  Vertical Name: Telecom Manufacturing

Course Code: TL/M/L4/C015  EL/M/L4/C040  

Course Name: 3.7.2 IPC (Institute of Printed Circuits) Acceptability Criteria of Telecom PCB (Printed Circuit Boards) Assemblies (TSSC/ESSCI)

Objective of the Course:
To teach the trainee, IPC Acceptability Criteria of Telecom PCB Assemblies based on Telecom IPC Standard IPC-A-610E.

Learning Outcomes:
Upon successful completion of training, trainee will be able to do the inspection of the electronic assemblies as per international standard IPC-A-610E.

Expected Job Roles:
- Telecom In-process / Final Quality Inspector
- Telecom In-process / Final Quality Supervisor

Duration of the Course (in hours) 350 Hours

Minimum Eligibility Criteria and pre-requisites, if any ITI / Diploma in Telecom, Electronics or B.Sc. in Electronics
**Professional Knowledge:**

- Knowledge of applicable IPC standards for Telecom Electronic Assemblies.
- Knowledge of Acceptability Criteria for Telecom Electronic Assemblies
- Classification of Electronic Assemblies
- Terms and definition used in EMS industry
- Acceptability requirement about solderability

**Professional Skill:**

- Ability to inspect to Telecom Electronics Assemblies as IPC-A-610E.
- Acceptable quality requirement regarding bare boards and assembled boards.
- Ability to report defects to the production departments to prevent reoccurrence of defects.
- Ability to prepare Quality report and entry of the same MIS.
- Ability to do root cause analysis with colleagues

**Core Skill:**

- To be able to understand, inspection requirements for assembled boards as per IPC and customer requirements.
- To maintain pace of the through put as per production requirements.
- To effectively communicate with superiors on repetitive commonly observed defects in electronic assemblies.
- To be able to write reports in log books and on line job tracking software.
- To co-ordinate with other team members in order to collect inputs and deliver output to the next process
- To share knowledge with team members for smooth work flow.

IPC-J-STD-001: Joint Industry Standard “Requirements for Soldered Electrical & Electronic Assemblies” |
| Evaluation criteria: | Based on attendance, assignments, internal assessment and final evaluation by third party approved by TSSC. |
## Objective of the Course:
To train students about different Telecom SMT process used in the manufacturing of telecom assemblies. To impart knowledge about different material, tool & equipments used for SMT process and SMT process control.

## Learning Outcomes:
Upon successful completion of training, candidate will be able to operate the Telecom SMT line for assemblies of telecom boards. SMT Assembly process includes solder paste printing, placement of SMD components, reflow soldering and Automated inspection of assemblies.

## Expected Job Roles:
1. Telecom SMT Line operator
2. Telecom SMT Process Supervisor
3. Telecom Automated Optical Inspection of Assembled Boards

## Duration of the Course (in hours)
350 Hours
Minimum Eligibility Criteria and prerequisites, if any

ITI / Diploma in Electronics or B.Sc. in Electronics

Professional Knowledge:

1. Complete knowledge about Telecom SMT process used for telecom assemblies such as solder paste printing, pick & place machine programming, process of pick & place machine, Reflow soldering process and AOI.
2. Basic raw materials and chemicals used for Telecom SMT process.
3. Different test equipments, tools, machines and process used for Telecom SMT process.
4. Critical process parameters and acceptability quality requirement of Telecom SMT assemblies.
5. Awareness about surface mount devices used in Telecom telecom assemblies
6. Safety and environmental norms to be followed during SMT process.
7. Advantage of SMT components over though hole components.

Professional Skill

1. Operation of Telecom SMT line including AOI machine.
2. Setting & operation of solder paste printing machine
3. Programming and operation Pick & Place machine
4. Process control and setting critical process parameters of SMT line
5. To identify errors both in the input and in the in-process SMT assemblies
6. To spot process disruptions and delays in processes
7. Ability to improve work processes in Telecom
8. Ability to troubleshoot and reduce machine down time

Core Skill:

8. To be able to understand various machine and Telecom equipments operating manual in order to identify and fix minor faults that occur during telecom boards assembly by Telecom SMT process.
9. To be able to understand operating procedures and work instruction of the Telecom SMT process.
10. To maintain pace of the through put as per production requirements.
11. To effectively communicate with superiors on repetitive machine failure.
12. To be able to write reports in log books and on line job tracking software.
13. To co-ordinate with other team members in order to collect inputs and deliver output to the next process
14. To share knowledge with team members for smooth work flow.

- Reporting: Test script/cases, Recommendations and risk strategy, Test input and output information, used and created by conducting the tests, Test results, both detailed and summary
- Resources

Total Course Theory / Lecture Hours: 198 Hours

Total Course Practical / Tutorial Hours: 152 Hours

Total Course Hours: 350 Hours

**Recommended Hardware:**
Telecom SMD components, Solder paste, bare PCBs with mixed technology, assembled boards, de-soldering pump, hot air gun, tweezers, SMT line (including Loader, Solder paste printer, Pick & place machine, Reflow solder Machine, AOI, Unloader.

**Recommended Software:**
CAM350 software for editing pick & place machine program.
Text Books:
2. Reflow Soldering Processes: SMT, BGA CSP and Flip Chip Technologies
3. Essential of SMT : Practical Know –How by Youngbong Kang

Reference Books:

</tr>
</tbody>
</table>

#### Objective of the Course:

To train students about different soldering techniques used in the manufacturing of telecom assemblies. To impart knowledge about different materials, tools & equipments used for soldering process and soldering quality standards.

#### Learning Outcomes:

Upon successful completion of training, candidate will be able to operate the wave soldering machine, Hot air reflow soldering machine and fair expertise in manual soldering.

#### Expected Job Roles:

- Telecom Wave Soldering Machine operator
- Telecom Wave Soldering Machine Process Supervisor
- Telecom Hot Air Reflow Soldering Machine Operator
- Telecom Hot Air Reflow Soldering Process Supervisor

#### Duration of the Course (in hours)

350 Hours

#### Minimum Eligibility Criteria and pre-requisites, if any

ITI / Diploma in Telecom, Electronics or B.Sc. in Electronics
### Professional Knowledge:

- Complete knowledge about soldering process used for telecom assemblies such as Telecom wave soldering, hot air reflow soldering and manual soldering.
- Basic raw materials and chemicals used for soldering process.
- Different test Telecom equipments, tools, machines and process used for PCB soldering process.
- Critical process parameters and acceptability quality requirement of Telecom PCB’s assemblies.
- Awareness about through hole and surface mount devices used in telecom assemblies.
- Safety and environmental norms to be followed during soldering process.
- Advantage of SMT components over though hole components.
- Best practices being followed for soldering of Telecom electronic assemblies.
- ROHS and non-ROHS soldering process requirements & process control.

### Professional Skill:

- Operation of Telecom wave soldering machine.
- Operation of hot air soldering machine.
- Manual soldering and rework of Telecom electronic assemblies.
- Process control and setting critical process parameters of wave solder machine and reflow soldering machine.
- To identify errors both in the input and in the in-process Telecom PCB assemblies.
- To spot process disruptions and delays in processes.
- Ability to improve work processes.
- Ability to troubleshoot and reduce machine down time.

### Core Skill:

- To be able to understand various machine and Telecom equipments operating manual in order to identify and fix minor faults that occur during telecom boards soldering.
- To be able to understand operating procedures and work instruction of the different soldering processes.
- To maintain pace of the through put as per production requirements.
- To effectively communicate with superiors on repetitive machine failure.
- To be able to write reports in log books and on line job tracking software.
- To co-ordinate with other team members in order to collect inputs and deliver output to the next
- To share knowledge with team members for smooth workflow.

Objective of the Course:

To Prepare the Technicians for the Telecom Quality function on the shop floor for Quality Control. The participant will be able to Supervise Inspection, collation of data and prepare for Quality improvement on the semi-finished/finished products.

Learning Outcomes:

- Understanding of Telecom SQC tools
- Understanding of Basic knowledge of PCB assembly
- Usage of Telecom SQ tools to solve quality problems and improvements
- Be a part of the team to make improvements of the Quality of the Telecom PCB assembly process

Expected Job Roles:

- Telecom QC Technician
- Process Telecom QC Technician
- Final Telecom QC Technician

Duration of the Course (in hours) 350 Hours

Minimum Eligibility Criteria and pre-requisites, if any

ITI / Diploma (Electrical, Electronics, Instrumentation)

ESDM Courses

Level Code: L5  Vertical Name: Telecom Manufacturing

Course Code: TL/M/L5/C039  Course Name: 3.7.6 Line Repair Technician (TSSC)

Objective of the Course:

1. The course is designed for trainees to upgrade and take up key roles of Quality Inspector and supervisor role of a specific manufacturing line.
2. Focus on work-readiness skills.

Learning Outcomes:

At the end of the course the trainee should have
1. PCB Rework, SOP & Work Instructions
2. Knowledge of various Functional tests in mobile phones
3. Identification, categorisation and analysis of faults
4. Basic understanding of Manufacturing processes
5. Basic knowledge of Quality Standards
6. Good knowledge of manufacturing processes
7. Basic knowledge of Inventory management
8. Knowledge of First Aid and handling of emergency situations
9. Good Communication
10. Health and Safety
Expected Job Roles:

1. Quality Inspector
2. Line Supervisor

Duration of the Course (in hours) 630 hr

Minimum Eligibility Criteria and prerequisites, if any 12th Pass and Certified in Line Assembler L4 course.

Objective of the Course:

1. This course is designed to train the student in effectively taking up roles at the Manufacturing assembly line with special focus on Mobile manufacturing and repairing of mobile phones on manufacturing line.
2. Focus on work-readiness skills.

Learning Outcomes:

At the end of the course the student should be able to

1. Understand Basic Concepts of Electricity
2. Identify Components and Tools
3. Understand SOP & Work Instructions
4. Understand Basic Concepts of Electronics
5. Understand Basics of Mobile Communication
6. Solder & Desolder basic components
7. Solder & Desolder SMD components
8. Importance and usage of ESD Clothing
9. Assemble & Disassemble Mobile phones
10. Have knowledge of troubleshooting steps
11. Rework on the PCB  
12. Knowledge of Basic English  
13. Know Basics of Communication

**Expected Job Roles:**

1. Line Assembler in mobile Manufacturing Unit

**Duration of the Course (in hours)**

630 hr.

**Minimum Eligibility Criteria and pre requisites, if any**

12th Pass

**Detailed Syllabus of Course**

| Course Code: | EL/M/L4/C016 | Course Name: | 3.8.1 LED Mechanical Assembly Operator (ESSCI) |

Objective of the Course:

**Mechanical Assembly Operator:** The Mechanical Assembly Operator assembles all parts of LED luminary to complete the product.

**Brief Job Description:** The individual at work fits together different electronic, electrical and mechanical parts and connects them to make the final LED luminary as per product design.

**Personal Attributes:** The job requires the individual to have: attention to details, safety and hazards orientation, willingness to wear protective gears and the stamina for long hours of work.

Learning Outcomes:

**NOS # ELE/9201 Assemble LED Luminary**

1. Complete base assembly
2. Complete heat sink assembly
3. Join base assembly with heat sink assembly
4. Fix glass shell and pack the final product
5. Achieve productivity and quality of standards
6. 

**NOS # ELE/N9919 Work with superiors and colleagues**

1. Interact with supervisor or superior
2. Coordinate with colleagues

**ELE/N9921- Follow safety standards**
1. Understand potential sources of accidents
2. Use safety gear to avoid accidents
3. Understand the safety procedures followed by the company

Entrepreneurship

Expected Job Roles:

LED Mechanical Assembly Operator

Duration of the Course (in hours) 350 hours

Minimum Eligibility Criteria and pre-requisites, if any 10th + ITI, 12th Pass, Other non-Science graduates

Professional Knowledge:

NOS # ELE/9201 Assemble LED Luminary

KA1. company's policies on: incentives, delivery standards and personnel management
KA2. company’s standard operating procedures and processes related to product assembly
KA3. importance of the individual’s role in the workflow
KA4. reporting structure
KA5. safety and quality standards followed in the organization

KB1. the operation and significance of various electronic, electrical and mechanical components of LED luminary
KB2. product designing basics and significance of optics
KB3. how to handle LEDs and PCBs during assembly and packaging
KB4. IP rating and CREE standards
KB5. special ESD and work safety precautions to be taken during assembling
KB6. 5S standards (sorting, setting, standardise, sustain, shining)

NOS # ELE/N9919 Work with superiors and colleagues

KA1. company’s policies on: incentives, delivery standards, and personnel management
KA2. work flow involved in company’s process
KA3. importance of the individual’s role in the workflow
KA4. reporting structure

KB1. how to communicate effectively
KB2. how to build team coordination

NOS # ELE/N9921 - Follow safety standards

KA1. company’s policies on handling: harmful chemicals and sharp tools, safety and hazards of machines, fire safety/drill, first aid and, disposal of harmful chemicals and materials, quality standards
KA2. company occupational safety and health policy followed
KA3. company emergency evacuation procedure
KA4. company’s medical policy

KB1. how to maintain the work area safe and secure
KB2. how to handle hazardous material
KB3. how to follow safety procedures while operating hazardous tools and equipment
KB4. emergency procedures to be followed such as fire accidents and fire safety education
KB5. how to use machines and tools without causing bodily harm
KB6. first aid execution
KB7. disposal of hazardous chemicals, tools and materials by following prescribed environmental norms or as per company policy
Professional Skill:

i. Planning
ii. Using tools
iii. Problem solving
iv. Reflective thinking
v. Critical Thinking
vi. Decision Making
vii. Handling Safety Equipment

Core Skill:

1. Reading and Writing Skills
2. Team work
3. Communication skills
4. Multitasking

ESDM Courses

Level Code: L4  Vertical Name: LED & Photovoltaic

Course Code: EL/M/L4/C018  Course Name: 3.8.2 Certificate Course in LED Light Mechanical Assembly (ESSCI)

Objective of the Course:

To train & teach individuals how to assemble different electronics, electrical and mechanical parts and connect them
Learning Outcomes:
After completing the training, one will be able to complete the heat sink assembly, complete base assembly, join base assembly with heat sink assembly, fix glass shell and pack final product as per LED Assembly quality standard.

Expected Job Roles:
LED Light Mechanical Assembly Operator

Duration of the Course (in hours) 350 Hrs

Minimum Eligibility Criteria and pre-requisites, if any 12th Pass

Professional Knowledge:
1. The operation and significance of various electronic, electrical and mechanical components of LED luminary.
2. LED product design basics and significance of optics.
3. LED Technical Basics, array configuration, thermal management,
4. How to handle LEDs and PCBs during assembly and packaging.
5. Ingress protection rating requirement for different LED Lighting products.
6. Special ESD and work safety precautions to be taken during assembling.
7. 5S standards (Sorting, setting, shining, standardise, sustain).
8. LED Driver selection
9. Safety and environmental norms to be followed
**Professional Skills:**

1. To plan for receiving the material for assembly, keeping them at work station to assemble luminaries in minimum possible time.
2. To operate screw driver, allen key set, wire stripper, soldering station, potting machine, press, weighting machine.
3. To use magnifying lens for visual inspection.
4. To use tools necessary for packaging of LED luminaries.
5. To use multimeter, DC power source, power analyser.
6. Ability to understand standard operating procedures and processes related to product assembly.
7. To identify defects in input raw materials.
8. To spot process disruptions and delays in processes
9. Ability to improve work processes
10. To troubleshoot and reduce machine down time

**Core Skills:**

0. Able to read company’s SOP and work instructions.
1. Able to maintain day to day operational records as per company policy.
2. To maintain pace of the throughput as per production requirement.
3. To effectively communicate with supervisor about work requirements.
4. To be able to write reports in log books.
5. To co-ordinate with other team members in order to collect inputs and deliver output to the next process.
6. To share knowledge with team members for smooth work flow.
7. To work as a team to meet the daily target of LED luminary assembly.

ESDM Courses

Level Code: L5
Vertical Name: Embedded Systems & VLSI

Course ID:
- NL/M/L5/C016
- TL/M/L5/C037
- EL/M/L5/C029

Course Name:
3.9.1 Embedded system Design using 8-bit Microcontrollers (NIELIT/TSSC/ESSCI)

Objective of the Course:
To train students on programming of microcontroller, interfacing of external peripherals to microcontroller and troubleshooting of microcontroller based Embedded electronic systems/products.

Learning Outcomes:
- Participant shall learn
  - Architecture of 8051 Microcontroller
  - Programming of 8051 microcontroller
  - Peripheral interfacing to 8051 microcontroller
  - Trouble shooting 8051 microcontroller based systems
  - Architecture of PIC Microcontroller
  - Programming of PIC microcontroller
  - Peripheral interfacing to PIC microcontroller
  - Trouble shooting PIC microcontroller based systems

Expected Job Roles:
1. Microcontroller Technician - Trouble shooting of Microcontroller based electronic systems/products
2. Entrepreneur - Development of small electronic gadgets based on Microcontroller
### Duration of the Course (in hours)

400 hrs

### Minimum Eligibility Criteria and pre-requisites, if any

Diploma

### Professional Knowledge:

The participant shall know and understand
- Development of embedded systems with 8051 and PIC Microcontrollers
- Electronic System Design with 8051 Microcontrollers
- Electronic System Design with PIC Microcontrollers
- Embedded Coding with 8051 Microcontrollers
- Embedded Coding with PIC Microcontrollers

### Professional Skill:

#### Reading and writing skills
- How to read and comprehend the data sheet of various 8051 and PIC based Microcontrollers
- To document the completed work
- To read the standard operating procedures for different types of Microcontroller based Electronic systems

#### Tool Usage
- To work with Embedded Systems Tools such as compiler, assembler, linker and debugger

### Core Skill:

- Trouble shooting of Microcontroller based electronic systems/products
- Development of small electronic gadgets based on Microcontroller

#### Recommended Hardware:
1. 8051 Microcontroller kits
2. PIC Development kit
3. PC
4. Interfacing boards
5. Electronic Components for Mini project as per requirement

#### Recommended Software:
1. Kiel ‘C’ or similar Embedded C Compiler for 8051
2. MP Lab with PIC – C Compiler/any other appropriate compiler

#### Text Books:
2. Design with PIC Microcontrollers, Peatman, John B, Pearson Education PTE. Ltd.

#### Reference Books:
1. Programming and Customizing The 8051 Microcontroller, Predko, Myke, Tata Mgh, New Delhi
2. Programming and Customizing the PIC Microcontroller, Predko, Myke, Tata Mgh, New Delhi
Objectives of the Course:

To develop skill of handling VLSI Tools for Designing mixed signal circuits, its verifications and to develop concept of VLSI Fabrication Technology, handling of EDA-VLSI Hardware-Software Tools, Custom-Semi Custom Design, FPGA Implementation etc.

Learning Outcomes:

Participants successfully completing this course will:
- Have the ability to design and specify Analog-Digital systems using the System Verilog and SPICE at the structural/RTL/MOS level.
- Have the ability to design and specify analog-digital systems using the CMOS
- Have the ability of Design Verification
- Have ability to design & simulate digital systems described with CMOS-VLSI Design Technology.
- Have the ability to design digital systems using Verilog and Xilinx FPGA.

Expected Job Roles:

To full-fill the need of Industry for skilled and trained manpower to design and verify Analog, Digital & Mixed VLSI Integrated circuits, as a policy of “Ready to Observe Man Power” for VLSI Manufacturing Industry.
Professional Knowledge:

An individual on the job needs to know and understand:

- Company’s products and its production
- To be able to understand designed functional Analog and digital system
- To perform synthesis, place, and route of a Mixed signal design into a target FPGA.
- To display knowledge of good digital design practices in the context of the target hardware.
- To learn advanced VLSI design using EDA Tools
- To introduce a bottom-up and top-down design approaches
- Relevant reference sheets, manuals and documents regarding e-waste

- Relevant tools, hardware’s and peripherals required for recycling of e-waste
- Knowledge of Govt. rules and regulations regarding e-waste

Professional Skill:

An individual should have following Professional Skill

- Handling of EDA tools Hardware and Software for development of VLSI Circuitry.
- Handling of prototype and pre-production VLSI product for various electronic system and liaise with supplier for production implementations.
- Able to specify components and equipment required for product development.
- Creation of product specifications, Statement of Work, from customer requirements.
- Support for sales and technical staff.
- Support to areas such as post-design, production & QA.
- Quality standards required for designing good product.

Core Skill:

An individual on the job should have following Core Skill

- Providing support for VLSI Design Group
- Able to give support and advice whenever necessary to all stakeholders involved.
- Over the whole product life cycle, Ensure that the products meet the quality standards

### Recommended Hardware:

- Xilinx Vertex Series FPGA Board 10 No’s for a group of 20 Students
- 10 no’s High End PCs

### Recommended Software:

- Model Sim 6.6PE or advance Version. 10 User License
- Xilinx ISE Software. 25 User License
- Synposis/Cadence/Tanner EDA Design ISE Software supporting FINFET at 45 nm Node Technology. 10 User License

### Text Books:

1. “Verilog HDL: Digital Design and Modelling”, Joseph Cavanagh, Publisher: CRC Press, Taylor and Francis Group
2. “Digital VLSI Design with Verilog-A text book from Silicon Polytechnic”, John Michael Williams, Publisher: Springer
4. “Design through Verilog HDL”, T. R. Padmanabhan, B. Bala, Tripura Sundari, Publisher: Willey India (P) Ltd.
Reference Books:

1. **System Verilog for Design Second Edition: A Guide to Using System Verilog for Hardware Design and Modeling Paperback** – October 12, 2010 by Stuart Sutherland (Author), Simon Davidmann (Author), Peter Flake (Author), P. Moorby (Foreword)

2. **SystemVerilog For Verification: A Guide to Learning the Testbench Language Features** by Chris Spear

3. NPTEL Online Course Material

   UVM cookbook (Online reference)

5. Online Methodology Documentation from the Mentor Graphics Verification Methodology Team

Objective of the Course:

The aim of the course is to create skilled professionals who can efficiently design and 3D Print objects and devices by leveraging the freedom offered by 3D Printing technologies and open source electronics.

Learning Outcomes:

Participants successfully completing this course will be able to:

1. Select and use correct CAD formats to manufacture a 3D printed part.
2. Design & prototype products
3. Operate and maintain a 3D Printer

Expected Job Roles:

3D Printer System Operator, 3D CAD Design Engineer, Product Developer, Prototyping Engineer

Duration of the Course (in hours) 400 hours (6 months)
**Minimum Eligibility Criteria and pre-requisites, if any**

Diploma Holder or B Sc Graduate and not less than 18 Years of age

**Professional Knowledge:**

An individual on the job needs to know and understand:

- Products and its production process.
- To be able to understand design constraints specific to the company.
- To learn slicing tools.
- To introduce a bottom-up and top-down design approaches.
- Relevant reference sheets, manuals and documents regarding prototyping.

**Professional Skill:**

An individual on the job needs to know and understand:

- Explain current and emerging 3D printing applications in a variety of industries
- Describe the advantages and limitations of each 3D printing technology
- Evaluate real-life scenarios and recommend the appropriate use of 3D printing technology
- Identify opportunities to apply 3D printing technology for time and cost savings
- Discuss the economic implications of 3D printing including its impact on start-up businesses and supply chains
- Design and print objects containing moving parts without assembly
- Identify and recommend the right material based on the application need

**Core Skill:**

An individual on the job should have following:

- Providing support for production and design team
- Able to give support and advice whenever necessary to all stakeholders involved.
- Over the whole product development life cycle, intervene with 3D Printing technologies to optimize the process, reduce production cost, and ease the prototyping activities.

### Reference Books:
Objective of the Course:

The aim of the course is to create skilled professionals who can efficiently operate 3D Scanner and handle CNC routing.

Learning Outcomes:

After undergoing this course, the student will be able to:

1. Operate 3D Scanner and CNC
2. Do post processing of 3D files
3. Maintain 3D Scanner and CNC

Expected Job Roles:

3D Scanner Operator, CNC Operator

Duration of the Course (in hours) 400 hours

Minimum Eligibility Criteria and pre-

Diploma Holder or B Sc Graduate and not less than 18 Years of age
Professional Knowledge:

An individual on the job needs to know and understand:
- Principles of 3D Scanning
- Principles of CNC routing
- To be able to understand design constraints specific to the company.
- Scanning tools
- Working of CNC

Professional Skill:

An individual on the job needs to know and understand:
- Explain current and emerging 3D Scanning requirement of various Industries
- Describe the advantages and limitations of each 3D Scanning technology
- Understand CNC routing
- Identify opportunities to apply 3D Scanning technology for time and cost savings

Core Skill:

An individual on the job should have following:
- Providing support for production and design team in the Company.
- Able to give support and advice whenever necessary to all stakeholders involved.
- Over the whole product development life cycle, intervene with 3D Scanning and CNC routing technologies to optimize the process, reduce production cost, and ease the prototyping activities.

</table>

**Recommended Hardware:**
- 3D Scanner: Kinect Laser Scanner/White Light Scanner/Blue Light Scanner
- CNC Router: Drill CNC Routing System/3 Axis Metal CNC Machining/5 Axis Multi-Material CNC Machining
- High-spec PC

**Recommended Software:**
- Autodesk 123D, CATIA
- CNC Modelling: MultiCNC, GrabCAD

**Text Books:**
- 3 D Scanning Technology by Nesi Linda
- Validation of numerical simulation by 3D Scanning by Samir Leme
- An introduction to CNC by S Vishal
- CNC machines by P Radhakrishnan

**Reference Books:**
- 3 D Scanning Technology by Tongbo Chen
- CNC Machine and automation by Khusdeep Goyal
